Comparative Law Uwe Kischel, 2019-02-21 Uwe Kischel's comprehensive treatise on comparative law offers a critical introduction to the central tenets of comparative legal scholarship. The first part of the book is dedicated to general aspects of comparative law. The controversial question of methods, in particular, is addressed by explaining and discussing different approaches, and by developing a contextual approach that seeks to engage with real-world issues and takes a practical perspective on contemporary comparative legal scholarship. The second part of the book offers a detailed treatment of the major legal contexts across the globe, including common law, civil law systems (based on Germany and France, and extended to Eastern Europe, Scandinavia, and Latin America, among others), the African context (with an emphasis on customary law), different contexts in Asia, Islamic law and law in Islamic countries (plus a brief treatment of Jewish law and canon law), and transnational contexts (public international law, European Union law, and *lex mercatoria*). The book offers a coherent treatment of global legal systems that aims not only to describe their varying norms and legal institutions but to propose a better way of seeking to understand how the overall context of legal systems influences legal thinking and legal practice.

Transnational Commercial Law: International Instruments and Commentary

Roy Goode, Herbert Kronke, Ewan McKendrick, Jeffrey Wool, 2012-03-29 Transnational commercial law represents the outcome of work undertaken to harmonize national laws affecting domestic and cross-border transactions and is upheld by a diverse spectrum of instruments. Now in its second edition, this authoritative work brings together the major instruments in this field, dividing them into thirteen groups: Treaty Law, Contracts, Electronic Commerce, International Sales, Agency and Distribution, International Credit Transfers and Bank Payment Undertakings, International Secured Transactions, Cross-Border Insolvency, Securities Custody, Clearing and Settlement and Securities Collateral, Conflict of Laws, Civil Procedure, Commercial Arbitration, and a new section on Carriage of Goods. Each group of instruments is preceded by linking text which provides important context by identifying the key instruments in each group, discussing their purposes and relationships, and explaining the major provisions of each instrument, thus setting them in their commercial context. This volume is unique in providing the full text of international conventions, including the preamble - which is important for interpretation - and the final clauses and any annexes. In addition, each instrument is accompanied by a complete list of dates of signature and ratification by all contracting states, all easily navigated through the detailed tables of contents which precedes it. This fully-indexed work provides an indispensable guide for the practitioner or academic to the primary transnational commercial law instruments.

Commercial Law M. A. Clarke, R. J. A. Hooley, R. J. C. Munday, L. S. Sealy, A. M. Tettenborn, P. G. Turner, 2017 Commercial Law: Text, Cases, and Materials provides students with an extensive and valuable range of extracts from key cases and writings in this most dynamic field of law. The authors' expert commentary and questions enliven each topic while emphasizing the practical application of the law in its business context. Len Sealy and Richard Hooley have been joined by four renowned experts in the field for the preparation of this edition. The authors have captured the essence of this fascinating topic at a time of significant legislative, regulatory, and political change.

Getting to Yes Roger Fisher, William Ury, Bruce Patton, 1991 Describes a method of negotiation that isolates problems, focuses on interests, creates new options, and uses

objective criteria to help two parties reach an agreement.

Homo Sociologicus Ralf Dahrendorf, 2022-02-09 First published in English as part of the *Essays in the Theory of Society*, this volume reissues the stand-alone *Homo Sociologicus* for which the author wrote a new introduction when it was originally published in 1973. The controversial book deals with the history, significance and limits of the category of social role and discusses the dilemma posed by *homo sociologicus*. The author shows that for society and sociology, socialization invariably means depersonalization, the yielding up of man's absolute individuality and liberty to the constraint and generality of social roles. This volume includes the essay, *Sociology and Human Nature*, written as a postscript to *Homo Sociologicus*.

International Environmental Law Ulrich Beyerlin, Thilo Marauhn, 2011-08-11 *International Environmental Law* is a new textbook written for students, practitioners, and anyone interested in the subject. The overall aim of the book is to provide a fresh understanding of international environmental law as a whole, seen in the light of climate change, biodiversity loss, and the other serious environmental challenges facing the world. The book has also been kept deliberately manageable in size by careful selection of topics and by adopting a cross-cutting synthesis of regulatory interaction in the field. This enables the reader to place international environmental law in the broader context of public international law in general, revealing at the same time that international environmental law is experimental ground for developing new legal approaches towards global governance. To this end, the authors have combined theory and practice. Apart from discussing concepts, rule-making and compliance, the book looks at options for improved coordination, harmonisation and even integration of existing multilateral environmental agreements, analysing how conflicts between various environmental regimes can be avoided or, at least, adequately managed. The authors argue that an appropriate management of international environmental relations must address the North-South divide, which continues to be a major obstacle to global environmental cooperation. Furthermore, the authors emphasise the growing human rights dimension of international environmental law. This book is an ideal 'door opener' for the further study of international environmental law. Focusing on 'international environmental governance' in a comprehensive way, it serves to explain that each institution, each actor, and each instrument is part of a multi-dimensional process in international environmental law and relations.

Testamentary Formalities Kenneth G. C. Reid, Marius Johannes De Waal, Reinhard Zimmermann, 2011 Launching a major new research project examining the principles of succession law in comparative perspective, this volume analyses the formalities imposed by the law on making a will across a wide range of European and international jurisdictions.

Recueil Des Cours/Collected Courses of the Hague Academy of International Law, 1993-04-02 The Academy is an institution for the study and teaching of public and private international law and related subjects. Its purpose is to encourage a thorough and impartial examination of the problems arising from international relations in the field of law. The courses deal with the theoretical and practical aspects of the subject, including legislation and case law. All courses at the Academy are, in principle, published in the language in which they were delivered in the *Collected Courses of the Hague Academy of International Law*. This volume contains: - *General Course of Private International Law* by F. VISCHER, Professor at the University of Basel; - *Les conséquences de l'intégration européenne sur le développement du droit international privé*, par A.V.M. STRUYCKEN, professeur; à l'Université catholique de Nijmegen.

Law in Modern Society Roberto Mangabeira Unger, 1977-07 *Law in Modern Society* is

a comparative study of the place of law in societies as well as a criticism of social theory. Under what conditions do different kinds of law emerge? What are the bases of the rule of law ideal that marks advanced liberal, capitalist societies? What can the study of law teach us about social hierarchy and moral vision in these societies, and, indeed, about the specificity of Western civilization? Why do we find it necessary to struggle for the rule of law and impossible to achieve it? What political possibilities are closed or opened by present-day changes in the established styles of legality and legal thought? Unger deals with these questions in a broad range of historical settings. But he also relates them to the central issues of social theory: the method of explanation, the conditions of social order, and the nature of 'modern' society. the book argues that to resolve its own internal dilemmas the science of society must once again become both metaphysical and political.

The Expulsion of the Other Byung-Chul Han, 2018-01-08 The days of the Other are over in this age of excessive communication, information and consumption. What used to be the Other, be it as friend, as Eros or as hell, is now indistinguishable from the self in our narcissistic desire to assimilate everything and everyone until there are no boundaries left. The result is a 'terror of the Same', lives in which we no longer pursue knowledge, insight and experience but are instead reduced to the echo chambers and illusory encounters offered by social media. In extreme cases, this feeling of disorientation and senselessness is compensated through self-harm, or even harming others through acts of terrorism. Byung-Chul Han argues that our times are characterized not by external repression but by an internal depression, whereby the destructive pressure comes not from the Other but from the self. It is only by returning to a society of listeners and lovers, by acknowledging and desiring the Other, that we can seek to overcome the isolation and suffering caused by this crushing process of total assimilation.

An Introduction to Bankruptcy Law Martin A. Frey, Warren L. McConnico, Phyllis Hurley Frey, 1992

Adenauer's Germany and the Nazi Past Norbert Frei, 2002-08-27 Of all the aspects of recovery in postwar Germany perhaps none was as critical or as complicated as the matter of dealing with Nazi criminals, and, more broadly, with the Nazi past. While on the international stage German officials spoke with contrition of their nation's burden of guilt, at home questions of responsibility and retribution were not so clear. In this masterful examination of Germany under Adenauer, Norbert Frei shows that, beginning in 1949, the West German government dramatically reversed the denazification policies of the immediate postwar period and initiated a new *Vergangenheitspolitik*, or policy for the past, which has had enormous consequences reaching into the present. Adenauer's Germany and the Nazi Past chronicles how amnesty laws for Nazi officials were passed unanimously and civil servants who had been dismissed in 1945 were reinstated liberally—and how a massive popular outcry led to the release of war criminals who had been condemned by the Allies. These measures and movements represented more than just the rehabilitation of particular individuals. Frei argues that the amnesty process delegitimized the previous political expurgation administered by the Allies and, on a deeper level, served to satisfy the collective psychic needs of a society longing for a clean break with the unparalleled political and moral catastrophe it had undergone in the 1940s. Thus the era of Adenauer devolved into a scandal-ridden period of reintegration at any cost. Frei's work brilliantly and chillingly explores how the collective will of the German people, expressed through mass allegiance to new consensus-oriented democratic parties, cast off responsibility for the horrors of the war and Holocaust, effectively silencing engagement with the enormities of the Nazi past.
