Books of Secrets Allison Kavey, 2010-10-01 How cultural categories shaped--and were shaped by--new ideas about controlling nature Ranging from alchemy to necromancy, books of secrets offered medieval readers an affordable and accessible collection of knowledge about the natural world. Allison Kavey's study traces the cultural relevance of these books and also charts their influence on the people who read them. Citing the importance of printers in choosing the books' contents, she points out how these books legitimized manipulating nature, thereby expanding cultural categories, such as masculinity, femininity, gentleman, lady, and midwife, to include the willful command of the natural world.

Hush Mack Hagood, 2019-03-15 For almost sixty years, media technologies have promised users the ability to create sonic safe spaces for themselves—from bedside white noise machines to Beats by Dre's "Hear What You Want" ad campaign, in which Colin Kaepernick's headphones protect him from taunting crowds. In *Hush*, Mack Hagood draws evidence from noise-canceling headphones, tinnitus maskers, LPs that play ocean sounds, nature-sound mobile apps, and in-ear smart technologies to argue the true purpose of media is not information transmission, but rather the control of how we engage our environment. These devices, which Hagood calls orphic media, give users the freedom to remain unaffected in the changeable and distracting spaces of contemporary capitalism and reveal how racial, gendered, ableist, and class ideologies shape our desire to block unwanted sounds. In a noisy world of haters, trolls, and information overload,

guarded listening can be a necessity for self-care, but Hagood argues our efforts to shield ourselves can also decrease our tolerance for sonic and social difference. Challenging our self-defeating attempts to be free of one another, he rethinks media theory, sound studies, and the very definition of media.

Fluent Forever Gabriel Wyner, 2014-08-05 NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you’ll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you’ll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.
