Standard-Einsatz-Regeln: Wald- und Flächenbrandbekämpfung Ulrich Cimolino,Jan Südmersen,Detlef Maushake,Nicolas Neumann,2013-06-07 Der

Inhalt: Wald- und Flächenbrände sind auch in einem dicht besiedelten Industriestaat wie Deutschland nicht nur in den Sommermonaten häufige Schadensereignisse und richten erhebliche ökologische und finanzielle Schäden an. Deshalb werden in Deutschland erhebliche Mittel in die Pflege der Waldbestände und die frühe Entdeckung von Waldbränden investiert. Für die meisten Feuerwehren sind jedoch Wald- und Flächenbrände im Vergleich zur Häufigkeit anderer Einsatzarten eher selten. Trotzdem und auch deswegen ist die Bekämpfung von Wald- und Flächenbränden eine Herausforderung für jede Feuerwehr, da gerade in entlegenen Waldabschnitten in vielen Fällen nicht ausreichend Löschwasser vorhanden ist. Daher sind die vorhandenen Einsatz- und auch Löschmittel möglichst effektiv und im Verbund einzusetzen. Der Einsatz von Löschfahrzeugen, -mannschaften, Spezialisten und ggf. von Luftfahrzeugen muss durch die Einsatzleitung präzise koordiniert, mit ausreichenden Sicherheiten versehen und mit einer umfassenden Logistik gestützt werden. Mit dieser überarbeiteten SER geben wir zur Optimierung der Effektivität im Ersteinsatz und bei Großschadensereignissen (u.a. mit Hilfe von Erfahrungen aus der internationalen Waldbrandbekämpfung) aktualisierte Empfehlungen um, - die Sicherheit der Einsatzkräfte zu verbessern, - Einsatzschwerpunkte früher zu erkennen, -die richtige Fahrzeug- und Gerätetechnik auszuwählen und - über eine breitere Palette an Einsatz- und Handlungsoptionen zu verfügen. Mit diesen Empfehlungen können sich die Leser selbst ihre standortbezogenen Regeln erstellen – eben IHRE SER zu dem Thema Waldbrandbekämpfung.

Technik zur Vegetationsbrandbekämpfung Thomas Zawadke,2021-10-06 Das Rote Heft widmet sich den technischen Möglichkeiten, mit denen Vegetationsbrände sicher, schnell und effektiv bekämpft werden können. Der Autor stellt eine vollständige Übersicht von einfachen Handwerkzeugen über traditionelle und innovative Löschtechniken bis hin zu verschiedenen Löschmitteln vor. Neben der Brandbekämpfung werden auch technische Möglichkeiten für den Eigenschutz, beispielsweise durch erweiterte Persönliche Schutzausrüstung, betrachtet. Zudem wird auf die besonderen Anforderungen an die Einsatzfahrzeuge der Feuerwehr eingegangen. Hinweise auf mögliche Erweiterungen der bestehenden Technik, sinnvolle neue Konzepte sowie unterstützende Technik aus dem forst- und landwirtschaftlichen Bereich runden den Titel ab.

Vegetationsbrandbekämpfung (Reihe Einsatzpraxis) Ulrich Cimolino,Detlef Maushake,Jan Südmersen,Thomas Zawadke,2015-06-25 Großflächige und tagelange Wald- und Moorbrände treten auch in Deutschland fast jedes Jahr auf. Sie sind für die Einsatzkräfte ziemlich riskant, wie die vielen (Beinahe)Unfälle, Verunglückten und Verluste an Einsatzfahrzeugen in den letzten Jahren zeigen. Für diesen neuen Band der Reihe Einsatzpraxis wurden die an vielen Stellen gewonnenen Einsatzerfahrungen gesammelt und ausgewertet. So werden die typischen Schwachstellen und Gefährdungspunkte deutlich. Welche Konsequenzen ergeben sich daraus für die Wahl der Ausrüstung und der Einsatztaktik? Was kann der Einsatzleiter präventiv tun? Darauf gibt es klare, erfahrungsgesättigte Antworten.

Young Men and Fire Norman MacLean,2017-05-01 National Book Critics Circle Award Winner: “The terrifying story of the worst disaster in the history of the US Forest Service’s elite Smokejumpers.” –Kirkus Reviews A devastating and lyrical work of nonfiction, *Young Men and Fire* describes the events of August 5, 1949, when a crew of fifteen of the US Forest Service’s elite airborne firefighters, the Smokejumpers, stepped into the sky above a remote forest fire in the Montana wilderness. Two hours after their jump, all but three of the men were dead or mortally burned. Haunted by these deaths for forty years, Norman Maclean puts together the scattered pieces of the Mann Gulch tragedy in this extraordinary book. Alongside Maclean’s now-canonical *A River Runs Through It and Other Stories*, *Young Men and Fire* is recognized today as a classic of the American West. This edition of Maclean’s later triumph—the last book he would write—includes a powerful new foreword by Timothy Egan, author of *The Big Burn* and *The Worst Hard Time*. As moving and profound as when it was first published, *Young Men and Fire* honors the literary legacy of a man who gave voice to an essential corner of the American soul. “A moving account of humanity, nature, and the perseverance of the human spirit.” –Library Journal “Haunting.” –The Wall Street Journal “Engrossing.” –Publishers Weekly

Advances and New Trends in Environmental Informatics Andreas Kamilaris,Volker Wohlgemuth,Kostas Karatzas,Ioannis N. Athanasiadis,2021 This book is an outcome of the 34th International Conference EnviroInfo 2020, hosted virtually in Nicosia, Cyprus by the Research Centre on Interactive

Media, Smart Systems and Emerging Technologies (RISE). It presents a selection of papers that describe innovative scientific approaches and ongoing research in environmental informatics and the emerging field of environmental sustainability, promoted and facilitated by the use of information and communication technologies (ICT). The respective articles cover a broad range of scientific aspects including advances in core environmental informatics-related technologies such as earth observation, environmental modelling, big data and machine learning, robotics, smart agriculture and food solutions, renewable energy-based solutions, optimization of infrastructures, sustainable industrial processes, and citizen science, as well as applications of ICT solutions intended to support societal transformation processes toward the more sustainable management of resource use, transportation and energy supplies. Given its scope, the book is essential reading for scientists, experts and students in these fields of research.

Continuum Thermodynamics and Constitutive Theory Christina Papenfuß,2020-05-16 This book presents different thermodynamic approaches in the area of constitutive theory: thermodynamics of irreversible processes, rational thermodynamics, and extended thermodynamics. These different approaches are analyzed with respect to their presuppositions, as well as to their results, and each method is applied to several important examples. In many cases these examples are archetypes for numerous technologically important materials; i.e. complex materials having an internal structure. Some of the examples dealt with in this book are liquid crystals, colloid suspensions, and fiber suspensions. The book well serves students and researchers who have basic knowledge in continuum mechanics and thermodynamics. It provides a systematic overview of the vast field of thermodynamic constitutive theory, beginning from a historical perspective and concluding with outstanding questions in recent research.

Analyzing and Modeling Interdisciplinary Product Development Frank Neumann,2015-09-30 Frank Neumann focuses on establishing a theoretical basis that allows a description of the interplay between individual and collective processes in product development. For this purpose, he introduces the integrated descriptive model of knowledge creation as the first constituent of his research framework. As a second part of the research framework, an analysis and modeling method is proposed that captures the various knowledge conversion activities described by the integrated descriptive model of knowledge creation. Subsequently, this research framework is applied to the analysis of knowledge characteristics of mechatronic product development (MPD). Finally, the results gained from the previous steps are used within a design support system that aims at federating the information and knowledge resources contained in the models published in the various development activities of MPD.

Advances and New Trends in Environmental Informatics Volker Wohlgemuth, Stefan Naumann, Grit Behrens, Hans-Knud Arndt, 2022-12-11 This book is an outcome of the 35th International Conference EnviroInfo 2021, held at Humboldt University Berlin, organized by the technical committee for Environmental Informatics of the German Informatics Society. It presents a selection of papers that describe innovative scientific approaches and ongoing research in environmental informatics and the emerging field of environmental sustainability, promoted and facilitated by the use of information and communication technologies (ICT). The respective articles cover a broad range of scientific aspects including advances in core environmental informatics-related technologies such as earth observation, environmental modelling, big data and machine learning, robotics, smart agriculture and food solutions, renewable energy-based solutions, optimization of infrastructures, sustainable industrial processes and citizen science, as well as applications of ICT solutions intended to support societal transformation processes toward the more sustainable management of resource use, transportation and energy supplies. A special focus lies on the question how environmental informatics can contribute to achieving the United Nations Sustainable Development Goals. Given its scope, the book is essential reading for scientists, experts and students in these fields of research.

Brake Technology Handbook Bert Breuer, Karlheinz H. Bill, 2008 Microelectronics and mechatronics have resulted in a significant increase in the technical potential and functionality of brake systems. In a single source, this book provides comprehensive coverage of the current state of the art, as well as the future, of brakes and braking systems. Translated and completely updated from the landmark German-language work Bremsenhandbuch, Brake Technology Handbook covers brake system fundamentals, requirements, design, construction, components, and subsystem functions for vehicles of all types (including passenger cars, commercial vehicles, off-road vehicles, motorcycles, racing vehicles and even aircraft).

The Facility Manager's Guide to Information Technology Michael May, 2016-08-25 This easy-to-read, informational text presents a current, impartial and comprehensive look at how Information Technology (IT) and Facility Management (FM) have become inextricably bound together in the modern workplace. Exploring the evolving relationship between Information Technology and Facility Management, this book is a text that can be used by students, novice facility managers and as well experienced facility managers. As a result, the authors intend the text to be used as both a teaching and a reference tool for educational organizations and corporations alike. This text will also cover the latest advancements in facility management automation

and provide a guide for implementing them successfully.

Sensemaking in Organizations Karl E. Weick, 1995-05-31 The teaching of organization theory and the conduct of organizational research have been dominated by a focus on decision-making and the concept of strategic rationality. However, the rational model ignores the inherent complexity and ambiguity of real-world organizations and their environments. In this landmark volume, Karl E Weick highlights how the `sensemaking' process shapes organizational structure and behaviour. The process is seen as the creation of reality as an ongoing accomplishment that takes form when people make retrospective sense of the situations in which they find themselves.

Control-oriented Modelling and Identification Marco Lovera, 2015-01-07 This comprehensive book covers the state-of-the-art in control-oriented modelling and identification techniques. With contributions from leading researchers in the subject, *Control-oriented Modelling and Identification: Theory and practice* covers the main methods and tools available to develop advanced mathematical models suitable for control system design, including: object-oriented modelling and simulation; projection-based model reduction techniques; integrated modelling and parameter estimation; identification for robust control of complex systems; subspace-based multi-step predictors for predictive control; closed-loop subspace predictive control; structured nonlinear system identification; and linear fractional LPV model identification from local experiments using an H1-based global approach.

Advances and New Trends in Environmental Informatics 2023 Volker Wohlgemuth, Dieter Kranzlmüller, Maximilian Hüb, 2024-01-17 This book is an outcome of the 37th International Conference EnviroInfo 2023, held at the Leibniz Supercomputing Centre (Munich, Germany), organized by the technical committee for Environmental Informatics of the German Informatics Society. It explores the fusion of information and communication technologies with environmental sustainability. As a flagship edition of the EnviroInfo conference series, it showcases the latest advancements in applied informatics and environmental informatics. With a focus on Towards a Sustainable Digital Society, the conference presents innovative research on topics such as green computing, sustainable software engineering, and digital transformation. The proceedings cover essential subjects for shaping a greener future, including energy-efficient workloads, environmental management systems, legal frameworks, Earth observation, and geographical information systems. It also examines emerging technologies like robotics, AI, and reinforcement learning, highlighting their applications in environmental informatics. From citizen science to disaster risk modeling and sustainable resource management, the book explores the interdisciplinary nature of environmental

informatics. It also addresses societal aspects, including its role in developing countries. This resource is essential for researchers, professionals, and policymakers seeking to leverage ICT for addressing environmental challenges and building a sustainable digital society.

Community Design Regulation Gordian Hasselblatt,2018-12-13 Council Regulation (EC) No 6/2002 on Community designs (CDR) protects the appearance of a design against counterfeiting and piracy, be it registered or unregistered. The right is applicable throughout the European Union. The registered design will be obtained in a single procedure from the Office for Harmonisation in the Internal Market (OHIM) in Alicante. This commentary gives a detailed article-by-article analysis of the provision of the Regulation and its enforcement in each Member State of the European Union. Wherever feasible, the commentary provides an account of specific bibliography, gives a historical overview, shows the main features and principles underlying the provision, and analyses each paragraph with due regard to the case law of the European courts and the supreme courts of the Member States. The book is divided into five parts: Commentary Measures under Enforcement Directive 2004/48/EC Litigation in EU Member States Annexes Table of cases
