**Growing Moral** Stephen C. Angle, 2022 Growing Moral engages its readers to reflect on and to practice the teachings of Confucianism in the contemporary world. It draws on the whole history of Confucianism, focusing on three thinkers from the classical era (Kongzi or Confucius, Mengzi, and Xunzi) and two from the Neo-Confucian era (Zhu Xi and Wang Yangming). In addition to laying out the fundamental teachings of Confucianism, it highlights the enduring and strikingly relevant lessons that Confucianism offers contemporary readers. At its core, this book builds a case for modern Confucianism as a practical way to grow toward more harmonious lives together through reflection, ritual, and compassion; it can help us find balance and joy within our complex and too-often frenetic modern lives. Individual chapters explain how and why to be filial, follow rituals, and cultivate our sprouts of morality; as well as exploring Confucian approaches to reading, music-making, reflection, and socio-political engagement. Overall, the book presents a progressive vision of Confucianism that addresses historical shortcomings within the tradition concerning gender and other forms of hierarchy--

**Debunking Arguments in Ethics** Hanno Sauer, 2018-07-26 Offers the first book-length discussion of debunking arguments in ethics and the reliability of moral judgment.

**Moral Geographies** David Marshall Smith, 2000 This book explores the interface between geography, ethics and morality. It considers questions that have haunted the past, are subjects of controversy in the present, and which affect the future. Does distance diminish responsibility? Should we interfere with the lives of those we do not know? Is there a distinction between private and public space? Which values and morals, if any, are absolute, and which cultural, communal or personal? And are universal rights consistent with respect for difference? David Smith shows how these questions play themselves out in politics, planning, development, social and personal relations, the exploitation of resources, and competition for territory. After introducing the essential elements of moral philosophy from Plato to postmodernism, he examines the moral significance of concepts of landscape, location and place, proximity, distance and community, space and territory, justice, and nature. He is concerned above all with the morality people practice, to see how this varies according to geographical context, and to assess the inevitability of its outcomes. His argument is seamlessly interwoven with everyday observation and vividly described case studies: the latter include genocide and rescue during the Holocaust, the conflicts over space between Israel and Palestine and within Israel itself, and the social tensions and aspirations in post-apartheid South Africa. The meaning, possibility and limits of social justice lie at the heart of the book. That geographical context is vital to the understanding of moral practice and ethical theory is its central proposition. The book is clearly and engagingly written. The author has a student readership in mind, but his book will appeal widely to geographers and others involved in planning, development, politics, social theory, and the analysis of the contemporary world.

Doing Philosophy Comparatively Tim Connolly, 2022-12-29 What standards should we use to evaluate culturally distinct philosophies? What kind of barrier does language or cultural difference pose in our attempts to understand other traditions? How do we avoid our comparisons being biased? Doing Philosophy Comparatively answers these questions by providing a thorough overview of the

methodology involved in extending philosophy across linguistic and cultural boundaries. Now revised and updated to showcase the most recent developments in the field, this second edition engages with philosophies beyond the Anglo-European tradition and features:

- Examples of cross-cultural philosophy from a wider range of non-Western traditions
- Methodological innovations from works of comparative philosophy published in the last decade
- Focused exercises for each chapter demonstrating how to interact meaningfully with primary texts and engage with recent debates in comparative philosophy
- Updated discussion questions and readings

Introducing the main problems, methods, and approaches of comparative philosophy, this new edition shows you how to make informed cross-cultural judgments through reflection and practice. It remains an essential toolkit for the practice of doing comparative philosophy.

**Does Neuroscience Have Normative Implications?** Geoffrey S. Holtzman, Elisabeth Hildt, 2020  
This book brings together a number of essays that are optimistic about the ways certain neuroscientific insights might advance philosophical ethics, and other essays that are more circumspect about the relevance of neuroscience to philosophical ethics. As a whole, the essays form a self-reflective body of work that simultaneously seeks to derive normative ethical implications from neuroscience, and to question whether and how that may be possible at all. In doing so, the collection brings together psychology, neuroscience, philosophy of mind, ethics, and philosophy of science. Neuroscience seeks to understand the biological systems that guide human behavior and cognition. Normative ethics, on the other hand, seeks to understand the system of abstract moral principles dictating how people ought to behave. By studying how the human brain makes moral judgments, can philosophers learn anything about the nature of morality itself? A growing number of researchers believe that neuroscience can, indeed, provide insights into the questions of philosophical ethics. However, even these advocates acknowledge that the path from neuroscientific to normative ethical ought can be quite fraught.

**Neglected Virtues** Glen Pettigrove, Christine Swanton, 2021-12-20  
Much of the work that has been done on virtue has been devoted to getting virtue ethics a seat at the theoretical table. It has been concerned with showing that virtue ethics can provide a satisfactory account of right action to rival accounts offered by consequentialism and deontology. This volume of essays explores the nitty-gritty details of particular virtues. It includes original contributions from a number of leading scholars in virtue ethics. Most of the virtues discussed – such as ambition, cheerfulness, creativity, magnificence, pride, wit, and wonder – have been almost wholly neglected by contemporary ethicists. The volume also includes coverage of other virtues that have received a fair amount of attention in recent years, such as charity, hope, justice, practical wisdom, and temperance. Here the essays address largely ignored dimensions of these virtues and show how these discussions can enrich our understanding of neglected virtues. *Neglected Virtues* is a welcome addition to the scholarly literature on virtue ethics. Its focus on individual virtues, while not meant to be exhaustive, will open new avenues for future research in this rapidly growing area of ethics and moral philosophy.

**Confucianism and the Philosophy of Well-Being** Richard Kim, 2020-01-21  
Well-being is topic of perennial concern. It has been of significant interest to scholars across disciplines, culture, and time. But like morality, conceptions of well-being are deeply shaped and influenced by one's particular social and cultural context. We ought to pursue, therefore, a cross-cultural understanding of well-being and moral psychology by taking seriously reflections from a variety of moral traditions. This book develops a Confucian account of well-being, considering contemporary accounts of ethics and virtue in light of early Confucian thought and philosophy. Its distinctive approach lies in the integration of Confucian moral philosophy, contemporary empirical psychology, and contemporary philosophical accounts of well-being. Richard Kim organizes the book around four main areas: the conception of virtues in early Confucianism and the way that they advance both individual and communal well-being; the role of Confucian ritual practices in familial and communal ties; the developmental structure of human life and its culmination in the achievement of sagehood; and the sense of joy that the early Confucians believed was central to the virtuous and happy life.

**Handbook of Classical Sociological Theory** Seth Abrutyn, Omar Lizardo, 2021-11-01  
This is the

first handbook focussing on classical social theory. It offers extensive discussions of debates, arguments, and discussions in classical theory and how they have informed contemporary sociological theory. The book pushes against the conventional classical theory pedagogy, which often focused on single theorists and their contributions, and looks at isolating themes capturing the essence of the interest of classical theorists that seem to have relevance to modern research questions and theoretical traditions. This book presents new approaches to thinking about theory in relationship to sociological methods.

**Geography and Ethics** James D. Proctor, David Marshall Smith, 1999 Drawing together specially commissioned contributors from distinguished geographers from around the world the book examines the place of geography in ethics and of ethics in geography.

Violence in Extreme Conditions Eric-Hans Kramer, Tine Molendijk, 2023-05-12 As an organization operating under extreme conditions, the military is often confronted with destructive behavior from individuals, organizations, and societies. Written by experts from a variety of disciplines, this open access book reflects on confrontations with violence under extreme conditions and the various challenges that arise. By examining real first-hand accounts of soldiers' deployments, the contributions shed new light on the multifaceted and sometimes hidden dynamics of destructive violent behavior and offer an ethical reflection on military practices. In addition, they address topics such as moral decision-making in violent contexts, military trauma, organizational change, and military ethics education. The interdisciplinary exploration of these topics has been the primary focus of Désirée Verweij, who was the Chair of Military Ethics at the Netherlands Defence Academy from 2008 to 2021. The contributions in this book are written in honor of her scholarly achievements and help to ensure that these important issues continue to receive attention. The book will appeal to scholars of military studies, organizational studies and military ethics, and to professionals and decisionmakers in military organizations.

**Virtue Ethics: Retrospect and Prospect** Elisa Grimi, 2019-04-24 The rise of the phenomenon of virtue ethics in recent years has increased at a rapid pace. Such an explosion carries with it a number of great possibilities, as well as risks. This volume has been written to contribute a multi-faceted perspective to the current conversation about virtue. Among many other thought-provoking questions, the collection addresses the following: What are the virtues, and how are they enumerated? What are the internal problems among ethicists, and what are the objections and replies to contemporary virtue ethics? Additionally, the practical implications following from the answers to these questions are discussed in new and fascinating research. Fundamental concepts such as teleology and eudaimonism are addressed from both a historical and dialectical approach. This tome will contribute not only to providing further clarity to the current horizons in virtue ethics, but also to the practical conclusion following from the study: to challenge the reader toward a greater pursuit of the virtuous life.

**The Natural Method** Eddy Nahmias, Thomas W. Polger, Wenqing Zhao, 2020-08-04 Prominent philosophers explore themes in the work of Owen Flanagan, focusing on debates about the nature of mind, the self, and morality. Owen Flanagan's work offers a model for how to be a naturalistic and scientifically informed philosopher who writes beautifully and deeply about topics as varied as consciousness and Buddhism, moral psychology and dreaming, identity and addiction, literature and neuroscience. In this volume, leading philosophers--Flanagan's friends, colleagues, and former students--explore themes in his work, focusing on debates over the nature of mind, the self, and morality. Some contributors address Flanagan's work directly; others are inspired by his work or methodology. Their essays are variously penetrating and synoptic, cautious and speculative.

**Empirical Research and Normative Theory** Alexander Max Bauer, Malte Meyerhuber, 2020-04-20 Two questions often shape our view of the world. On the one hand, we ask what there is, on the other hand, we ask what there ought to be. Empirical research and normative theory, the methodological traditions concerned with these questions, entered a difficult relationship, from at least as early as around the time of the advent of modern sciences. To this day, there remains a strong separation between the two domains, with both tending to neglect discourses and results

from the other. Contrary to a verdict of strict segregation between is and ought, there are, nowadays, various attempts to integrate both theoretical approaches. This calls for a discourse on the relation between empirical research and normative theory. In this volume, scholars from different disciplines – including psychology, sociology, economics, and philosophy – discuss the possible desired or undesired influences on, and limits of, the integration of these two approaches.

**Liberal Education and Citizenship in a Free Society** Justin Buckley Dyer, Constantine Christos Vassiliou, 2023-07-24 The liberal arts university has been in decline since well before the virtualization of campus life, increasingly inviting public skepticism about its viability as an institution of personal, civic, and professional growth. New technologies that might have brought people together have instead frustrated the university's capacity to foster thoughtful citizenship among tomorrow's leaders and exacerbated socioeconomic inequalities that are poisoning America's civic culture. With *Liberal Education and Citizenship in a Free Society*, a collection of 19 original essays, editors Justin Dyer and Constantine Vassiliou present the work of a diverse group of scholars to assess the value of a liberal arts education in the face of market, technological, cultural, and political forces shaping higher learning today.

**Ethics in Action for Sustainable Development** Jeffrey D. Sachs, Owen Flanagan, Marcelo Sánchez Sorondo, William Vendley, Anthony Annett, Jesse Thorson, 2022-12-20 The Sustainable Development Goals, adopted by the United Nations in 2015, comprise an ambitious and sweeping agenda that unites economic, social, and environmental aims. What resources do the world's religious and secular traditions offer in support of these objectives? Which principles do these traditions hold in common, and how can these shared values help advance global goals? This book presents an in-depth and deeply engaged conversation among interfaith religious leaders and interdisciplinary scholars and practitioners in pursuit of an ethical consensus that could ground sustainable development efforts. Drawing on more than two years of close-knit discussions convened by Jeffrey D. Sachs and Marcelo Sánchez Sorondo, it offers an extensive and inclusive vision of how to promote human flourishing. The book features theological, philosophical, and ethical deliberations of great diversity and depth on the challenges of sustainable development, addressing questions of poverty, environmental justice, peace, conflict, and the future of work. It includes consensus statements on the moral imperatives of sustainable development, introductions to seven major religious traditions and their conceptions of the common good, and thematic reflections. Wide-ranging and urgent, this book represents a major contribution to interreligious dialogue and to the articulation of a shared global ethics. The book features a foreword by Pope Francis and Ecumenical Patriarch Bartholomew.

**Naturalism, Human Flourishing, and Asian Philosophy** Bongrae Seok, 2019-09-17 *Naturalism, Human Flourishing, and Asian Philosophy: Owen Flanagan and Beyond* is an edited volume of philosophical essays focusing on Owen Flanagan's naturalized comparative philosophy and moral psychology of human flourishing. Flanagan is a philosopher well-known for his naturalized approach to philosophical issues such as meaning, physicalism, causation, and consciousness in the analytic school of Western philosophy. Recently, he develops his philosophical interest in Asian philosophy and discusses diverse philosophical issues of human flourishing, Buddhism and Confucianism from comparative viewpoints. The current volume discusses his philosophy of human flourishing and his naturalized approaches to Buddhism and Confucianism. The volume consists of five sections with eleven chapters written by leading experts in the fields of philosophy, religion, and psychology. The first section is an introduction to Flanagan's philosophy. The introductory chapter provides a general overview of Flanagan's philosophy, i.e., his philosophy of naturalization, comparative approach to human flourishing, and detailed summaries of the following chapters. In the second section, the three chapters discuss Flanagan's naturalized eudaimonics of human flourishing. The third section discusses Flanagan's naturalized Buddhism. The fourth section analyzes Flanagan's interpretation of Confucian philosophy (specifically Mencius's moral sprouts), from the viewpoint of moral modularity and human flourishing. The fifth section is Flanagan's responses to the comments and criticisms developed in this volume.

**Human Success** Hugh Desmond, Grant Ramsey, 2023 What does it mean for our species--or for

any species--to be successful? **Human Success: Evolutionary Origins and Ethical Implications** examines the concept of human success from a variety of disciplinary perspectives, with contributions from leading paleobiologists, anthropologists, geologists, philosophers of science, and ethicists. It tells the tale of how the human species grew in success-linked metrics, such as population size and geographical range, and how it came to dominate ecological systems across the globe. It explores how culture, technology, and creativity have contributed to human success. However, there is a darker side of human success, as has become apparent in a world affected by climate change and the destruction of biodiversity. This leads us to ask whether the human species can really be called successful, and what our future success will look like in terms of our bodies, minds, morals, and our place in the universe. The essays in this book probe us to reflect on what has led to our apparent evolutionary success--and, most importantly, what this success implies for the future of our species.
