Boy Scouts of America Wilderness First Aid Manual Buck Tilton,2010 Recognizing the lack of a national standard for wilderness first aid, The Boy Scouts of America formed a Task Force consisting of wilderness medicine specialists, medical epidemiologists, legal expertise, and educators to develop a curriculum and doctrine for a 16 hour wilderness first aid (WFA) course. Buck Tilton was the lead author of this project. As author he had to amalgamate the results of the literature research performed by the Task Force and through multiple revisions until this final product was developed. The Task Force is indebted to Buck for his hours of dedication to the project. Persons taking this course will have an appreciation of how wilderness first aid differs from standard, urban fist aid. Many readers will want to learn more about this fascinating and critical skill needed by all outdoor travelers. Some will be inspired to continue their education with a wilderness first responder course. This book contains the full doctrine that the Task Force approved. It provides a portable resource for use in the field as well as a text for the WFA course. It will be your introduction to the basic skills and knowledge all wilderness travelers should possess.

Principal Emergency Response and Preparedness

Occupational Safety and Health Administration, 2008 Anticipating and planning your organization's response to an emergency situation isn't just a good idea: it's a federal requirement. Since 1989, OSHA has issued numerous standards that explicitly require employers to have emergency action plans for their workplaces and dozens more regulating specific materials and processes that affect the health and safety of employees. This book makes the task of identifying and understanding OSHA's emergency response requirements virtually effortless by compiling and summarizing the most relevant requirements--53 general and 95 industry-specific--found in Code of Federal Regulations (CFR) Title 29 Parts 1910, 1915, 1917, 1918, 1926, and 1928. Originally published in 2004, this book continues to provide timely and relevant guidance for general industry, shipyards, marine terminals, longshoremen, construction, and agriculture regarding federal requirements for emergency action plans, fire prevention plans, and emergency planning and response. Each standard listed includes a general description of the standard's scope; procedural, program and/or equipment requirements; and resources for finding additional information.
