Rainmaking Conversations Mike Schultz,John E. Doerr,2011-02-25 Conversations make or break everything in sales. Every conversation you have is an opportunity to find new prospects, win new customers, and increase sales. Rainmaking Conversations provides a proven system for leading masterful conversations that fill the pipeline, secure new deals, and maximize the potential of your account. Rainmaking Conversations offers a research-based, field-tested, and practical selling approach that will help you master the art of the sales conversation. This proven system revolves around the acronym RAIN, which stands for Rapport, Aspirations and Afflictions, Impact, and New Reality. You'll learn how to ask your prospects and clients the right questions, and help them set the agenda for success. Armed with the knowledge of the markets you serve, the common needs of prospects, and how your products and services can help, you can become a trusted advisor to your clients during and after the sale. With the RAIN system, you'll be able to: Build rapport and trust from the first contact Create conversations with prospects, referral sources, and clients using the telephone, email, and mail Uncover the real need behind client challenges Make the case for improved business impact and return on investment (ROI)

for your prospects Understand and communicate your value proposition Apply the 16 principles of influence in sales Overcome and prevent all types of objections, including money Craft profitable solutions and close the deal The world-class RAIN SellingSM methodology has helped tens of thousands of people lead powerful sales conversations and achieve breakthrough sales performance. Start bridging the gap between hello and profitable relationships today.

*Social Capital and Entrepreneurship* Phillip H. Kim, Phillip Kim, Howard Aldrich, 2005 *Social Capital and Entrepreneurship* concludes by examining the tension between the properties of social networks used in entrepreneurship researchers' models and the limited perspective on networks available to practicing entrepreneurs.

**Twelve Years a Slave** Solomon Northup, 2013-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

*Entrepreneurship, Geography, and American Economic Growth* Zoltan J. Acs, Catherine Armington, 2006-06-19 The spillovers in knowledge among largely college-educated workers were among the key reasons for the impressive degree of economic growth and spread of entrepreneurship in the United States during the 1990s. Prior 'industrial policies' in the 1970s and 1980s did not advance growth because these were based on outmoded large manufacturing models. Zoltan Acs and Catherine Armington use a knowledge spillover theory of entrepreneurship to explain new firm formation rates in regional economies during the 1990s period and beyond. The fastest-growing regions are those that have the highest rates of new firm formation, and which are not dominated by large businesses. The authors of this text also find support for the thesis that knowledge spillovers move across industries and are not confined within a single industry. As a result, they suggest, regional policies to encourage and sustain growth should focus on entrepreneurship among other factors.

**Quantity Discounts** Charles L. Munson,Jonathan Jackson,2015-04-30 Quantity Discounts surveys operations management literature and offers ways to bridge remaining gaps between research and practice. The authors include formulas and solution methods for some of the fundamental quantity discount scenarios from both buyers' and sellers' perspectives. Sample solution methods provide enough detail to enable implementation by managers, and they provide a flavor of the variety and complexity of some of the core techniques appearing in the literature. Quantity Discounts is organized as follows. Section 2 describes quantity discount conditions and realities, including the many reasons why companies offer them, the various quantity discount characteristics, results from surveys of practicing managers, and a sampling of real-world discounts appearing in the literature. Section 3 provides a literature review for buyer's perspective models, while Section 4 provides a review for seller's perspective models. Section 5 concludes with several recommendations for future research. Finally, especially designed for instructors and practitioners, the Appendix illustrates how to implement several standard quantity discount models into Microsoft Excel with relative ease.

**Generating Social Capital** M. Hooghe,D. Stolle,2003-05-15 Social capital - networks of civic engagements, norms of reciprocity, and attitudes of trust - is widely seen as playing a key role for the health of democracy. While many authors have examined the consequences of social capital, there is a pressing need to explore its sources. This collection brings together leading American and European scholars in the first comparative analysis of how social trust and other civic attitudes are generated. The contributors to this volume examine the generation of social capital from two directions: society-based approaches that emphasize voluntary associations, and institutional approaches that emphasize policy.
