Scorpio Ascendant Secrets Saket Shah, 2020-01-05 There are times when people just can't identify with the attributes of their Sun or Moon sign. In fact, they may feel that they are an antithesis of their zodiac sign. You may also have observed it. Your Leo friend may not seek attention, may be because he or she has a Capricorn ascendant. Your Sagittarius friend is very possessive, may be because he or she has a Scorpio Ascendant. It is easy to understand why some people do not correspond to their Sun or Moon signs once you know about what is the rising sign or Ascendant in a horoscope. Ascendant is the degree of the zodiac sign that was highest on the Eastern horizon at the time and place of birth. When seen from Earth, the sky seems to move, so the entire zodiac can be observed in a span of 24 hours day which means the rising sign changes on the Eastern horizon every 2 hours because there are 12 zodiac signs. People tend to associate their physical, emotional and spiritual attributes more with rising sign at times.
