**Richard Preston**

**The Hot Zone** Richard Preston, 2012-12-31 COMING TO NATIONAL GEOGRAPHIC ON 27 MAY 2019 \_\_\_\_\_ In March 2014, the Ebola outbreak in West Africa was first reported. By October 2014, it had become the largest and deadliest occurrence of the disease. Over 4,500 people have died. Almost 10,000 cases have been reported, across Liberia, Guinea, Sierra Leone, Nigeria and the United States. Impossible to ignore, *The Hot Zone* is the terrifying, true-life account of when this highly infectious virus spread from the rainforests of Africa to the suburbs of Washington, D.C. in 1989. A secret SWAT team of soldiers and scientists were quickly tasked with halting the outbreak. And they did. But now, that very same virus is back. And we could be just one wrong move away from a pandemic.

**The Hot Zone** Richard Preston, 2012-03-14 The bestselling landmark account of the first emergence of the Ebola virus. Now a mini-series drama starring Julianna Margulies, Topher Grace, Liam Cunningham, James D'Arcy, and Noah Emmerich on National Geographic. A highly infectious, deadly virus from the central African rain forest suddenly appears in the suburbs of Washington, D.C. There is no cure. In a few days 90 percent of its victims are dead. A secret military SWAT team of soldiers and scientists is mobilized to stop the outbreak of this exotic hot virus. *The Hot Zone* tells this dramatic story, giving a hair-raising account of the appearance of rare and lethal viruses and their crashes into the human race. Shocking, frightening, and impossible to ignore, *The Hot Zone* proves that truth really is scarier than fiction.

**The Hot Zone** Richard Preston, 1995 Imagine a killer with the infectiousness of the common cold and power of the Black Death. Imagine something so deadly that it wipes out 90% of those it touches. Imagine an organism against which there is no defence. But you don't need to imagine. Such a killer exists: it is a virus and its name is Ebola. *The Hot Zone* tells what happens when the unthinkable becomes reality: when a deadly virus, from the rain forests of Africa, crosses continents and infects a monkey house ten miles from the White House. Ebola is that reality. It has the power to decimate the world's population. Try not to panic. It will be back. There is nothing you can do...

**The Demon in the Freezer** Richard Preston, 2003-08-26 "The bard of biological weapons captures the drama of the front lines."—Richard Danzig, former secretary of the navy The first major bioterror event in the United States—the anthrax attacks in October 2001—was a clarion call for scientists who work with "hot" agents to find ways of protecting civilian populations against biological weapons. In *The Demon in the Freezer*, his first nonfiction book since *The Hot Zone*, a #1 New York Times bestseller, Richard Preston takes us into the heart of Usamriid, the United States Army Medical Research Institute of Infectious Diseases at Fort Detrick, Maryland, once the headquarters of the U.S. biological weapons program and now the epicenter of national biodefense. Peter Jahrling, the top scientist at Usamriid, a wry virologist who cut his teeth on Ebola, one of the world's most lethal emerging viruses, has ORCON security clearance that gives him access to top secret information on bioweapons. His most urgent priority is to develop a drug that will take on smallpox—and win. Eradicated from the planet in 1979 in one of the great triumphs of modern science, the smallpox virus now resides, officially, in only two high-security freezers—at the Centers for Disease Control in Atlanta and in Siberia, at a Russian virology institute called Vector. But the demon in the freezer has been set loose. It is almost certain that illegal stocks are in the possession of hostile states, including Iraq and North Korea. Jahrling is haunted by the thought that biologists in secret labs are using genetic engineering to create a new superpox virus, a smallpox resistant to all vaccines. Usamriid went into a state of Delta Alert on September 11 and activated its emergency response teams when the first anthrax letters were opened in New York and Washington, D.C. Preston reports, in unprecedented detail, on the government's response to the attacks and takes us into the ongoing FBI investigation. His story is based on interviews with top-level FBI agents and with Dr. Steven Hatfill. Jahrling is leading a team of scientists doing controversial experiments with live smallpox virus at CDC. Preston takes us into the lab where Jahrling is reawakening smallpox and explains, with cool and devastating precision, what may be at stake if his last bold experiment fails.

**Crisis in the Red Zone** Richard Preston, 2020-04-03 NEW YORK TIMES BESTSELLER • An urgent wake-up call about the future of emerging viruses and a gripping account of the doctors and scientists fighting to protect us, told through the story of the deadly 2013–2014 Ebola epidemic "Crisis in the Red Zone reads like a thriller. That the story it tells is all true makes it all more terrifying."—Elizabeth Kolbert, Pulitzer Prize-winning author of *The Sixth Extinction* From the #1 bestselling author of *The Hot Zone*, now a National Geographic original miniseries . . . This time, Ebola started with a two-year-old child who likely had contact with a wild creature and whose entire family quickly fell ill and died. The ensuing global drama activated health professionals in North America, Europe, and Africa in a desperate race against time to contain the viral wildfire. By the end—as the virus mutated into its deadliest form, and spread farther and faster than ever before—30,000 people would be infected, and the dead would be spread across eight countries on three continents. In this taut and suspenseful medical drama, Richard Preston deeply chronicles the pandemic, in which we saw for the first time the specter of Ebola jumping continents, crossing the Atlantic, and infecting people in America. Rich in characters and conflict—physical, emotional, and ethical—*Crisis in the Red Zone* is an immersion in one of the great public health calamities of our time. Preston writes of doctors and nurses in the field putting their own lives on the line, of government bureaucrats and NGO administrators moving, often fitfully, to try to contain the outbreak, and of pharmaceutical companies racing to develop drugs to combat the virus. He also explores the charged ethical dilemma over who should and did receive the rare doses of an experimental treatment when they became available at the peak of the disaster. *Crisis in the Red Zone* makes clear that the outbreak of 2013–2014 is a harbinger of further, more severe outbreaks, and of emerging viruses heretofore unimagined—in any country, on any continent. In our ever more interconnected world, with roads and towns cut deep into the jungles of equatorial Africa, viruses both familiar and undiscovered are being unleashed into more densely populated areas than ever before. The more we discover about the virosphere, the more we realize its deadly potential. *Crisis in the Red Zone* is an exquisitely timely book, a stark warning of viral outbreaks to come.

**Panic in Level 4** Richard Preston, 2008-05-27 Bizarre illnesses and plagues that kill people in the most unspeakable ways. Obsessive and inspired efforts by scientists to solve mysteries and save lives. From *The Hot Zone* to *The Demon in the Freezer* and beyond, Richard Preston's bestselling works have mesmerized readers everywhere by showing them strange worlds of nature they never dreamed of. *Panic in Level 4* is a grand tour through the eerie and unforgettable universe of Richard Preston, filled with incredible characters and mysteries that refuse to leave one's mind. Here are dramatic true stories from this acclaimed and award-winning author, including: • The phenomenon of "self-cannibals," who suffer from a rare genetic condition caused by one wrong letter in their DNA that forces them to compulsively chew their own flesh—and why everyone may have a touch of this disease. • The search for the unknown host of Ebola virus, an organism hidden somewhere in African rain forests, where the disease finds its way into the human species, causing outbreaks of unparalleled horror. • The brilliant Russian brothers—"one mathematician divided between two bodies"—who built a supercomputer in their apartment from mail-order parts in an attempt to find hidden order in the number pi ( $\pi$ ). In fascinating, intimate, and exhilarating detail, Richard Preston portrays the frightening forces and constructive discoveries that are currently roiling and reordering our world, once again proving himself a master of the nonfiction narrative and, as noted in *The Washington Post*, "a science writer with an uncommon gift for turning complex biology into riveting page-turners."

**Inside the Hot Zone** Mark G. Kortepeter, 2020-01-01 *Inside the Hot Zone* 'is an insider's account of one of the most dangerous workplaces on earth: 'the United States Army Medical Research Institute of Infectious Diseases (USAMRIID) in Fort Detrick, Maryland. Retired U.S. Army Col. Mark G. Kortepeter, a leading biodefense expert, recounts his journey from the lecture hall to the

role of department chief, to the battlefield, to the Biosafety Level-4 maximum containment lab, and finally, to the corner office. During Kortepeter's seven and a half years in leadership at USAMRIID, the United States experienced some of the most serious threats in modern germ warfare, including the specter of biological weapons during the Iraq War, the anthrax letters sent after 9/11, and a little-known crisis involving a presumed botulism attack on the president of the United States. Inside the Hot Zone 'is a shocking, frightening eye-opener as Kortepeter describes in gripping detail how he and his USAMRIID colleagues navigated threats related to anthrax, botulism, smallpox, Lassa, and Ebola. Kortepeter crafts a rich and riveting narrative as he wrestles with life-and-death decisions managing biological weapon exposures. The stories are real, but they could just as easily serve as plotlines in popular fiction or Hollywood thrillers. He gives the reader a seat at the table as each 'crisis unfolds, with an unvarnished and personal perspective on the dangers, the drama, the fear, the frustrations, the irony, and the uncertainty he encountered as a physician in the role of Biodefender.'

**Crisis in the Red Zone** Richard Preston, 2019 The 2013-2014 Ebola epidemic was the deadliest ever. The ensuing global drama activated health professionals in North America, Europe, and Africa in a desperate race against time to contain the viral wildfire. **The Cobra Event** Richard Preston, 2007-04-10 The Cobra Event is set in motion one spring morning in New York City, when a seventeen-year-old student wakes up feeling vaguely ill. Hours later she is having violent seizures, blood is pouring out of her nose, and she has begun a hideous process of self-cannibalization. Soon, other gruesome deaths of a similar nature have been discovered, and the Centers for Disease Control sends a forensic pathologist to investigate. What she finds precipitates a federal crisis. The details of this story are fictional, but they are based on a scrupulously thorough inquiry into the history of biological weapons and their use by civilian and military terrorists. Richard Preston's sources include members of the FBI and the United States military, public health officials, intelligence officers in foreign governments, and scientists who have been involved in the testing of strategic bioweapons. The accounts of what they have seen and what they expect to happen are chilling. The Cobra Event is a dramatic, heart-stopping account of a very real threat, told with the skill and authority that made Preston's *The Hot Zone* an internationally acclaimed bestseller.

**Lab 257** Michael C. Carroll, 2009-10-13 Strictly off limits to the public, Plum Island is home to virginal beaches, cliffs, forests, ponds -- and the deadliest germs that have ever roamed the planet. Lab 257 blows the lid off the stunning true nature and checkered history of Plum Island. It shows that the seemingly bucolic island in the shadow of New York City is a ticking biological time bomb that none of us can safely ignore. Based on declassified government documents, in-depth interviews, and access to Plum Island itself, this is an eye-opening, suspenseful account of a federal government germ laboratory gone terribly wrong. For the first time, Lab 257 takes you deep inside this secret world and presents startling revelations on virus outbreaks, biological meltdowns, infected workers, the periodic flushing of contaminated raw sewage into area waters, and the insidious connections between Plum Island, Lyme disease, and the deadly West Nile virus. The book also probes what's in store for Plum Island's new owner, the Department of Homeland Security, in this age of bioterrorism. Lab 257 is a call to action for those concerned with protecting present and future generations from preventable biological catastrophes.

**Rabid** Bill Wasik, Monica Murphy, 2013-06-25 The most fatal virus known to science, rabies—a disease that spreads avidly from animals to humans—kills nearly one hundred percent of its victims once the infection takes root in the brain. In this critically acclaimed exploration, journalist Bill Wasik and veterinarian Monica Murphy chart four thousand years of the history, science, and cultural mythology of rabies. From Greek myths to zombie flicks, from the laboratory heroics of Louis Pasteur to the contemporary search for a lifesaving treatment, *Rabid* is a fresh and often wildly entertaining look at one of humankind's oldest and most fearsome foes. A searing narrative. -The New York Times In this keen and exceptionally well-written book, rife with surprises, narrative suspense and a steady flow of expansive insights, 'the world's most diabolical virus' conquers the unsuspecting reader's imaginative nervous system. . . . A smart, unsettling, and strangely stirring piece of work. -San Francisco Chronicle Fascinating. . . . Wasik and Murphy chronicle more than two millennia of myths and discoveries about rabies and the animals that transmit it, including dogs, bats and raccoons. -The Wall Street Journal

**The Hot Zone Reader's Companion**, 2016-05-12 *The Hot Zone* by Richard Preston | Digest & Review *The Hot Zone* is a novel written by Richard Preston that is based on the outbreak of the Ebola virus in the 1980s. It happened at a medical research facility that housed monkeys in Reston, Virginia. Author Richard Preston also writes about and recounts other viral outbreaks that have happened, specifically those that plagued Africa. It is packed with scientific and medical drama, and it is made all the more terrifying because it is based on true events. Best-selling horror author Stephen King described *The Hot Zone* as horrifying. People have called *The Hot Zone* a page-turner and said it is one of the best novels in the Popular Science genre. With this digest companion, you'll enjoy: \* A digest of the *The Hot Zone* \* Content for your book club or other group event. \* Stories beyond the digest and tidbits you may not know \* The book's impact and its important to read \* And more! What other readers are saying: You can read it before you read the novel or after you read it as a supplement to the actual book. Very concise and helpful for our Book Club. It is full of story information, interesting facts about the novel and the author as well. This overview gave me an idea of what the book covers. Our promise: Reader's Companions bring you immaculate study materials on literature at exceptionally low prices that do not compromise on quality. These are supplementary materials and does not contain any text or summary of the book. 100% satisfaction guaranteed.

**Ebola: The Natural and Human History of a Deadly Virus** David Quammen, 2014-10-20 "A frightening and fascinating masterpiece of science reporting that reads like a detective story." —Walter Isaacson In 1976 a deadly virus emerged from the Congo forest. As swiftly as it came, it disappeared, leaving no trace. Over the four decades since, Ebola has emerged sporadically, each time to devastating effect. It can kill up to 90 percent of its victims. In between these outbreaks, it is untraceable, hiding deep in the jungle. The search is on to find Ebola's elusive host animal. And until we find it, Ebola will continue to strike. Acclaimed science writer and explorer David Quammen first came near the virus while he was traveling in the jungles of Gabon, accompanied by local men whose village had been devastated by a recent outbreak. Here he tells the story of Ebola—its past, present, and its unknowable future. Extracted from *Spillover* by David Quammen, updated and with additional material.

**Scourge** Jonathan B. Tucker, 2002 A history of one of the world's deadliest diseases traces the influence of the smallpox plague on the course of human civilization, describes Jenner's creation of a vaccine against it and the World Health Organization's global efforts to eradicate it, and examines the dangers it still poses today as

**Microbe** Alan P. Zelicoff, Michael Bellomo, 2005 Whether a virus is unintentionally released via our modern transportation system, or deliberately by terrorists, even a small scale biological event could have a profound effect on our society. Yet our current public health system is completely unprepared to detect and respond quickly enough to avert a disease related crisis.

**Spillover: Animal Infections and the Next Human Pandemic** David Quammen, 2012-10 Examines the emergence and causes of new diseases all over the world, describing a process called “spillover” where illness originates in wild animals before being passed to humans and discusses the potential for the next huge pandemic. 70,000 first printing.

*Biohazard* Ken Alibek, Stephen Handelman, 2014-03-05 “Read and be amazed. . . . An important and fascinating look into a terrifying world of which we were blissfully unaware.”—Robin Cook, author of *Contagion* Anthrax. Smallpox. Incurable and horrifying Ebola-related fevers. For two decades, while a fearful world prepared for nuclear winter, an elite team of Russian bioweaponeers began to till a new killing field: a bleak tract sown with powerful seeds of mass destruction—by doctors who had committed themselves to creating a biological Armageddon. *Biohazard* is the never-before-told story of Russia’s darkest, deadliest, and most closely guarded Cold War secret. No one knows more about Russia’s astounding experiments with biowarfare than Ken Alibek. Now the mastermind behind Russia’s germ warfare effort reveals two decades of shocking breakthroughs . . . how Moscow’s leading scientists actually reengineered hazardous microbes to make them even more virulent . . . the secrets behind the discovery of an invisible, untraceable new class of biological agents just right for use in political assassinations . . . the startling story behind Russia’s attempt to turn a sample of the AIDS virus into the ultimate bioweapon. And in a chilling work of real-world intrigue, *Biohazard* offers us all a rare glimpse into a shadowy scientific underworld where doctors manufacture mass destruction, where witnesses to errors are silenced forever, and where ground zero is closer than we ever dared believe. Praise for *Biohazard* “Harrowing . . . richly descriptive . . . [an] absorbing account.”—The New York Times Book Review “Remarkable . . . terrifying revelations . . . [Ken Alibek’s] overall message is ignored at great national peril.”—Newsday

*Bitten* Pamela Nagami, 2005-09 We’ve all been bitten, and we all have stories. The bite attacks that Pamela Nagami has chosen to write about in this book take place all around the world, and throughout history. With reports from medical journals, case histories, colleagues, and her own career as a practicing physician and infectious disease specialist, the author offers readers intrigued by infection, disease, and mesmerized by creatures in the wild a compulsively readable narrative that is entertaining, sometimes disturbing, and always engrossing. -- Publisher description.

**Fevers, Feuds, and Diamonds** Paul Farmer, 2020-11-17 “Paul Farmer brings his considerable intellect, empathy, and expertise to bear in this powerful and deeply researched account of the Ebola outbreak that struck West Africa in 2014. It is hard to imagine a more timely or important book.” —Bill and Melinda Gates [The] history is as powerfully conveyed as it is tragic . . . Illuminating . . . Invaluable. —Steven Johnson, The New York Times Book Review In 2014, Sierra Leone, Liberia, and Guinea suffered the worst epidemic of Ebola in history. The brutal virus spread rapidly through a clinical desert where basic health-care facilities were few and far between. Causing severe loss of life and economic disruption, the Ebola crisis was a major tragedy of modern medicine. But why did it happen, and what can we learn from it? Paul Farmer, the internationally renowned doctor and anthropologist, experienced the Ebola outbreak firsthand—Partners in Health, the organization he founded, was among the international responders. In *Fevers, Feuds, and Diamonds*, he offers the first substantive account of this frightening, fast-moving episode and its implications. In vibrant prose, Farmer tells the harrowing stories of Ebola victims while showing why the medical response was slow and insufficient. Rebutting misleading claims about the origins of Ebola and why it spread so rapidly, he traces West Africa’s chronic health failures back to centuries of exploitation and injustice. Under formal colonial rule, disease containment was a priority but care was not - and the region’s health care woes worsened, with devastating consequences that Farmer traces up to the present. This thorough and hopeful narrative is a definitive work of reportage, history, and advocacy, and a crucial intervention in public-health discussions around the world.

*Virus Hunter* C.J. Peters, Mark Olshaker, 1998-04-13 A New York Times Notable Book The man who led the battle against Ebola in *The Hot Zone* teams up with the bestselling co-author of *Mind Hunter* to chronicle his extraordinary thirty-year career fighting deadly viruses. For three decades, Dr. C. J. Peters was on the front lines of our biological battle against “hot” viruses around the world. In the course of that career, he learned countless lessons about our interspecies turf wars with infectious agents. Called in to contain an outbreak of deadly hemorrhagic fever in Bolivia, he confronted the despair of trying to save a colleague who accidentally infected himself with an errant scalpel. Working in Level 4 labs on the Machupo and Ebola viruses, he saw time and again why expensive high-tech biohazard containment equipment is only as safe as the people who use it. Because of new, emerging viruses, and the return of old, “vanquished” ones for which vaccines do not exist, there remains a very real danger of a new epidemic that could, without proper surveillance and early intervention, spread worldwide virtually overnight. And the possibility of foreign countries or terrorist groups using deadly airborne viruses—the poor man’s nuclear arsenal—looms larger than ever. High-octane science writing at its best and most revealing, *Virus Hunter* is a thrilling first-person account of what it is like to be a warrior in the Hot Zone.
