Top Secret/Majic Stanton T. Friedman,2023-10-10 Exposing the U.S. government's biggest-kept secret: a fifty-eight-year UFO cover-up. Top Secret/Majic is the result of nuclear physicist and renowned UFO investigator Stanton T. Friedman's twenty-one year search for the truth about the mysterious Operation Majestic 12, President Truman's top-secret UFO investigation team. In this updated edition of his landmark book, he tells the incredible tale of the July 1947 recovery of a crashed flying saucer near Roswell, New Mexico, and the establishment by President Truman of a truly all-star cast to deal with the saucer and its non-human inhabitants. The first four Directors of Central Intelligence, the first Secretary of Defense, and several outstanding scientists and military leaders were part of the team. Through painstaking research and startling evidence—including documents that have never before been published.

*If, Then* Kate Hope Day,2019 In the quiet haven of Clearing, Oregon, four neighbors find their lives upended when they begin to see themselves in parallel realities. Ginny, a devoted surgeon whose work often takes precedence over her family, has a baffling vision of a beautiful co-worker in Ginny's own bed and begins to doubt the solidity of her marriage. Ginny's husband, Mark, a wildlife scientist, sees a vision that suggests impending devastation and grows increasingly paranoid, threatening the safety of his wife and son. Samara, a young woman desperately mourning the recent death of her mother and questioning why her father seems to be coping with such ease, witnesses an apparition of her mother healthy and vibrant and wonders about the secrets her parents may have kept from her. Cass, a brilliant scholar struggling with the demands of new motherhood, catches a glimpse of herself pregnant again, just as she's on the brink of returning to the project that could define her career. At first the visions are relatively benign, but they grow increasingly disturbing--and, in some cases, frightening. When a natural disaster threatens Clearing, it becomes obvious that the visions were not what they first seemed and that the town will never be the same. --Amazon.com.

**Mysterious Lights and Crop Circles** Linda Moulton Howe,2002 In 1999, a teenager reported seeing crop circles and mysterious lights on the field beside his house in Hoeven, Holland. Within two weeks he reported more variations on this scene. Through interviews with a biophysicist, mathematician, a geologist and others, Howe researched the phenomenon for authenticity and now reports her findings.

**Other Side of the Tracks** Charity Alyse,2023-10-17 This “stirring...emotionally raw” (Publishers Weekly) young adult debut novel about three teens

entangled by secret love, open hatred, and the invisible societal constraints wrapped around people both Black and white is perfect for readers of *All American Boys* and *The Hate U Give*. There is an unspoken agreement between the racially divided towns of Bayside and Hamilton: no one steps over the train tracks that divide them. Or else. Not until Zach Whitman anyway, a white boy who moves in from Philly and who dreams of music. When he follows his dream across the tracks to meet his idol, the famous jazz musician who owns The Sunlight Record Shop in Hamilton, he's flung into Capri Collins's path. Capri has big plans: she wants to follow her late mother's famous footsteps, dancing her way onto Broadway, and leaving this town for good, just like her older brother, Justin, is planning to do when he goes off to college next year. As sparks fly, Zach and Capri realize that they can help each other turn hope into a reality, even if it means crossing the tracks to do it. But one tragic night changes everything. When Justin's friend, the star of Hamilton's football team, is murdered by a white Bayside police officer, the long-standing feud between Bayside and Hamilton becomes an all-out war. And Capri, Justin, and Zach are right in the middle of it.

**Parallel** Lauren Miller,2013-06-06 What if you woke up to a new life every day? A collision of universes leaves Abby living two lives at once - and sharing them with her own double. Two worlds. Two guys. Two selves. How will she stay in control?

**My Real Children** Jo Walton,2014-05-20 It's 2015, and Patricia Cowan is very old. Confused today, read the notes clipped to the end of her bed. She forgets things she should know-what year it is, major events in the lives of her children. But she remembers things that don't seem possible. She remembers marrying Mark and having four children. And she remembers not marrying Mark and raising three children with Bee instead. She remembers the bomb that killed President Kennedy in 1963, and she remembers Kennedy in 1964, declining to run again after the nuclear exchange that took out Miami and Kiev. Her childhood, her years at Oxford during the Second World War-those were solid things. But after that, did she marry Mark or not? Did her friends all call her Trish, or Pat? Had she been a housewife who escaped a terrible marriage after her children were grown, or a successful travel writer with homes in Britain and Italy? And the moon outside her window: does it host a benign research station, or a command post bristling with nuclear missiles? Two lives, two worlds, two versions of modern history; each with their loves and losses, their sorrows and triumphs. Jo Walton's *My Real Children* is the tale of both of Patricia Cowan's lives...and of how every life means the entire world. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**The Road to Reality** Roger Penrose,2021-06-09 **\*\*WINNER OF THE 2020 NOBEL PRIZE IN PHYSICS\*\*** The Road to Reality is the most important and ambitious work of science for a generation. It provides nothing less than a comprehensive account of the physical universe and the essentials of its underlying mathematical theory. It assumes no particular specialist knowledge on the part of the reader, so that, for example, the early chapters give us the vital mathematical background to the physical theories explored later in the book. Roger Penrose's purpose is to describe as clearly as possible our present understanding of the universe and to convey a feeling for its deep beauty and philosophical implications, as well as its intricate logical interconnections. The Road to Reality is rarely less than challenging, but the book is leavened by vivid descriptive passages, as well as hundreds of hand-drawn diagrams. In a single work of colossal scope one of the world's greatest scientists has given us a complete and unrivalled guide to the glories of the universe that we all inhabit. 'Roger Penrose is the most important physicist to work in relativity theory except for Einstein. He is one of the very few people I've met in my life who, without reservation, I call a genius' Lee Smolin

**Dead Astronauts** Jeff VanderMeer,2019-12-03 A 2020 LOCUS AWARD FINALIST Jeff VanderMeer's *Dead Astronauts* presents a City with no name of its own where, in the shadow of the all-powerful Company, lives human and otherwise converge in terrifying and miraculous ways. At stake: the fate of the future, the fate of Earth—all the Earths. A messianic blue fox who slips through warrens of time and space on a mysterious mission. A homeless woman haunted by a demon who finds the key to all things in a strange journal. A giant leviathan of a fish, centuries old, who hides a secret, remembering a past that may not be its own. Three ragtag rebels waging an endless war for the fate of the world against an all-powerful corporation. A raving madman who wanders the desert lost in the past, haunted by his own creation: an invisible monster whose name he has forgotten and whose purpose remains hidden.

**A Day with an Extraterrestrial** Lou Baldin,2008-06-28 Based on a true story. A man's encounter with an extraterrestrial being breaks down the illusions of life and the institutions that govern such illusions, such as religion, science, and governmental sovereignty. The information is eye and mind opening and filled with the realities that intelligent life on earth is simply one planet out of billions that exist in the Milky Way galaxy, which is teeming with similar and much more exotic, super being, type life forms. The earth is not flat, it is not the center of the universe, and certainly is not unique in any way, shape, or form.

**Alien Experiences** Nadine Lalich,Barbara Lamb,2020-09-03 Many current and ancient sources suggest that UFOs and extraterrestrial beings have been visiting the earth and interacting with humans for thousands of years. If this is true, monumental implications arise regarding the origin and evolution of humanity and the future of our planet. This book discusses the highly controversial subject of alien contact and abduction, recounting

twenty-five cases of close encounter. The cases included have been selected from the files of psychotherapist, Barbara Lamb, who has been working with abductees since 1991. In her work with 560 individuals, more than 1,800 regressions have revealed encounters with what appear to be non-human life forms. Although extraterrestrial contact is difficult to prove scientifically, the events described in this book are accurate in that they have been presented as they were described by the individuals who experienced them. These are normal men and women living average, responsible lives who have been subjected to extremely unusual events. These individuals display such a compelling sincerity and marked emotional response to their strange experiences there can be no doubt they have experienced some kind of extraordinary event. As a reader, you may be curious about the subject, or you may be a confirmed skeptic. You may also be someone who is investigating unusual occurrences in your own life. Whatever the case may be, if with an open mind you will simply consider the possibilities inferred by the cases described herein, you might find yourself on the road to a greater vision of reality.

**An Immense World** Ed Yong, 2022-06-21 NEW YORK TIMES BESTSELLER • A “thrilling” (The New York Times), “dazzling” (The Wall Street Journal) tour of the radically different ways that animals perceive the world that will fill you with wonder and forever alter your perspective, by Pulitzer Prize-winning science journalist Ed Yong “One of this year’s finest works of narrative nonfiction.”—Oprah Daily ONE OF THE TEN BEST BOOKS OF THE YEAR: The Wall Street Journal, The New York Times, Time, People, The Philadelphia Inquirer, Slate, Reader’s Digest, Chicago Public Library, Outside, Publishers Weekly, BookPage ONE OF THE BEST BOOKS OF THE YEAR: Oprah Daily, The New Yorker, The Washington Post, The Guardian, The Economist, Smithsonian Magazine, Prospect (UK), Globe & Mail, Esquire, Mental Floss, Marginalian, She Reads, Kirkus Reviews, Library Journal The Earth teems with sights and textures, sounds and vibrations, smells and tastes, electric and magnetic fields. But every kind of animal, including humans, is enclosed within its own unique sensory bubble, perceiving but a tiny sliver of our immense world. In *An Immense World*, Ed Yong coaxes us beyond the confines of our own senses, allowing us to perceive the skeins of scent, waves of electromagnetism, and pulses of pressure that surround us. We encounter beetles that are drawn to fires, turtles that can track the Earth’s magnetic fields, fish that fill rivers with electrical messages, and even humans who wield sonar like bats. We discover that a crocodile’s scaly face is as sensitive as a lover’s fingertips, that the eyes of a giant squid evolved to see sparkling whales, that plants thrum with the inaudible songs of courting bugs, and that even simple scallops have complex vision. We learn what bees see in flowers, what songbirds hear in their tunes, and what dogs smell on the street. We listen to stories of pivotal discoveries in the field, while looking ahead at the many mysteries that remain unsolved. Funny, rigorous, and suffused with the joy of discovery, *An Immense World* takes us on what Marcel Proust called “the only true voyage . . . not to visit strange lands, but to possess other eyes.” WINNER OF THE ANDREW CARNEGIE MEDAL • FINALIST FOR THE KIRKUS PRIZE • FINALIST FOR THE NATIONAL BOOK CRITICS CIRCLE AWARD • LONGLISTED FOR THE PEN/E.O. WILSON AWARD

*trans(re)lating house one* Poupeh Missaghi, 2020-02-04 In the aftermath of Iran’s 2009 election, a woman undertakes a search for the statues disappearing from Tehran’s public spaces. A chance meeting alters her trajectory, and the space between fiction and reality narrows. As she circles the city’s points of connection—teahouses, buses, galleries, hookah bars—her many questions are distilled into one: How do we translate loss into language? Melding several worlds, perspectives, and narrative styles, *trans(re)lating house one* translates the various realities of Tehran and its inhabitants into the realm of art, helping us remember them anew.

*Otherwood* Pete Hautman, 2018-09-11 What happened in the woods that day? Pete Hautman’s riveting middle-grade novel touches on secrets and mysteries — and the power of connections with family and friends. “Hatred combined with lies and secrets can break the world.” Grandpa Zach used to say that before he died, but Stuey never really knew what he meant. It was kind of like how he used to talk about quantum physics or how he used to say ghosts haunted their overgrown golf course. But then one day, after Stuey and his best friend, Elly Rose, spend countless afternoons in the deadfall in the middle of the woods, something totally unbelievable happens. As Stuey and Elly Rose struggle to come to grips with their lives after that reality-splitting moment, all the things Grandpa Zach used to say start to make a lot more sense. This is a book about memory and loss and the destructive nature of secrets, but also about the way friendship, truth, and perseverance have the ability to knit a torn-apart world back together.
