Caffeine in Food and Dietary Supplements Leslie A. Pray, Institute of Medicine, Ann L. Yaktine, Food and Nutrition Board, Board on Health Sciences Policy, Diana E. Pankevich, Planning Committee for a Workshop on Potential Health Hazards Associated with Consumption of Caffeine in Food and Dietary Supplements, 2014 Caffeine in Food and Dietary Supplements is the summary of a workshop convened by the Institute of Medicine in August 2013 to

review the available science on safe levels of caffeine consumption in foods, beverages, and dietary supplements and to identify data gaps. Scientists with expertise in food safety, nutrition, pharmacology, psychology, toxicology, and related disciplines; medical professionals with pediatric and adult patient experience in cardiology, neurology, and psychiatry; public health professionals; food industry representatives; regulatory experts; and consumer advocates discussed the safety of caffeine in food and dietary supplements, including, but not limited to, caffeinated beverage products, and identified data gaps. Caffeine, a central nervous stimulant, is arguably the most frequently ingested pharmacologically active substance in the world. Occurring naturally in more than 60 plants, including coffee beans, tea leaves, cola nuts and cocoa pods, caffeine has been part of innumerable cultures for centuries. But the caffeine-in-food landscape is changing. There are an array of new caffeine-containing energy products, from waffles to sunflower seeds, jelly beans to syrup, even bottled water, entering the marketplace. Years of scientific research have shown that moderate consumption by healthy adults of products containing naturally-occurring caffeine is not associated with adverse health effects. The changing caffeine landscape raises concerns about safety and whether any of these new products might be targeting populations not normally associated with caffeine consumption, namely children and adolescents, and whether caffeine poses a greater health risk to those populations than it does for

healthy adults. This report delineates vulnerable populations who may be at risk from caffeine exposure; describes caffeine exposure and risk of cardiovascular and other health effects on vulnerable populations, including additive effects with other ingredients and effects related to pre-existing conditions; explores safe caffeine exposure levels for general and vulnerable populations; and identifies data gaps on caffeine stimulant effects.

The Fourth Industrial Revolution Klaus

Schwab, 2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are

coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Gaia James Lovelock, 2016 *Gaia*, in which James Lovelock puts forward his inspirational and controversial idea that the Earth functions as a single organism, with life influencing planetary processes to form a self-regulating system aiding its own survival, is now a classic work that continues to provoke heated scientific debate.

User Generated Branding Christoph Burmann, Ulrike Arnhold, 2008 In the digital world of the participatory web millions of common people have started publishing own brand related content. Such amateur pieces ignore official marketing campaigns and are generated by brand fans and opponents alike. Given the increasing speed and reach of the internet those grassroots messages may have sweeping effects on the brand image. This book represents a first comprehensive study fully

dedicated to the emerging phenomenon of brand related user generated content. It explores its patterns and shows how brand managers may benefit from it via user generated branding campaigns.

Putting Purpose Into Practice Colin Mayer, Bruno Roche, 2021 This is the first book to provide a precise description of how companies can put purpose into practice. Overcrowded Roberto Verganti, 2017-01-27 A more powerful innovation, which seeks to discover not how things work but why we need things. The standard text on innovation advises would-be innovators to conduct creative brainstorming sessions and seek input from outsiders—users or communities. This kind of innovating can be effective at improving products but not at capturing bigger opportunities in the marketplace. In this book Roberto Verganti offers a new approach—one that does not set out to solve existing problems but to find breakthrough meaningful experiences. There is no brainstorming—which produces too many ideas, unfiltered—but a vision, subject to criticism. It does not come from outsiders but from one person's unique interpretation. The alternate path to innovation mapped by Verganti aims to discover not how things work but why we need things. It gives customers something more meaningful—something they can love. Verganti describes the work of

companies, including Nest Labs, Apple, Yankee Candle, and Philips Healthcare, that have created successful businesses by doing just this. Nest Labs, for example, didn't create a more advanced programmable thermostat, because people don't love to program their home appliances. Nest's thermostat learns the habits of the household and bases its temperature settings accordingly. Verganti discusses principles and practices, methods and implementation. The process begins with a vision and proceeds through developmental criticism, first from a sparring partner and then from a circle of radical thinkers, then from external experts and interpreters, and only then from users. Innovation driven by meaning is the way to create value in our current world, where ideas are abundant but novel visions are rare. If something is meaningful for both the people who create it and the people who consume it, business value follows.

Representations Jerry A. Fodor, 1983 These essays will shape discussion in the philosophy of psychology for years to come. A collection of eleven essays dealing with methodological and empirical issues in cognitive science and in the philosophy of mind, *Representations* convincingly connects philosophical speculation to concrete empirical research. One of the outstanding methodological issues dealt with is the status of functionalism considered as an alternative to behavioristic and physicalistic accounts of mental states and properties. The other issue is the status of reductionism considered as an account of the relation between the psychological and physical sciences. The first chapters present the main lines of argument which have made functionalism the currently favored philosophical approach to ontology of the mental. The outlines of a psychology of propositional attitudes which emerges from consideration of current developments in cognitive science are contained in the remaining essays. Not all of these essays are representations. The new introductory essay seeks to present an overview and gives some detailed proposals about the contribution that functionalism makes to the solutions of problems about intentionality. The concluding essay, also not previously published, is a sustained examination of the relation between theories about the structure of concepts and theories about how

they are learned. Finally, the essay Three cheers for propositional attitudes, a critical examination of some of D. C. Dennett's ideas, has been completely rewritten for this volume. A Bradford Book.

Before I Was CEO Peter Vanham, 2016-11-14 Have you always known what you wanted to be in life? What are some “watershed moments” that made you who you are? When did you get on track to become a successful CEO? It started with three questions at Davos. The younger Peter Vanham looked to the answers from the elite leaders he asked to validate his own career choice, and the rich, private wisdom he received revealed more about building a career than he’d found anywhere else. He shares it all with you in *Before I Was CEO*. For everyone who lays awake at night wondering if they’re heading up or down the corporate ladder, this collection of personal stories from a remarkable group of the most accomplished men and women in business today proves everyone can put themselves in the C-suite by taking a variety of different paths—it’s all how you do it. Some found opportunity through adversity and others came by their big-break moments through serendipity. A group of them walked away from corporate life and lived in other ways and all of them made calculated moves to advance their careers. In their own words, read how it all unfolded, the tough decisions they wrestled, the risks and rewards they saw, and how it all came together. You don’t need a royal pedigree or Ivy League education to reach the top as long as you: • Value family, leave home, and make informed decisions

based on your dreams • Take the first thirty-five years of your life to discover what you're interested in and don't rush to be a CEO • Strategically deal with failure, remember the lessons you learned, and adapt to situations you can't change You aren't the first person to be at the crossroads you're standing in, and with the motivating and instructive stories in *Before I Was CEO*, you may be answering a young journalist's questions at Davos one day.

Supply Chain Governance for Social Sustainability Nandita Farhad, 2019-08-15 This PhD thesis approaches the phenomenon of supply chain governance for social sustainability in the ready-made garment industry in Bangladesh. This research is based on a study of eight large multinational corporations (e.g. clothing brands and retailers) and their ready-made garment suppliers. The purpose of this research is to understand how supply chain governance mechanisms and governance structures improve social sustainability performance when stakeholders are engaged. The study identifies four main governance systems, namely, market-based, hierarchical controlbased, collaborative multi-stakeholder-based and relational cross-sectoral-based. These governance systems are employed in the supply chain by the multinational corporations in combination with different stakeholders, such as suppliers, multi-

stakeholder-initiatives, and non-government organisations. The study focuses on the challenges faced by the multinational corporations to ensure social sustainability, whilst at the same time, incorporating suppliers' viewpoints on the consequences of different governance systems for social sustainability. This research shows the choice of governance structures from market-based, hierarchy-based, collaboration-based and relational-based depend on the cost of managing relationships with the stakeholders and potential risks of governance in a given situation. An effective governance structure for a multinational corporation in a particular context is determined by how well the structure supports governance mechanisms to reduce associated transaction risks that results from potential opportunistic behaviour of the suppliers. In this research, it is argued that governance structure provides the platform for practicing a set of governance mechanisms. The study claims that social sustainability governance incorporates three mechanisms with separate outcomes: one consists of buyer-driven control-based mechanisms which include codes of conduct, supplier assessment and monitoring, and supplier training for regular social compliance; the second consists of multi-stakeholder-based governance mechanisms for structural compliance when unexpected problems occur, for example, building collapse, electrical and fire safety risks emerge; and the third comprises cross-sectoral governance mechanisms when the multinational corporations involve with non-government organisations for social

development of the garment workers and community by facilitating drinking water, health-hygiene, education, and so on. This thesis contributes to the Sustainable Supply Chain Management literature by expanding knowledge of supply chain governance through bringing an understanding of governance mechanisms, governance structures and stakeholder engagements for social sustainability. As the demand for supply chain governance for social sustainability are growing, this thesis can help responsible corporate sourcing managers to develop a deeper understanding of how supply chain governance can affect social sustainability. Denna doktorsavhandling tar sig an fenomenet leverantörsstyrning för social hållbarhet i klädindustrin i Bangladesh. Forskningen baseras på en studie av åtta stora multinationella företag, tillika återförsäljare av kläder och välkända klädmärken. Syftet med studien är att förstå hur leverantörsstyrningsmekanismer och styrstrukturer kan förbättra socialt hållbarhetsarbete när flera aktörer är engagerade och samverkar. Resultatet av studien indikerar att multinationella företag de facto engagerar sig med andra aktörer för att förbättra sin förmåga att bedriva socialt hållbarhetsarbete. Studien identifierar fyra olika typer av leverantörsstyrssystem: ett marknadsbaserat, ett hierarkiskt kontrollbaserat, ett kollaborativt multi-intressentbaserat samt ett relationellt sektorsövergripande system. Dessa styrningssystem tillämpas i leverantörskedjan av de multinationella företagen i samarbete med andra aktörer såsom leverantörer, 'multi-intressentinitiativ' och icke-statliga

organisationer. Studien fokuserar dels på de utmaningar som föreligger för de multinationella företagen när det gäller att säkerställa social hållbarhet, dels på hur leverantörer uppfattar konsekvenserna av de olika styrningssystemen för social hållbarhet. Denna forskning visar att valet av styrstruktur, från marknadsbaserad, hierarkibaserad, kollaborativ och relationell är beroende dels av kostnaden för att hantera och upprätthålla relationer med de olika aktörerna, dels av de potentiella riskerna som föreligger i en viss situation. Vad som utgör en effektiv styrstruktur för ett multinationellt företag i en viss given kontext avgörs av hur väl strukturen stödjer styrningsmekanismer för att reducera transaktionsrisker som bottnar i ett potentiellt opportunistiskt beteende hos leverantörerna. I denna forskning argumenteras det för att struktur ger en plattform för att tillämpa ett antal styrningsmekanismer. Studien visar att styrning av social hållbarhet omfattar tre typer av mekanismer med olika utgång. En består av köparstyrda styrningsmekanismer som omfattar uppförandekoder, leverantörskontroll och leverantörsutbildning. Den andra består av multi-initiativbaserade styrningsmekanismer av hur det strukturella arbetet för att hantera oväntade problem (t.ex. bygg-, el- och brandsäkerhetsrisker) efterföljs. Det tredje omfattar sektorsövergripande styrningsmekanismer där de multinationella företagen samverkar med lokala icke-statliga organisationer i projekt som syftar till social utveckling (tillgång till rent vatten, hälso- & utbildningsinsatser, etc.) för fabriksarbetarna

och det omgivande samhället. Denna avhandling bidrar till Sustainable Supply Chain Management-litteraturen då den utvidgar kunskapen om leverantörsstyrning för social hållbarhet genom en den ger en ökad förståelse för styrningsmekanismer, styrstrukturer och olika aktörers engagemang för social hållbarhet. I takt med att behovet av leverantörsstyrning för social hållbarhet ökar kan denna avhandling hjälpa ansvariga 'corporate sourcing managers' att utveckla en fördjupad förståelse för hur leverantörsstyrning kan påverka social hållbarhet.

Peer to Peer Accommodation Networks Sara Dolnicar, 2017-12-01 The first book to present a new conceptual framework which offers an initial explanation for the continuing and rapid success of such 'disruptive innovators' and their effects on the international hospitality industry. Winning in Emerging Markets Tarun Khanna, Krishna G. Palepu, 2010-04-28 The best way to select emerging markets to exploit is to evaluate their size or growth potential, right? Not according to Krishna Palepu and Tarun Khanna. In *Winning in Emerging Markets*, these leading scholars on the subject present a decidedly different framework for making this crucial choice. The authors argue that the primary exploitable characteristic of emerging markets is the lack of institutions (credit-card systems, intellectual-property adjudication, data research firms) that facilitate efficient business operations. While such

institutional voids present challenges, they also provide major opportunities-for multinationals and local contenders. Palepu and Khanna provide a playbook for assessing emerging markets' potential and for crafting strategies for succeeding in those markets. They explain how to:

- Spot institutional voids in developing economies, including in product, labor, and capital markets, as well as social and political systems
- Identify opportunities to fill those voids; for example, by building or improving market institutions yourself
- Exploit those opportunities through a rigorous five-phase process, including studying the market over time and acquiring new capabilities

Packed with vivid examples and practical toolkits, *Winning in Emerging Markets* is a crucial resource for any company seeking to define and execute business strategy in developing economies.

The Modern Kitchen Tim Hayward, 2018-04-03 The kitchen is the heart of the home – it's where we spend leisure time as a family, where we feed ourselves and where we entertain our friends. The average western family spends more money on the kitchen than they do on a car or a vacation. We fill our kitchens with objects and tools that reflect our needs, tastes and desires. There is nowhere else in daily domestic life where design impinges quite as much as in the kitchen. Every item in the kitchen has its own story. Through 100 familiar objects, *The Modern Kitchen* maps the progress and development of this functional yet also wildly aspirational space. Why do the Le Creuset casserole dish and the wooden salad bowl exert such a cultural hold over us? Has the

accumulation of electrical appliances led us to cook and eat differently? As well as studying the individual objects that have had such a huge impact on the way we live now, *The Modern Kitchen* examines kitchen design, economics, and gender politics through a series of essays. Embodying notions about class, gender, wealth, and health, the home kitchen and its layout, set-up, and contents, remains a neat illustration of our beliefs, tastes, aesthetics, and aspirations – the portrait of our domestic lives.
