The Seed Garden Lee Buttala, Shynyn Siegel, 2015-05-04 Winner of the American Horticultural Society Award for Excellence In Garden Book Publishing Winner of the Silver Medal for Best Reference from the Garden Writer's Association Filled with advice for the home gardener and the more seasoned horticulturist alike, *The Seed Garden: The Art and Practice of Seed Saving* provides straightforward instruction on collecting seed that is true-to-type and ready for sowing in next year's garden. In this comprehensive book, Seed Savers Exchange, one of the foremost American authorities on the subject, and the Organic Seed Alliance bring together decades of knowledge to demystify the time-honored tradition of saving the seed of more than seventy-five coveted vegetable and herb crops—from heirloom tomatoes and long-favored varieties of beans, lettuces, and cabbages to centuries-old varieties of peppers and grains. With clear instructions, lush photographs, and easy-to-comprehend profiles on individual vegetable crops, this book not only teaches us how to go about conserving these important varieties for future generations and for planting out in next year's garden, it also provides a deeper understanding of the importance of saving these genetically valuable varieties of vegetables that have evolved over the centuries through careful selection by farmers and home gardeners. Through simple lessons and master classes on crop selection, pollination, roguing, and the processes of harvesting and storing seeds, this book ensures that these time-honored traditions can continue. Many of these vegetable varieties are treasured for traits that are singular to their strain, whether that is a resistance to disease, an ability to grow well in a region for which that crop is not typically well suited, resistance

to early bolting, or simply because it is a great-tasting variety. In an age of genetically modified crops and hybrid seed, a growing appreciation for saving seeds of these time-tested, open-pollinated cultivars has found a new audience from home vegetable gardeners and cooks to restaurant chefs and local farmers. Whether interested in simply saving seeds for home use or working to conserve rare varieties of beloved squashes and tomatoes, this book provides a deeper understanding of the art, the science, and the joy of saving seeds.

Seed Libraries Cindy Conner, 2015-02-01 Community-based initiatives to preserve and protect our food supply Historically, seed companies were generally small, often family-run businesses. Because they were regionally based, they could focus on varieties well-suited to the local environment. A Pacific Northwest company, for example, would specialize in different cultivars than a company based in the Southeast. However the absorption of these small, independent seed businesses into large multinationals, combined with the advancement of biotechnology resulting in hybrids and GMO seeds, has led to a serious loss of genetic diversity. The public is now at the mercy of the corporations that control the seeds. In the past few years, gardeners have realized the inherent danger in this situation. A growing movement is striving to preserve and expand our stock of heritage and heirloom varieties through seed saving and sharing opportunities. *Seed Libraries* is a practical guide to saving seeds through community programs, including: Step-by-step instructions for setting up a seed library A wealth of ideas to help attract patrons and keep the momentum going Profiles of existing libraries and other types of seed saving partnerships Whoever controls the seeds controls the food supply. By empowering communities to preserve and protect the genetic diversity of their harvest, *Seed Libraries* is the first step towards reclaiming our self-reliance while enhancing food security and ensuring that

the future of food is healthy, vibrant, tasty, and nutritious. Cindy Conner is a permaculture educator, founder of Homeplace Earth and producer of two popular instructional gardening DVDs. She is also the author of Grow a Sustainable Diet .

Landrace Gardening Joseph Lofthouse, 2021-09-11 Food reliability matters more than ever. Joseph Lofthouse taught landrace gardening at conferences hosted by the Rocky Mountain Seed Alliance, National Heirloom Expo, Organic Seed Alliance, Northeast Organic Farming Association (NOFA-NY), and Utah Farm & Food Conference. He serves as World Tomato Society ambassador. Landrace Gardening is brilliant. It's a love story! And 2 parts gardening handbook. There are so many revelations I don't know where to begin? AMAZING. In every way this is a book for the ages. Bravo Joseph. Dan Barber, Blue Hill At Stone Barns, and Row 7 Seed Company. There is magic in the way Joseph Lofthouse marries his no-stress approach to gardening with such deep love and passion. This book is as much a gardening manual as it is a re-framing of our relationship with each other and the world. Landrace Gardening gives us a roadmap to the kind of joyful food security that we need for healing many of the most important wounds of our time. Jason Padvorac Joseph Lofthouse has a focus upon something that all gardeners should know: Landrace varieties are the way to sustainability. The best part is that everything in his book is adaptable for any gardener. No high level knowledge of botany or chemistry is required. The versatility and diversity of growing landrace plants speaks for themselves. Jere Gettle- Baker Creek Heirloom Seed Company. The western sustainable agriculture movement has long needed its own version of the 'One Straw Revolution'. Joseph Lofthouse provides just that. With revolutionary gusto based on heretical thought and age old human gnosis. In Landrace

Gardening, Food Security... Lofthouse steps firmly into the role of Iconoclast and elder seed shaman. Alan Bishop, Alchemist at Spirits Of French Lick
