Shelters, Shacks and Shanties Daniel Carter Beard, 2015-09-11 If my present reader happens to be a Boy Scout or a scout-master who wants the scouts to build a tower for exhibition purposes, he can do so by following the directions here given, but if there is real necessity for haste in the erection of this tower, of course we cannot build one as tall as we might where we have more time. With a small tower all the joints may be quickly lashed together with strong, heavy twine, rope, or even wire; and in the wilderness it will probably be necessary to bind the joints with pliable roots, or cordage made of bark or withes; but as this is not a book on woodcraft we will suppose that the reader has secured the proper material for fastening the joints of the frame of this signal-tower and he must now shoulder his axe and go to the woods in order to secure the necessary timber. First let him cut eight straight poles—that is, as straight as he can find them. These poles should be about four and one half inches in diameter at their base and sixteen and one half feet long. After all the branches are trimmed off the poles, cut four more sticks each nine feet long and two and a half or three inches in diameter at the base; when these are trimmed into shape one will need twenty six or seven more stout sticks each four and one half feet long for braces and for flooring for the platform.

The Book of Camp-Lore and Woodcraft Daniel Carter Beard, 2008 For Dan Beard, founder of the American Scouting movement, every scout worth his merit badge was expected to read this book, which includes instructions on how to build a fire, cook venison, prepare for a camping trip, use an axe and a saw, and more.

How to Survive Anything: From the Wilderness to Man Made Disasters Martin K. Ettington, I recently wrote a book titled “33 Incredible Real Life Survival Stories” which caused me to be amazed at how people have the persistence to live when confronted by dangerous and deadly situations. I'm an old student of survival. First in my experiences with the Boy Scouts, and then my experiences as an adult backpacker and general sports activities. There are other books out there by Special Forces operators and they prescribe lots of useful information. In this book I've included a lot of that type of survival information, but I also wanted to take a little different approach. The Boy Scouts have been part of my life since I was a kid. I was a Cub Scout, a Boy Scout. A scouting Eagle Scout, and later Scoutmaster, and Assistant Scoutmaster. Later on I also became a member of the Knoxville, Tennessee Volunteer Rescue Squad, and a Private Pilot among many other things. There is something to be said about the gradual acquiring of knowledge about survival and how it applies to how we live our lives. So I've taken that approach in this book—starting with morals, principles, and the spiritual aspects of survival, to the practical knowledge, and then how that information can be generalized to most situations. You can also bet that most military survival experts, Seals, and other Special Forces were probably Boy Scouts growing up too. Most of them got their basis for survival skills and leadership skills in the Boy Scouts. The Scout Motto is “Be Prepared” and planning ahead is essential for surviving unexpected situations. Therefore, in this book we will give you a lot of lists of things you should get as emergency supplies and what skills to know to survive. The things you will learn about in this book are much of what we learned in the Scouts but we will be taking a deeper cut into the details.
