

Carrying The Fire An Astronaut S Journeys

Laura Hamilton Waxman

Carrying the Fire Michael Collins, 2001-04-03 NASA astronaut Michael Collins was the first man to walk in space and also piloted the first manned craft to land on the moon.

Carrying the Fire Michael Collins, 2019-04-16 Reissued with a new preface by the author on the fiftieth anniversary of the Apollo 11 journey to the moon The years that have passed since Neil Armstrong, Buzz Aldrin, and Michael Collins piloted the Apollo 11 spacecraft to the moon in July 1969 have done nothing to alter the fundamental wonder of the event: man reaching the moon remains one of the great events—technical and spiritual—of our lifetime. In *Carrying the Fire*, Collins conveys, in a very personal way, the drama, beauty, and humor of that adventure. He also traces his development from his first flight experiences in the air force, through his days as a test pilot, to his Apollo 11 space walk, presenting an evocative picture of the joys of flight as well as a new perspective on time, light, and movement from someone who has seen the fragile earth from the other side of the moon.

Carrying the Fire Michael Collins, 1983 The astronaut describes his flight career and participation in the Gemini 10 and Apollo 11 missions in addition to the ways these experiences have influenced his life and outlook

Flying to the Moon Michael Collins, 2011-04-01 In this entrancing account, space traveler Michael Collins recalls his early days as an Air Force test pilot, his astronaut training at NASA, and his unparalleled experiences in orbit, including the Apollo 11 mission, the first manned lunar landing. The final chapter to his autobiography, revised and updated for this edition of *Flying to the Moon*, is an exciting and convincing argument in favor of mankind's continued exploration of our universe. Several astronauts have written about their experiences, but none so well as Michael Collins...This is just the

book to give the child whose parents made Yeager and The Right Stuff best sellers.-The Washington Post Book World

Carrying the Fire Michael Collins,1998 NASA astronaut Michael Collins was the first man to walk in space and also piloted the first manned craft to land on the moon.

Falling to Earth Al Worden,Francis French,2011-07-26 As command module pilot for the Apollo 15 mission to the moon in 1971, Al Worden flew on what is widely regarded as the greatest exploration mission that humans have ever attempted. He spent six days orbiting the moon, including three days completely alone, the most isolated human in existence. During the return from the moon to earth he also conducted the first spacewalk in deep space, becoming the first human ever to see both the entire earth and moon simply by turning his head. The Apollo 15 flight capped an already-impressive career as an astronaut, including important work on the pioneering Apollo 9 and Apollo 12 missions, as well as the perilous flight of Apollo 13. Nine months after his return from the moon, Worden received a phone call telling him he was fired and ordering him out of his office by the end of the week. He refused to leave. What happened in those nine months, from being honored with parades and meetings with world leaders to being unceremoniously fired, has been a source of much speculation for four decades. Worden has never before told the full story around the dramatic events that shook NASA and ended his spaceflight career. Readers will learn them here for the first time, along with the exhilarating account of what it is like to journey to the moon and back. It's an unprecedentedly candid account of what it was like to be an Apollo astronaut, with all its glory but also its pitfalls.

Forever Young John W Young,2012-09-16 He walked on the Moon. He flew six space missions in three different programs--more than any other human. He served with NASA for more than four

decades. His peers called him the astronaut's astronaut. Enthusiasts of space exploration have long waited for John Young to tell the story of his two Gemini flights, his two Apollo missions, the first-ever Space Shuttle flight, and the first Spacelab mission. *Forever Young* delivers all that and more: Young's personal journey from engineering graduate to fighter pilot, to test pilot, to astronaut, to high NASA official, to clear-headed predictor of the fate of Planet Earth. Young, with the assistance of internationally distinguished aerospace historian James Hansen, recounts the great episodes of his amazing flying career in fascinating detail and with wry humor. He portrays astronauts as ordinary human beings and NASA as an institution with the same ups and downs as other major bureaucracies. He frankly discusses the risks of space travel, including what went wrong with the Challenger and Columbia shuttles. *Forever Young* is one of the last memoirs produced by an early American astronaut. It is the first memoir written by a chief of the NASA astronaut corps. Young's experiences and candor make this book indispensable to everyone interested in the U.S. space program.

Exploring Space Travel Laura Hamilton Waxman, 2017-08-01 Audisee® eBooks with Audio combine professional narration and text highlighting for an engaging read aloud experience! How long does it take to get into outer space? About nine minutes! Powerful vehicles carry people beyond Earth's atmosphere in a short time. But astronauts train for years before they go on missions. In this book, you'll learn about what it's like to be an astronaut in space! As part of the Searchlight Books™ collection, this series explores outer space and sheds light on the question What's Amazing about Space? Fantastic photos, kid-friendly explanations of science concepts, and useful diagrams will help you discover the answers!

Spacewalker Jerry Lynn Ross, John Norberg, 2013 The majority of this book is an insider's account of the US Space Shuttle program, including the unforgettable experience of launch, the delights of

weightless living, and the challenges of constructing the International Space Station. Ross is a uniquely qualified narrator. During seven spaceflights, he spent 1,393 hours in space, including 58 hours and 18 minutes on nine space walks. Life on the ground is also described, including the devastating experiences of the Challenger and Columbia disasters. --

No Dream Is Too High Buzz Aldrin, Ken Abraham, 2016-04-05 Beloved American hero and astronaut Buzz Aldrin reflects on the wisdom, guiding principles, and irreverent anecdotes he's gathered—both in outer space and on earth—through his event-filled life, in this inspiring guide-to-life for the next generation. Everywhere he goes, crowds gather to meet Buzz Aldrin. He is a world-class hero, a larger-than-life figurehead, best known of a generation of astronauts whose achievements surged in just a few years from first man in space to first men on the moon. Now he pauses to reflect and share what he has learned, from the vantage point not only of outer space but also of time: still a non-stop traveler and impassioned advocate for space exploration, Aldrin will be 86 in 2016. *No Dream Is Too High* whittles down Buzz Aldrin's event-filled life into a short list of principles he values, each illustrated by fascinating anecdotes and memories, such as:

- Second comes right after first. NASA protocol should have meant he was first on the moon, but rules changed just before the mission. How he learned to be proud of being the second man on the moon.
- Look for opportunities, not obstacles. Buzz was rejected the first time he applied to be an astronaut. Failure is an opportunity to learn to do better.
- Always maintain your spirit of adventure. For his 80th birthday, Buzz went diving in the Galapagos and hitched a ride on a whale shark. He stays fit, energetic, and fascinated with life.

No Dream Is Too High is a beautiful memento, a thought-provoking set of ideas, and a new opportunity for Buzz Aldrin to connect with the masses of people who recognize his unique place in human history.

The Last Man on the Moon Eugene Cernan, Donald A. Davis, 2007-04-01 The basis of the 2014 award-winning feature-length documentary! A revealing and dramatic look at the inside of the American Space Program from one of its pioneers. Eugene Cernan was a unique American who came of age as an astronaut during the most exciting and dangerous decade of spaceflight. His career spanned the entire Gemini and Apollo programs, from being the first person to spacewalk all the way around our world to the moment when he left man's last footprint on the Moon as commander of Apollo 17. Between those two historic events lay more adventures than an ordinary person could imagine as Cernan repeatedly put his life, his family and everything he held dear on the altar of an obsessive desire. Written with New York Times bestselling author Don Davis, *The Last Man on the Moon* is the astronaut story never before told - about the fear, love and sacrifice demanded of the few men who dared to reach beyond the heavens for the biggest prize of all - the Moon.

A Man on the Moon Andrew Chaikin, 2007-08-28 The authoritative masterpiece (L. A. Times) on the Apollo space program and NASA's journey to the moon This acclaimed portrait of heroism and ingenuity captures a watershed moment in human history. The astronauts themselves have called it the definitive account of their missions. On the night of July 20, 1969, our world changed forever when Neil Armstrong and Buzz Aldrin walked on the moon. Based on in-depth interviews with twenty-three of the twenty-four moon voyagers, as well as those who struggled to get the program moving, *A Man on the Moon* conveys every aspect of the Apollo missions with breathtaking immediacy and stunning detail. *A Man on the Moon* is also the basis for the acclaimed miniseries produced by Tom Hanks, *From the Earth to the Moon*, now airing and streaming again on HBO in celebration of the 50th anniversary of Apollo 11.

Riding Rockets Mike Mullane, 2007-02-06 Selected as a Mission Specialist in 1978 in the first group

of shuttle astronauts, Mike Mullane completed three missions and logged 356 hours aboard the Discovery and Atlantis shuttles. It was a dream come true. As a boy, Mullane could only read about space travel in science fiction, but the launch of Sputnik changed all that. Space flight became a possible dream and Mike Mullane set out to make it come true. In this absorbing memoir, Mullane gives the first-ever look into the often hilarious, sometime volatile dynamics of space shuttle astronauts - a class that included Vietnam War veterans, feminists, and propeller-headed scientists. With unprecedented candour, Mullane describes the chilling fear and unparalleled joy of space flight. As his career centred around the Challenger disaster, Mullane also recounts the heartache of burying his friends and colleagues. And he pulls no punches as he reveals the ins and outs of NASA, frank in his criticisms of the agency. A blast from start to finish, *Riding Rockets* is a straight-from-the-gut account of what it means to be an astronaut, just in time for this latest generation of stargazers.

First Man James R. Hansen, 2012-11-27 On July 20, 1969, the world stood still to watch American astronaut Neil A. Armstrong become the first person ever to step on the surface of another heavenly body. Upon his return to Earth, Armstrong was celebrated for his monumental achievement. He was also--as NASA historian Hansen reveals in this authorized biography--misunderstood. Armstrong's accomplishments as an engineer, a test pilot, and an astronaut have long been a matter of record, but Hansen's access to private documents and unpublished sources and his interviews with more than 125 subjects (including more than fifty hours with Armstrong himself) yield the first in-depth analysis of this elusive, reluctant hero.

Failure Is Not an Option Gene Kranz, 2009-06-23 The author, flight director in NASA's Mission Control, tells of the challenges in space flight from the very early years to the current time and of his own bold suggestions about what we ought to be doing in space now.--Jacket.

Liftoff Michael Collins, 1989

Earthrise Edgar Mitchell, Ellen Mahoney, Dr. Brian Cox, 2014-04-01 The inspiring and fascinating biography of the sixth man to ever walk on the Moon. Of the nearly seven billion people who live on Earth, only 12 have walked on the Moon and Dr. Edgar Mitchell was one of them. *Earthrise* is a vibrant memoir for young adults featuring the life story of this internationally known Apollo 14 astronaut. The book focuses on Edgar's amazing journey to the Moon in 1971 and highlights the many steps he took to get there, including growing up as a farm boy on a ranch; living in Roswell, New Mexico, during the alleged UFO crash; graduating from Carnegie Mellon and MIT; being a navy combat pilot; and becoming a NASA astronaut. In engaging and suspenseful prose he details his historic flight to the Moon, describing everything from the very practical—eating, sleeping, and going to the bathroom in space—to the metaphysical, such as the life-changing sensation of connectedness to the universe that he felt and that has been described, in varying degrees, by many astronauts. Extensive resources include annotated lists of websites about space, museums and organizations, films and videos, and books for further reading.

Flying to the Moon and Other Strange Places Michael Collins, 1976 The author, an astronaut, discusses his early career, his training for space flight, his trips into space including the first lunar landing, and the possibilities for life and flight in space in the future.

Rocket Men Robert Kurson, 2018-04-03 NEW YORK TIMES BESTSELLER • The riveting inside story of three heroic astronauts who took on the challenge of mankind's historic first mission to the Moon, from the bestselling author of *Shadow Divers*. "Robert Kurson tells the tale of Apollo 8 with novelistic detail and immediacy."—Andy Weir, #1 New York Times bestselling author of *The Martian* and *Artemis By August 1968*, the American space program was in danger of failing in its two most

important objectives: to land a man on the Moon by President Kennedy's end-of-decade deadline, and to triumph over the Soviets in space. With its back against the wall, NASA made an almost unimaginable leap: It would scrap its usual methodical approach and risk everything on a sudden launch, sending the first men in history to the Moon—in just four months. And it would all happen at Christmas. In a year of historic violence and discord—the Tet Offensive, the assassinations of Martin Luther King, Jr., and Robert Kennedy, the riots at the Democratic National Convention in Chicago—the Apollo 8 mission would be the boldest, riskiest test of America's greatness under pressure. In this gripping insider account, Robert Kurson puts the focus on the three astronauts and their families: the commander, Frank Borman, a conflicted man on his final mission; idealistic Jim Lovell, who'd dreamed since boyhood of riding a rocket to the Moon; and Bill Anders, a young nuclear engineer and hotshot fighter pilot making his first space flight. Drawn from hundreds of hours of one-on-one interviews with the astronauts, their loved ones, NASA personnel, and myriad experts, and filled with vivid and unforgettable detail, *Rocket Men* is the definitive account of one of America's finest hours. In this real-life thriller, Kurson reveals the epic dangers involved, and the singular bravery it took, for mankind to leave Earth for the first time—and arrive at a new world. "Rocket Men is a riveting introduction to the [Apollo 8] flight. . . . Kurson details the mission in crisp, suspenseful scenes. . . . [A] gripping book."—The New York Times Book Review
