**The Global Smartphone** Daniel Miller, Laila Abed Rabho, Patrick Awondo, Maya de Vries, Marília Duque, Pauline Garvey, Laura Haapio-Kirk, Charlotte Hawkins, Alfonso Otaegui, Shireen Walton, Xinyuan Wang, 2021-05-06 The smartphone is often literally right in front of our nose, so you would think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by older people. Their research reveals that smartphones are technology for everyone, not just for the young. The Global Smartphone presents a series of original perspectives deriving from this global and comparative research project. Smartphones have become as much a place within which we live as a device we use to provide 'perpetual opportunism', as they are always with us. The authors show how the smartphone is more than an 'app device' and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result, it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland – all alongside diverse trajectories of ageing in Al Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people's lives around the world.

*Daños, responsabilidad civil y seguros: desafíos actuales del derecho español y comparado* Inmaculada Vivas Tesón, Pedro Botello Hermosa, Carlos Antonio Agurto González, María Luisa Arcos Vieira, Leyre Elizari Urtasun, María Soledad de la Fuente Nuñez de Castro, Ma Fernanda Moretón Sanz, Ana María Pérez Vallejo, Ruperto Pinochet Olave, Isaac Ravetllat Ballesté, Nelson Rosenthal, Natalia Rueda, Blanca Sillero Croveto, Carlos Villagrasa Alcaide, 2022-03-31 En los últimos años, el Derecho de daños ha ido adquiriendo un papel cada vez más preponderante tanto en el ámbito doctrinal como, sobre todo, en el jurisprudencial Sin lugar a dudas, la responsabilidad civil se consagra, en pleno siglo XXI, como una de las materias más vivas y medulares del Derecho civil. Tan es así que, hoy día, constituye una disciplina jurídica con autonomía y entidad propias, cuyo tratamiento es, cada vez, más esmerado a la par que singularmente complejo, pues se halla en permanente mudanza como consecuencia de

la aparición de nuevas formas de dañar y de nuevos riesgos, de ahí su tendencia inevitablemente expansiva. Esta obra colectiva contiene numerosas reflexiones y respuestas prácticas acerca de los paradigmas actuales y futuros de la clásica institución aquiliana procedentes de prestigiosos especialistas en la materia pertenecientes a diversas Universidades de Brasil, Chile, Colombia, España y Perú, países de una misma familia jurídica pero con principios, criterios y soluciones no siempre concordantes, razón por la cual la visión comparada resulta sumamente enriquecedora y útil en nuestros días.

**Mapping of lithium-ion batteries for vehicles: A study of their fate in the Nordic countries** Dahllöf, Lisbeth,Romare, Mia,Wu, Alexandra,2019-10-24 The number of electric vehicles (cars, buses, e-bikes, electric scooters and electric motorcycles) sold in the Nordic countries is currently increasing quickly. That means that more electricity is used for driving, and also that more of some important metals are being used than earlier. This report regards the fate of the lithium-ion batteries used in vehicles in the Nordic countries. Currently the "Battery Directive" (EC, 2006) which is a producer's responsibility directive, is under revision and this study is a knowledge base intended for use by the Nordic Environmental Protection Agencies for their referral response in the revision process. This report focuses on the aspect of metal resources, but it does not elaborate on a broader range of environmental impacts, as these were outside the scope of this study.

**Garage** Olivia Erlanger,Luis Ortega Govela,2019-07-02 A secret history of the garage as a space of creativity, from its invention by Frank Lloyd Wright to its use by start-ups and garage bands. Frank Lloyd Wright invented the garage when he moved the automobile out of the stable into a room of its own. Steve Jobs and Steve Wozniak (allegedly) started Apple Computer in a garage. Suburban men turned garages into man caves to escape from family life. Nirvana and No Doubt played their first chords as garage bands. What began as an architectural construct became a cultural construct. In this provocative history and deconstruction of an American icon, Olivia Erlanger and Luis Ortega Govela use the garage as a lens through which to view the advent of suburbia, the myth of the perfect family, and the degradation of the American dream. The stories of what happened in these garages became self-fulfilling prophecies the more they were repeated. Hewlett-Packard was founded in a garage that now bears a plaque: The Birthplace of Silicon Valley. Google followed suit, dreamed up in a Menlo Park garage a few decades later. Also conceived in a garage: the toy company Mattel, creator of Barbie, the postwar, posthuman representation of American women. Garages became guest rooms, game rooms, home gyms, wine cellars, and secret bondage lairs, a no-commute destination for makers and DIYers—surfboard designers, ski makers, pet keepers, flannel-wearing musicians, weed-growing nuns. The garage was an aboveground underground, offering both a safe space for withdrawal and a stage for participation—opportunities for isolation or empowerment.
