Revisionism and Diversification in New Religious Movements Eileen

Barker, 2016-04-08 New Religious Movements tend to start their lives with a number of unequivocal statements, not only of a theological nature but also about the world and appropriate behaviours for the believer. Yet these apparently inalienable Truths and their interpretations frequently become revised, 'adjusted' or selectively adopted by different believers. This book explores different ways in which, as NRMs develop, stagnate, fade away, or abruptly cease to exist, certain orthodoxies and practices have, for one reason or another, been dropped or radically altered. Sometimes such changes are adapted by only a section of the movement, resulting in schism. Of particular concern are processes that might lead to violent and/or anti-social behaviour. As part of the Ashgate/Inform series, and in the spirit of the Inform Seminars, this book approaches its topic from a wide range of perspectives. Contributors include academics, current and former members of NRMs, and members of 'cult-watching' movements. All the contributions are of a scholarly rather than a polemic nature, and brought together by Eileen Barker, the founder of Inform.

Finding Our True Home Thich Nhat Hanh, 2001-08-09 Finding Our True Home presents a new definitive translation of the Amitabha Sutra along with Thich Nhat Hanh's first commentary on one of the most practiced forms of Buddhism in the world, the Pure Land school. Introduced in the Buddha's own lifetime, Pure Land practice puts us in touch with the beauty in our own world and brings us the security, solidity, and freedom we need in order to truly enjoy

it. Realizing that Buddha is within us, we see that the Pure Land (paradise) is here and now, rather than in the future. Finding Our True Home will open a new Dharma door to many students of meditation.

Social Media in Industrial China Xinyuan Wang, 2016-09-13 Life outside the mobile phone is unbearable.' Lily, 19, factory worker. Described as the biggest migration in human history, an estimated 250 million Chinese people have left their villages in recent decades to live and work in urban areas. Xinyuan Wang spent 15 months living among a community of these migrants in a small factory town in southeast China to track their use of social media. It was here she witnessed a second migration taking place: a movement from offline to online. As Wang argues, this is not simply a convenient analogy but represents the convergence of two phenomena as profound and consequential as each other, where the online world now provides a home for the migrant workers who feel otherwise 'homeless'. Wang's fascinating study explores the full range of preconceptions commonly held about Chinese people – their relationship with education, with family, with politics, with 'home' – and argues why, for this vast population, it is time to reassess what we think we know about contemporary China and the evolving role of social media.

Think Bayes Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems
