The Pulse Cure Torkil Færø, 2024-01-04 'Groundbreaking... bridges the gap between cutting-edge science and practical well-being. A must-read for anyone seeking to improve their resilience, reduce inflammation and embrace a healthier future.' Dr Jenna Macciochi, author of *Immunity: The Science of Staying Well* What if you could see the toll that over-work, too much sugar or bad sleep really take on your system? What if you knew what boosts your energy, and what saps it, and when you are heading for burnout? What if you could feel more vitality and joy, have stronger will power and live longer? With the aid of your phone, smartwatch or a wearable heart rate monitor and *The Pulse Cure*, you can. The key lies in measuring your heart rate variability - the distance between your heart beats - which indicates what is happening in your autonomic nervous system. Tuning into your heart rate variability can show you how your personal constitution reacts to specific stressors and help you tailor what you need to do to recharge. Whether you are healthy but want to take a proactive approach to your health, or exhausted and want your energy back, Dr Færø's clear, upbeat guidance will help you to: · improve your sleep · discover the right type and level of exercise for you · find the best way for you to relax and find calm · spot early signs of illness and disease · fight burnout and chronic fatigue · avoid inflammation in the body. Start a conversation with your body. It might have surprising things to tell you!

The Role of Digital Health Technologies in Drug Development National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, Roundtable on Genomics and Precision Health, Forum on Drug Discovery, Development, and Translation, 2020-11-28 On

March 24, 2020, a 1-day public workshop titled The Role of Digital Health Technologies in Drug Development was convened by the National Academies of Sciences, Engineering, and Medicine. This workshop builds on prior efforts to explore how virtual clinical trials facilitated by digital health technologies (DHTs) might change the landscape of drug development. To explore the challenges and opportunities in using DHTs for improving the probability of success in drug R&D, enabling better patient care, and improving precision medicine, the workshop featured presentations and panel discussions on the integration of DHTs across all phases of drug development. Throughout the workshop, participants considered how DHTs could be applied to achieve the greatest impact—and perhaps even change the face of how clinical trials are conducted—in ways that are also ethical, equitable, safe, and effective. This publication summarizes the presentations and discussions from the workshop.

*Exprovement* R.A. Mashelkar, Harsh Haladker, 2023-04-24 Can an outdated or failed solution in one industry bring disruption to another? Can a racing team improve industrial manufacturing productivity? Can science fiction offer entrepreneurs valuable lessons in innovative thinking? Such examples lie at the core of *exprovement*, which is an exponential improvement borne out of drawing parallels between the seemingly unrelated. Henry Ford revolutionized the automotive industry by comparing and correlating his business with the meat-packing industry. Through the various examples highlighted in this book, Hersh Haladker and Raghunath Mashelkar emphasize that searching for growth opportunities within an offering's existing industry usually results in incremental improvement, whereas exponential improvement can be achieved by drawing parallels from outside of the current context. This book will inspire

leaders to look outward for parallels, keeping in mind that 'obvious' comparisons can at best lead to improvement, whereas 'unexpected' ones can lead to exponential improvement and perpetuate a legacy of innovation.

*Artificial Intelligence and Machine Learning* Rohit Tanwar, Surbhi Bhatia, Varun Sapra, Neelu Jyoti Ahuja, 2023-12-07 Offers a broad package involving the Incubation of Machine Learning and AI with various emerging technologies such as IoT, Healthcare, Smart Cities, Robotics, etc. Discusses various data collection and data transformation techniques. Maps the legal and ethical issues of data-driven e-healthcare systems and possible ways to resolve them. Explores different techniques on how AI can be used to create better virtual reality experiences. Deals with the techniques and possible ways to merge the power of AI and IoT to create smart home appliances

**Smartphone Apps for Health and Wellness** John P. Higgins, Mathew P. Morico, 2023-01-06 Smartphone Apps for Health and Wellness helps readers navigate the world of smartphone apps to direct them to those which have had the best medical evidence in obtaining the users' goal. The book covers the history of apps, how they work, and specific apps to improve health and wellness in order to improve patients outcomes. It discusses several types of apps, including apps for medical care, sleeping, relaxation, nutrition, exercise and weight loss. In addition, sections present the features of a good app to empower readers to make their own decision when evaluating which one to use. This is a valuable resource for clinicians, physicians, researchers and members of biomedical field who are interested in taking advantage of smartphone apps to improve overall health and wellness of patients. Summarizes smartphone apps with the best evidence to improve health and wellness Discusses the most important features of an app to help readers

evaluate which app is appropriate for their specific needs Presents the typical results expected when regularly using an app in order to assist healthcare providers in predicting patient outcomes

**Brainstorms and Mindfarts** Tom Connor, Jim Downey, 2021-05-04 This informative and occasionally bizarre collection of American inventions will help you discover successful and significant ideas—along with the frivolous and utterly useless ones lost to history. Innovation and entrepreneurism appear inextricably woven into the American DNA. Throughout American history, the great inventors and innovators gazed into the future and saw the products and services that would transform the world. While passionate about creating this new thing called a democracy, our Founding Fathers were also driven to change the way humans lived and worked—to complete everyday tasks faster, easier, and more efficiently. As of 2018, the U.S. Patent & Trademark Office had granted its ten millionth patent. But with over 500,000 applications now being filed annually, fewer than half of these applicants will be granted patents and far fewer still—an estimated one percent—will realize commercial success, according to the Office. Some are flawed by mistakes or missing details, others too ridiculous to take seriously, still others simply ahead of their time. From the brightest and most innovative to the wackiest, most bizarre, and downright crazy, this collection of 100 patents includes funny and informative descriptions and original illustrations, all the while letting you in on what most successful patents have in common, what inspired their creators, and how great inventors view the world.

Biosensors in Precision Medicine Laís Canniatti Brazaca, Juliane Renata Sempionatto, 2024-02-13 Biosensors in Precision Medicine: From Fundamentals to Future Trends covers important topics regarding biomarkers, including

biomarker discovery, validation, application in precision medicine, the principles of biosensors, their use in precision medicine, important analytical parameters, recent advances in bioreceptors and transduction, and more. Finally, the hottest trends of biosensors in precision medicine, including lab-on-a-chip and wearable devices, advances towards telemedicine, machine learning, artificial intelligence and the commerciality of these devices are discussed. Provides a timely review of the state-of-the-art developments in biosensors and their applications in precision medicine  
Presents an evaluation of case studies, along with real-life examples  
Addresses recent trends on biosensors for precision medicine

*Digital Transformation in Healthcare 5.0* Rishabha Malviya, Sonali Sundram, Rajesh Kumar Dhanaraj, Seifedine Kadry, 2024-05-06  
Digital Transformation in Healthcare 5.0: IoT, AI, and Digital Twin provides a comprehensive overview of the integration of cutting-edge technology with healthcare, from the Fourth Industrial Revolution (4IR) to the introduction of IoT, AI, and Digital Twin technologies. This in-depth discussion of the digital revolution expanding the healthcare industry covers a wide range of topics, including digital disruption in healthcare delivery, the impact of 4IR and Health 4.0, e-health services and applications, virtual reality's impact on accessible healthcare delivery, digital twins and dietary health technologies, big data analytics in healthcare systems, machine learning models for cost-effective healthcare delivery systems, affordable healthcare with machine learning, enhanced biomedical signal processing with machine learning, and data-driven AI for information retrieval of biomedical images.

*The Ultimate Nutrition Bible* Matt Gallant, Wade T. Lighthouse, 2023-09-26  
End the war with your diet by creating an optimized nutrition plan based on your

goals, your genes, and your personal needs. Do you feel overwhelmed by the barrage of diet-related marketing and advertising? Have you gone keto then vegetarian then vegan and still felt lost as to what makes a diet sustainable? Are you part of the 97 percent of people who have failed to lose weight long term? Matt Gallant and Wade T. Lighthearth, founders of BIOptimizers, are here to help you identify the factors that will bring you lasting results by helping you create a nutritional strategy that works for you. This all-in-one, comprehensive guide to the current diet and nutritional landscape will help you establish a personalized sustainable dietary strategy based on your goals, genetics, and unique needs. Matt Gallant and Wade Lighthearth, founders of BiOptimizers, provide the data, proven strategies, and hard-earned insights so that you can: Gain clarity about nutrition and dieting Lose weight in a healthy way and keep it off for life Tailor a wide variety of nutritional strategies to be effective for you Eat for maximum athletic and mental performance Optimize your nutrition to maximize your life span In the end, the only person that matters is you, and you deserve all the tools you need for the life you want to live.

**Integral Investing** Mariana Bozesan, 2020-10-09 Today, early-stage investors and entrepreneurs find themselves in a dilemma in which they must choose between profit and impact; between traditional, for-profit-only models on the one hand, and multiple-bottom-line structures with a positive social or environmental impact on the other. At a time in which climate change, exponentially growing technologies, social polarization, and looming pandemics are calling into question humanity's priorities, this Report to the Club of Rome and the World Academy of Art and Science dissolves this dilemma by proposing a new investment paradigm, namely Integral Investing. Integral

Investing incorporates and transcends the best practices of both traditional venture capital and impact investing. It provides a seamless integration and shows how technological progress need not be our rival, but can instead be our ally in ensuring the prosperous society we all want. Drawing on her own investments and stellar track record since 1995, the author reveals the mechanism of Integral Investing. At the heart of it is a powerful, 360-degree de-risking tool called the Theta Model, which reveals how to make smart investment decisions based on the comprehensive integration of traditional due-diligence criteria, sustainability metrics, and assessments of the founders' and team culture. But it doesn't stop there. In turn, this handbook demonstrates how to use human-centered AI to scale and digitalize the investment process. The goal here is to accelerate the use of exponential tech, capital, and consciousness leadership to transition to a sustainable global society: a process the author refers to as the Investment Turnaround. The 21 principles of Integral Investing, which she defines using Ken Wilber's Integral Theory, lead to her manifesto on how to implement the UN Sustainable Development Goals within Planetary Boundaries by 2050 through early-stage investing and entrepreneurship. Similar to the 15th century, when the Medicis inspired the Renaissance, today humanity is once again at a crucial turning point where pioneering public and private financiers, investors, entrepreneurs, and other committed individuals have the opportunity to leave behind the legacy of a prosperous society. This handbook provides a source of inspiration, and shows how self-actualization, a positive mindset, and a consciousness that is backed by a world-centric desire can become the driving force for solving the global grand challenges.

**Deadly Biocultures** Nadine Ehlers, Shiloh Krupar, 2019-12-17 A trenchant

analysis of the dark side of regulatory life-making today In their seemingly relentless pursuit of life, do contemporary U.S. “biocultures”—where biomedicine extends beyond the formal institutions of the clinic, hospital, and lab to everyday cultural practices—also engage in a deadly endeavor? Challenging us to question their implications, *Deadly Biocultures* shows that efforts to “make live” are accompanied by the twin operation of “let die”: they validate and enhance lives seen as economically viable, self-sustaining, productive, and oriented toward the future and optimism while reinforcing inequitable distributions of life based on race, class, gender, and dis/ability. Affirming life can obscure death, create deadly conditions, and even kill. *Deadly Biocultures* examines the affirmation to hope, target, thrive, secure, and green in the respective biocultures of cancer, race-based health, fatness, aging, and the afterlife. Its chapters focus on specific practices, technologies, or techniques that ostensibly affirm life and suggest life’s inextricable links to capital but that also engender a politics of death and erasure. The authors ultimately ask: what alternative social forms and individual practices might be mapped onto or intersect with biomedicine for more equitable biofutures?

**Competing in the Age of AI** Marco Iansiti, Karim R. Lakhani, 2020-01-07 a provocative new book – The New York Times AI-centric organizations exhibit a new operating architecture, redefining how they create, capture, share, and deliver value. Now with a new preface that explores how the coronavirus crisis compelled organizations such as Massachusetts General Hospital, Verizon, and IKEA to transform themselves with remarkable speed, Marco Iansiti and Karim R. Lakhani show how reinventing the firm around data, analytics, and AI removes traditional constraints on scale, scope, and

learning that have restricted business growth for hundreds of years. From Airbnb to Ant Financial, Microsoft to Amazon, research shows how AI-driven processes are vastly more scalable than traditional processes, allow massive scope increase, enabling companies to straddle industry boundaries, and create powerful opportunities for learning—to drive ever more accurate, complex, and sophisticated predictions. When traditional operating constraints are removed, strategy becomes a whole new game, one whose rules and likely outcomes this book will make clear. Iansiti and Lakhani: Present a framework for rethinking business and operating models Explain how collisions between AI-driven/digital and traditional/analog firms are reshaping competition, altering the structure of our economy, and forcing traditional companies to rearchitect their operating models Explain the opportunities and risks created by digital firms Describe the new challenges and responsibilities for the leaders of both digital and traditional firms Packed with examples—including many from the most powerful and innovative global, AI-driven competitors—and based on research in hundreds of firms across many sectors, this is your essential guide for rethinking how your firm competes and operates in the era of AI.

**Cheating Death** Dr. Rand McClain, 2023-03-07 For the first time outside his private clinic, medical practitioner and pioneer Dr. Rand McClain shares what you can start doing today to increase longevity and better your health—at home or at your doctor’s office. In this golden age of medical discovery, cutting-edge treatments are emerging that increase longevity, stave off disease, and enhance our appearance and quality of life—our “healthspan.” But chances are, these advances are not readily available at most doctor’s offices, in stores, or easy to find online. Dr. Rand McClain takes a fresh

approach to genetics, natural aging, and proactive medical treatments. He is the founder and head of the renowned Regenerative and Sports Medicine Clinic in Santa Monica, a leading practitioner of alternative and cutting-edge treatments. In *Cheating Death*, McClain shares the best drugs and supplements, treatment methods, and devices—approaches that are backed by extensive research as well as Dr. McClain’s own work with his patients—including: Little-known treatments that can reverse the effects of new and old injuries Emergent diagnostic and screening technologies that detect early onset disease sooner Breakthrough methods (some DIY) to slow down or reverse aging in the body Steps you can take now to enhance gene expression and side-step your “sins of the past” and poor family genetics Best of all, McClain shows how you can get access to these therapies and jumpstart your body’s regenerative processes—everything from stabilizing mood swings, relieving depression and anxiety, extending hormone balance and sexual function, improving muscle strength and stamina, relieving debilitating pain, and restoring a youthful appearance. Bolstered with research and recovery stories from real people, *Cheating Death* gives readers the tools to live healthier, longer lives.

**Emerging Nanotechnologies for Medical Applications** Nabeel Ahmad, Gopinath Packirisamy, 2023-02-07 *Emerging Nanotechnologies for Medical Applications* focuses on both commercial and premarket tools and their applications in medicine. The book develops the concept of integrating different technologies along a hierarchical structure of biological systems and clarifies biomechanical interactions on different levels for the analysis of multiscale pathophysiological phenomena. With a focus on nano-scale processes and biomedical applications, it demonstrates how knowledge can be utilized in a

range of areas, including the diagnosis and treatment of various human diseases, and in alternative energy production. This book is an important reference source for scientists and researchers involved in micro- and nano-engineering, bio-nanotechnology, biomedical engineering, nanomedicine, and industries involved with optical devices, computer simulation and pharmaceuticals. Shows how nanotechnology is being used to improve outcomes in areas of cancer, tissue grafting, and printing drugs Explores a variety of nanoengineering techniques used for biomedical applications, including for cardiovascular, renal and dental treatments Assesses the major challenges of manufacturing nanomaterials-based medicines on an industrial scale

*Community and Public Health Education Methods* Robert J. Bensley, Jodi Brookins-Fisher, 2023-11-30 Updated to keep pace with this ever-evolving field, the fifth edition of *Community and Public Health Education Methods: A Practical Guide* teaches students to effectively communicate health education messages and positively influence the norms and behaviors of both individuals and communities. Written by and for health education specialists, this text explores the methods used by health educators, including didactic techniques designed to guide others toward the pursuit of a healthy lifestyle. Divided into four sections, this well-organized guide begins with a focus on building the foundation for selecting and applying community and public health education methods. It then explores acquiring tools necessary for applying community and public health education and health promotion strategies. Section III examines health communication and media, including exploring social marketing concepts, applying health communication skills, using social media, and exploring digital media strategies.

**The Role of Digital Technologies in Shaping the Post-Pandemic World** Savvas Papagiannidis, Eleftherios Alamanos, Suraksha Gupta, Yogesh K. Dwivedi, Matti Mäntymäki, Ilias O. Pappas, 2022-09-06 This book constitutes the refereed proceedings of the 21st IFIP WG 6.11 Conference on e-Business, e-Services, and e-Society, I3E 2022, which took place Newcastle-upon-Tyne, UK, in September 2022. The 37 papers presented in this volume were carefully reviewed and selected from 72 submissions. They were organized in topical sections as follows: Artificial intelligence; Data and Analytics; Careers and ICT; Digital Innovation and Transformation; Electronic Services; Health and Wellbeing; Pandemic; Privacy, Trust and Security.

**Quantifying Quality of Life** Katarzyna Wac, Sharon Wulfovich, 2022 Describes technological methods and tools for objective and quantitative assessment of

QoL Appraises technology-enabled methods for incorporating QoL measurements in medicine Highlights the success factors for adoption and scaling of technology-enabled methods This open access book presents the rise of technology-enabled methods and tools for objective, quantitative assessment of Quality of Life (QoL), while following the WHOQOL model. It is an in-depth resource describing and examining state-of-the-art, minimally obtrusive, ubiquitous technologies. Highlighting the required factors for adoption and scaling of technology-enabled methods and tools for QoL assessment, it also describes how these technologies can be leveraged for behavior change, disease prevention, health management and long-term QoL enhancement in populations at large. Quantifying Quality of Life: Incorporating Daily Life into Medicine fills a gap in the field of QoL by providing assessment methods, techniques and tools. These assessments differ from the current methods that are now mostly infrequent, subjective, qualitative, memory-based, context-poor and sparse. Therefore, it is an ideal resource for physicians, physicians in training, software and hardware developers, computer scientists, data scientists, behavioural scientists, entrepreneurs, healthcare leaders and administrators who are seeking an up-to-date resource on this subject.

**Wearables in Healthcare** Paolo Perego, Nima TaheriNejad, Maurizio Caon, 2021-05-04 This book constitutes the refereed post-conference proceedings of the Second EAI International Conference on Wearables in Healthcare, HealthWear 2020. Due to COVID-19 pandemic the conference was held virtually. The 16 revised full papers were carefully reviewed and selected from 40 submissions. They focus on wearable devices and systems for healthcare and wellbeing. The papers are organized in topical sections as

follows: PPG and algorithms focusing on photoplethysmography, PPG monitoring and cardiorespiratory measurement. The next section focus on IoT and smart sensors on the use of wearable devices and systems for Internet of Medical Things application. The third section is a new session introducing wearable applications. This track focuses on the intrinsic multidisciplinary of wearable devices, and includes works on methodology and design aspect of wearable research.
