The Development of Tertiary Education in the Eastern African Region Isabella M. Musyoka-Kamere, Daniel Namusonge Sifuna, Kisilu Kombo, 2023-11-16 This book gives a riveting account of the higher education advancements made in five East African countries, each presenting unique characteristics. While some of the countries enjoyed relative calm throughout their years of growth and development, others have endured a turbulent past marked by civil war, coups and other forms of unrest, including one of the most atrocious genocide events ever recorded in the history of mankind. It is a known fact that the past defines the present and describes the future. The book specifically tracks the historical development of teacher education, technical and vocational education and training, and university education in Kenya, Uganda, Tanzania, Rwanda and Burundi. The extensive research and up-to-date accounts provide a rich overview of tertiary education in the five countries, with candid reviews of the past, the current situation and perspectives on the future. The book is a refreshing addition to the books of history and education, and a must-read for students, professionals, and policy makers in the field of higher education, as well as scholars of history.

Oxford Textbook of Palliative Care for Children Richard Hain, Ann Goldman, Adam Rapoport, Michelle Meiring, 2021-07-27 The importance of palliative care for children facing life threatening illness and their families is now widely acknowledged as an essential part of care, which should be available to all children and families, throughout the child's illness and at the end of life. The new edition of the Oxford Textbook of Palliative Care for Children brings together the most up to date information, current knowledge, evidence, and developments of clinical practice in the field. The book is structured into four sections. 'Foundations of Care' describes core issues, the foundations on which paediatric palliative care is based. 'Child and Family Care' looks at different aspects of psychological, social, and cultural care for the sick child or young person, and their family. These chapters cover the time course of the illness, around the time of death and support for the bereaved family. 'Symptom Care' focuses on the uses of medication, specific symptoms, and their management. Finally, 'Delivery of Care' examines practical approaches to care in different environments and the needs of clinicians. Two new editors join the team from Canada and South Africa, reflecting our aims to contribute towards the development of care for children across the world, and to be a resource for both experienced clinicians and those new to the field. Comprehensive in scope, exhaustive in detail, and definitive in authority, this third edition has been thoroughly updated to cover new practices, current epidemiological data, and the evolving models that support the delivery of palliative medicine to children. This includes two new chapters, looking in detail at 'Decision Making' and 'Perinatal Care', and a new section highlighting the emerging importance of 'Palliative Care for Children in Humanitarian Crises'. This book is an essential resource for anyone who works with children worldwide.
