Raphael Patai

On Jewish Folklore Raphael Patai, 2018-02-05 On Jewish Folklore spans a half-century of scholarly inquiry by the noted anthropologist and biblical scholar Raphael Patai. He essays collected in this volume, some of which are presented for the first time in English translation, provide a rich harvest of Jewish customs and traditional beliefs, gathered from all over the world and from ancient to modern times. Among the subjects Dr. Patai investigated and recorded are the history and oral traditions of the now-vanished Marrano community of Meshhed, Iran; cultural change among the so-called Jewish Indians of Mexico; beliefs and customs in connection with birth, the rainbow, and the color blue; Jewish variants of the widespread custom of earth-eating; and the remarkable parallels between the rituals connected with enthroning a new king as described in the Bible and as practiced among certain African tribes.

Harris, 2019-09-02 Deeper than the ocean is a book of poetry diving into all the emotions of grief, love, and heart break. The book is divided into two chapters, before the death of a loved one and the life changing moments after. Emma tells her story beautifully, a story I believe a lot of people could relate to. And I believe reading something so relatable has a true healing essence to it.

TAPE SUCKS: Inside Data Domain, A Silicon Valley Growth Story Frank Sloodman, 2011-05-13

Silicon Valley has been birthing renegade technology companies for the better part of a century, a storied lineage that traces from Stanford's Fred Terman to the Varian brothers' Klystron amplifier, from the hallowed garage of Bill Hewlett and Dave Packard to the bold traitorous eight who fled Shockley Labs to form Fairchild Semiconductor. These companies, to be sure, broke new science and engineering ground-yet their most lasting legacy may well be their pioneering approach to business itself. They blazed a path that led to Intel, Apple, Oracle, Genentech, Gilead, Sun, Adobe, Cisco, Yahoo, eBay, Google, Salesforce, Facebook, Twitter, and many, many others. What causes a fledgling company to break through and prosper? At the highest level, the blueprint is always the same: An upstart team with outsized ambition somehow possesses an uncanny ability to surpass customer expectations, upend whole industries, and topple incumbents. But how do they do it? If only we could observe the behaviors of such a company from the inside. If only we were granted a first-person perspective at a present-day Silicon Valley startup-cum-blockbuster. What might we learn? This document-the story of Data Domain's rise from zero to one billion dollars in revenue-is your invitation to find out. For anyone curious about the process of new business formation, Tape Sucks offers a provocative, ripped-from-the-headlines case study. How does a new company bootstrap itself? What role does venture capital play? Why do customers and new recruits take a chance on a

risky new player? Frank Sloatman, who lived and breathed the Data Domain story for six years, offers up his clear-eyed, first-person shooter version of events. You're with him on the inside as he and his team navigate the tricky waters of launching a high-technology business. You'll feel deep in your gut-the looming threat of outside combatants and the array of challenges that make mere survival an accomplishment. You'll catch a glimpse of an adrenalin-fueled place where victories are visceral, communication wide open, and esprit de corps palpable. The upshot is that the principles of the early entrepreneurs of Silicon Valley are alive and well. Their straightforward ideas include employee-ownership, tolerance for failure, unfettered meritocracy, faith in the power of technology breakthroughs, a preference for handshakes and trust over contracts and lawsuits, pragmatism, egalitarianism, and a belief in the primacy of growth and reinvestment over dividends and outbound profits. Tape Sucks is an honest, informed perspective on technology wave riding. It allows you to observe a high-growth business at close range and get an unvarnished picture of how things really work.

Brenda's Beaver Needs a Barber Bimisi

Tayanita, Matt Williams, 2016-12-01 Sumguyen has always had a thick mane of hair, in the summer of 2016 he decided to grow a beard. Deep into month three he started to look like an armpit with eyeballs. It was a sultry August night in Old Town Scottsdale as Bimisi and Sumguyen made their way from one bar to another. They took pause to to enjoy the rhythms of a homeless crooner who was

soulfully picking his guitar. When Sumguyen threw a five into his tip jar the artist looked up, thanked him with a nod and said, That is a beautiful beard. My friend Brenda has a beard just like that, but hers doesn't talk. A fair amount of beer sprayed from Bimisi's nose...and just like that they had their subject matter for the final book of season one. Brenda's Beaver Needs a Barber is the fifth of five books that make up Reach Around Books Season One.

You know when to run, when to hide—and when to shoot. But some places don't play by the rules. Some places are too dangerous, even for a man of Kane's experience. The badlands where the borders of Pakistan, Iran, and Afghanistan meet are such a place—a place where violence is the only way to survive. Kane travels there to exfiltrate a man with vital information for the safety of the West—but instead he meets an adversary who will take the world to the brink of extinction. A frightening, clever, vicious man with blood on his hands and vengeance in his heart...
