The Big Exit David Carnoy, 2012-10-11 The acclaimed author of *Knife Music* delivers “a

thriller set in California's Silicon Valley that has it all . . . [an] exceptionally satisfying murder puzzle" (Publishers Weekly, starred review). Richie Forman made his name and his fortune in dot-com marketing . . . but that was before he went to prison for a crime he swears he didn't commit. Now that he's been released, Richie wants to rebuild his life in the Bay Area. By day, he works at a law firm dedicated to freeing innocent men from prison. By night, he makes a living impersonating Frank Sinatra. But then his ex-best friend is found hacked to death in his garage, and Richie becomes the prime suspect. "Colorful characters abound" in this murder mystery with more intricate twists than a microchip. The Big Exit is a "first rate crime caper" (Kirkus).

Red Carpet Erich Schwartzel, 2022-02-08 This is a fascinating book. It will educate you. Schwartzel has done some extraordinary reporting. – The New York Times Book Review "In this highly entertaining but deeply disturbing book, Erich Schwartzel demonstrates the extent of our cultural thrall to China. His depiction of the craven characters, American and Chinese, who have enabled this situation represents a significant feat of investigative journalism. His narrative is about not merely the movie business, but the new world order." –Andrew Solomon, author of Far from the Tree and The Noonday Demon An eye-opening and deeply reported narrative that details the surprising role of the movie business in the high-stakes contest between the U.S. and China From trade to technology to military might, competition

between the United States and China dominates the foreign policy landscape. But this battle for global influence is also playing out in a strange and unexpected arena: the movies. The film industry, Wall Street Journal reporter Erich Schwartzel explains, is the latest battleground in the tense and complex rivalry between these two world powers. In recent decades, as China has grown into a giant of the international economy, it has become a crucial source of revenue for the American film industry. Hollywood studios are now bending over backward to make movies that will appeal to China's citizens—and gain approval from severe Communist Party censors. At the same time, and with America's unwitting help, China has built its own film industry into an essential arm of its plan to export its national agenda to the rest of the world. The competition between these two movie businesses is a Cold War for this century, a clash that determines whether democratic or authoritarian values will be broadcast most powerfully around the world. Red Carpet is packed with memorable characters who have—knowingly or otherwise—played key roles in this tangled industry web: not only A-list stars like Matt Damon, Angelina Jolie, and Richard Gere but also eccentric Chinese billionaires, zany expatriate filmmakers, and starlets who disappear from public life without explanation or trace. Schwartzel combines original reporting, political history, and show-biz intrigue in an exhilarating tour of global entertainment, from propaganda film sets in Beijing to the boardrooms of Hollywood studios to the living rooms in Kenya where families decide

whether to watch an American or Chinese movie. Alarming, occasionally absurd, and wildly entertaining, Red Carpet will not only alter the way we watch movies but also offer essential new perspective on the power struggle of this century.

Countless women play by the bias male rules of dating and relationships, one that keeps them in a constant state of stress and worry. Victims of romance instead of masters of love, today's women settle for cheap dates and cheaper talk. Why are you splitting the bill with

a man that should be spoiling you? Why are you preparing home cooked meals for a man that can't provide you a home? Why are you having sex with a man that promises the world, but refuses to give you his heart? Why are you playing by outdated rules in hopes that one day your kindness will be rewarded? Run to the Finish Amanda Brooks, 2020-03-03
Inspiration and practical tips for runners who prioritize enjoyment over pace and embrace their place as an average runner In her first book, popular runner blogger Amanda Brooks lays out the path to finding greater fulfillment in running for those who consider themselves middle of the pack

runners -- they're not trying to win Boston (or even qualify for Boston); they just want to get strong and stay injury-free so they can continue to enjoy running. *Run to the Finish* is not your typical running book. While it is filled with useful strategic training advice throughout, at its core, it is about embracing your place in the middle of the pack with humor and learning to love the run you've got without comparing yourself to other runners. Mixing practical advice like understanding the discomfort vs. pain, the mental side of running, and movements to treat the most common injuries with more playful elements such as Favorite hilarious marathon signs and Weird Thoughts We all Have at the Start Line, Brooks is the down-to-earth, inspiring guide for everyone who wants to be happier with their run.

The Alchemy of Us Ainissa Ramirez, 2021-04-06 A “timely, informative, and fascinating” study of 8 inventions—and how they shaped our world—with “totally compelling” insights on little-known inventors throughout history (Elizabeth Kolbert, Pulitzer Prize-winning author of *The Sixth Extinction*) In *The Alchemy of Us*, scientist and science writer Ainissa Ramirez examines 8 inventions and reveals how they shaped the human experience: • Clocks • Steel rails • Copper communication cables • Photographic film • Light bulbs • Hard disks • Scientific labware • Silicon chips Ramirez tells the stories of the woman who sold time, the inventor who inspired Edison, and the hotheaded undertaker whose invention pointed the way to the computer. She describes how our pursuit of precision in timepieces changed how we

sleep; how the railroad helped commercialize Christmas; how the necessary brevity of the telegram influenced Hemingway's writing style; and how a young chemist exposed the use of Polaroid's cameras to create passbooks to track black citizens in apartheid South Africa. These fascinating and inspiring stories offer new perspectives on our relationships with technologies. Ramirez shows not only how materials were shaped by inventors but also how those materials shaped culture, chronicling each invention and its consequences—intended and unintended. Filling in the gaps left by other books about technology, Ramirez showcases little-known inventors—particularly people of color and women—who had a significant impact but whose accomplishments have been hidden by mythmaking, bias, and convention. Doing so, she shows us the power of telling inclusive stories about technology. She also shows that innovation is universal—whether it's splicing beats with two turntables and a microphone or splicing genes with two test tubes and CRISPR.

Tainted Tap Katrinell M. Davis, 2021-04-06 After a cascade of failures left residents of Flint, Michigan, without a reliable and affordable supply of safe drinking water, citizens spent years demanding action from their city and state officials. Complaints from the city's predominantly African American residents were ignored until independent researchers confirmed dangerously elevated blood lead levels among Flint children and in the city's tap water. Despite a 2017 federal court ruling in favor of Flint

residents who had demanded mitigation, those efforts have been incomplete at best. Assessing the challenges that community groups faced in their attempts to advocate for improved living conditions, Tainted Tap offers a rich analysis of conditions and constraints that created the Flint water crisis. Katrinell Davis contextualizes the crisis in Flint's long and troubled history of delivering essential services, the consequences of regional water-management politics, and other forms of systemic neglect that impacted the working-class community's health and well-being. Using ethnographic and empirical evidence from a range of sources, Davis also sheds light on the forms of community action that have brought needed changes to this underserved community.

Flowers Under My Pillow Nell Iris, 2021-06-26 Smiling brown eyes. A dark beard. Dandelions. Sunny, happy dandelions. For thirty years, Frode's had the same dream. Every Midsummer's Eve since he was a kid accompanying his sister to pick flowers

to put under his pillow, he's dreamed of the same man. A dream he never shares with anyone that makes him wish for impossible things ... like true love. Then one Midsummer's Eve, the man of Frode's dreams stands before him in the flesh. Both men recognize each other despite never having met in real life. Both men are instantly drawn to each other and want to know more. Who is he? Is he even real? Their questions are many but do the whys and the hows matter? Or should they allow the Midsummer magic that brought them together to lead the way into each other's arms? Into each other's hearts? Traditional Swedish folklore tells you that if you pick seven kinds of flowers in silence and put them under your pillow on Midsummer's Eve, you'll dream of the man you'll marry.

Loving Hugh Nini, Neal Treadwell, 2020-10-14

Loving: A Photographic Story of Men in Love, 1850-1950 portrays the history of romantic love between men in hundreds of moving and tender vernacular photographs taken between the years 1850 and 1950. This visual narrative of astonishing sensitivity brings to light an until-now-unpublished collection of hundreds of snapshots, portraits, and group photos taken in the most varied of contexts, both private and public. Taken when male partnerships were often illegal, the photos here were found at flea markets, in shoe boxes, family archives, old suitcases, and later online and at auctions. The collection now includes photos from all over the world: Australia, Bulgaria, Canada, Croatia, France, Germany, Japan, Greece, Latvia, the United States, the United Kingdom, Russia, and Serbia. The subjects were identified as couples by that unmistakable look in the eyes of two people in

love - impossible to manufacture or hide. They were also recognized by body language - evidence as subtle as one hand barely grazing another - and by inscriptions, often coded. Included here are ambrotypes, daguerreotypes, glass negatives, tin types, cabinet cards, photo postcards, photo strips, photomatics, and snapshots - over 100 years of social history and the development of photography. Loving will be produced to the highest standards in illustrated book publishing, The photographs - many fragile from age or handling - have been digitized using a technology derived from that used on surveillance satellites and available in only five places around the world. Paper and other materials are among the best available. And Loving will be manufactured at one of the world's elite printers. Loving, the book, will be up to the measure of its message in every way. In these delight-filled pages, couples in love tell their own story for the first time at a time when joy and hope - indeed human connectivity - are crucial lifelines to our better selves. Universal in reach and overwhelming in impact, Loving speaks to our spirit and resilience, our capacity for bliss, and our longing for the shared truths of love.
