Introduction to Criminology Frank E. Hagan, Leah E. Daigle, 2019-01-02 This is one of the best texts I have seen in a while...It makes the world of criminology less daunting and more relevant. –Allyson S. Maida, St. John's University Introduction to Criminology, Tenth Edition, is a comprehensive introduction to the study of criminology, focusing on the vital core areas of the field—theory, method, and criminal behavior. With more attention to crime typologies than most introductory texts, Hagan and Daigle investigate all forms of criminal activity, such as organized crime, white collar crime, political crime, and environmental crime. The methods of operation, the effects on society and policy decisions, and the connection between theory and criminal behavior are all explained in a clear, accessible manner. Criminology Stephen Eugene Brown, Finn-Aage Esbensen, Gilbert Geis, 2013 This highly acclaimed criminology text presents an up-to-date review of rational choice theories, including deterrence, shaming, and routine activities.

An Introduction to Criminological Theory Roger Hopkins Burke, 2018-11-01 This book provides a comprehensive and up-to-date introduction to criminological theory for students taking courses in criminology at both undergraduate and postgraduate level. Building on previous editions, this book presents the latest research and theoretical developments. The text is divided into five parts, the first three of which address ideal type models of criminal behaviour: the rational actor, predestined actor and victimized actor models. Within these, the various criminological theories are located chronologically in the context of one of these different traditions, and the strengths and weaknesses of each theory and model are clearly identified. The fourth part of the book looks closely at more recent attempts to integrate theoretical elements from both within and across models of criminal

behaviour, while the fifth part addresses a number of key recent concerns of criminology: postmodernism, cultural criminology, globalization and communitarianism, the penal society, southern criminology and critical criminology. All major theoretical perspectives are considered, including: classical criminology, biological and psychological positivism, labelling theories, feminist criminology, critical criminology and left realism, situation action, desistance theories, social control theories, the risk society, postmodern condition and terrorism. The new edition also features comprehensive coverage of recent developments in criminology, including 'the myth of the crime drop', the revitalization of critical criminology and political economy, shaming and crime, defiance theory, coerced mobility theory and new developments in social control and general strain theories. This revised and expanded fifth edition of *An Introduction to Criminological Theory* includes chapter summaries, critical thinking questions, policy implications, a full glossary of terms and theories and a timeline of criminological theory, making it essential reading for those studying criminology and taking courses on theoretical criminology, understanding crime, and crime and deviance

Vold's Criminological Theory Jeffrey B. Snipes, Alexander L. Gerould, 2019 The standard text in the field, Vold's *Theoretical Criminology* is universally known by scholars in the discipline. The book concludes with a chapter on assessing theories and their policy implications--

Confessions of a Dying Thief Darrell J. Steffensmeier, 2017-07-12 *Recipient of the American Society of Criminology's 2006 Michael J. Hindelang Award for a book, published within the past three calendar years, that is the most outstanding contribution to research in criminology. *Nominated for the 2007 Outstanding Book Award of the Academy of Criminal Justice Sciences. Sam Goodman, was a long-time thief, fence, and quasi-legitimate businessman. He had a criminal career that spanned fifty years, beginning in his mid-teens and ending with his death when he was in his mid-sixties. *Confessions of a Dying Thief* is an in-depth ethnographic study of Sam and his world based on continuous contact with him for many years, on multiple interviews with his network of associates in crime and business, and on a series of interviews with him shortly before he died. The book updates and greatly expands the case study of Sam Goodman's fencing activity found in Steffensmeier's award-winning 1986 book *The Fence: In the Shadow of Two Worlds*. It combines Sam's colorful narrative accounts with substantive commentary by the authors to provide a more nuanced portrayal of criminal careers, illegal enterprise, and the broad landscape comprising the entity called crime. To more fully understand pathways into and out of crime as well as the social organization of illegal enterprise, the authors propose an integrative learning-opportunity-commitment framework that combines differential association/social learning theory and an extended conceptualization of criminal opportunity with a three-fold theory of commitment to crime. This framework offers an integrated and more complete way of understanding mechanisms that underlie criminal offending and criminal

careers. It also recognizes the complexity and scope of the criminal landscape and its embeddedness in the fabric of the larger society, including its criminal justice system. Sam's illness and death are a sobering backdrop to the *Criminological Theories* Ronald L. Akers, 1996

Fundamentals of Criminology Kelly Frailing, Dee Wood Harper, 2013-07-19 *Fundamentals of Criminology: New Dimensions* delivers a comprehensive and comprehensible introduction to the discipline of criminology. As the title implies, it covers the fundamentals of criminology, including the major theories of crime causation, classic and current empirical tests of those theories, the strengths and weaknesses and the policy implications of each. It also describes the types of crime and provides current rates, trends over time and theoretical explanations for each, as well as a discussion of characteristics of offenders and victims. What sets this book apart from the many other fine criminology textbooks out there is its inclusion of some new dimensions of criminology. The new dimensions in this book include but are not limited to research designs in criminology, new theories of crime causation, crime in different contexts, connections between criminology and criminal justice policy and a number of lingering issues for both disciplines. In combination with the fundamentals, these new dimensions are designed to provide readers with the richest, most complete understanding of what crime is, how much of it there is, what causes it and what do to about it, as well as the ability and desire to pose important questions for the future of both criminology and criminal justice. “The authors have produced a comprehensive, readable, and thoroughly interesting text covering the topic of sociological criminology. Yes, there are a plethora of texts in this area,

but Harper and Frailing's addition to the field has a number of features moving it ahead of the competition. There is in-depth coverage of emerging areas in crime, including cybercrime and human trafficking, as well as an excellent section on how disasters augment the opportunities for crime by hindering capable guardianship. The authors' arguments for evidence-based crime prevention strategies and public policies are compelling. Fundamentals of Criminology is worthy of the closest consideration by instructors teaching undergraduate criminology courses." – Jay Corzine, professor of sociology, University of Central Florida

Research Methods in Criminal Justice and Criminology Callie Marie Rennison, Timothy C. Hart, 2022-01-31 Research Methods in Criminal Justice and Criminology connects key concepts to real field research and practices using contemporary examples and recurring case studies throughout the book that demonstrate how concepts relate to students' lives. Authors Callie M. Rennison and Timothy C. Hart introduce practical research strategies used in criminal justice to show students how a research question can become a policy that changes or influences criminal justice practices. The book's student-driven approach addresses both the why and the how as it covers the research process and focuses on the practical application of data collection and analysis. By demonstrating the variety of ways research can be used, and reinforcing the need to discern quality research, the book prepares students to become critical consumers and ethical producers of research. The Second Edition includes two new case studies woven throughout, and new expert profiles to highlight contemporary topics. Editable PowerPoint slides and a test bank are available to instructors.
