The Young H.G. Wells Claire Tomalin,2023-01-31 A fascinating journey into the life of H.G. Wells, from one of Britain's best biographers How did the first forty years of H. G. Wells' life shape the father of science fiction? From his impoverished childhood in a working-class English family, to his determination to educate himself at any cost, to the serious ill health that dominated his twenties and thirties, his complicated marriages, and love affair with socialism, the first forty years of H. G. Wells' extraordinary life would set him on a path to become one of the world's most influential writers. The sudden success of *The Time Machine* and *The War of The Worlds* transformed his life and catapulted him to international fame; he became the writer who most inspired Orwell and countless others, and predicted men walking on the moon seventy years before it happened. In this remarkable, empathetic biography, Claire Tomalin paints a fascinating portrait of a man like no other, driven by curiosity and desiring reform, a socialist and a futurist whose new and imaginative worlds continue to inspire today. 'The finest of biographers' Hilary Mantel 'A most intelligent and sympathetic biographer' Daily Telegraph 'One of the best biographers of her generation' Guardian

World Set Free H. G. Wells,2024-02-10 *THE WORLD SET FREE* was written in 1913 and published early in 1914, and it is the latest of a series of three fantasias of possibility, stories which all turn on the possible developments in the future of some contemporary force or group of forces. *The World Set Free* was written under the immediate shadow of the Great War. Every intelligent person in the world felt that disaster was impending and knew no way of averting it, but few of us realised in the earlier half of 1914 how near the crash was to us. The reader will be amused to find that here it is put off until the year 1956. He may naturally want to know the reason for what will seem now a quite extraordinary delay. As a prophet, the author must confess he has always been inclined to be rather a slow prophet. The war aeroplane in the world of reality, for example, beat the forecast in *Anticipations* by about twenty years or so. I suppose a desire not to shock the sceptical reader's sense of use and wont and perhaps a less creditable disposition to hedge, have something to do with this dating forward of one's main events, but in the particular case of *The World Set Free* there was, I think, another motive in holding the Great War back, and that was to allow the chemist to get well forward with his discovery of the release of atomic energy. 1956 or for that matter 2056 may be none too late for that crowning revolution in human potentialities. And apart from this procrastination of over forty years, the guess at the opening phase of the war was fairly lucky; the forecast of an alliance of the Central Empires, the opening campaign through the Netherlands, and the despatch of the British Expeditionary Force were all justified before the book had been published six months. And the opening section of Chapter the Second remains now, after the reality has happened, a fairly adequate diagnosis of the essentials of the matter. One happy hit (in Chapter the Second, Section 2), on which the writer may congratulate himself, is the forecast that under modern conditions it would be quite impossible for any great general to emerge to supremacy and concentrate the enthusiasm of the armies of either side. There could be no Alexanders or Napoleons. And we soon heard the scientific corps muttering, 'These old fools,' exactly as it is here foretold. These, however, are small details, and the misses in the story far outnumber the hits. It is the main thesis which is still of interest now; the thesis that because of the development of scientific knowledge, separate sovereign states and separate sovereign empires are no longer possible in the world, that to attempt to keep on with the old system is to heap disaster upon disaster for mankind and perhaps to destroy our race altogether. The remaining interest of this book now is the sustained validity of this thesis and the discussion of the possible ending of war on the earth.

The Time Machine + The Invisible Man + The War of the Worlds (3 Unabridged Science Fiction Classics) H. G. Wells,2023-12-05 This carefully crafted ebook: *The Time Machine + The Invisible Man + The War of the Worlds (3 Unabridged Science Fiction Classics)* is formatted for your eReader with a functional and detailed table of contents. H.G. Wells is an English author best known as a sci-fi writer, though he was also a prolific writer in many other genres, including contemporary novels, history, politics and social commentary, and even writing text books and rules for war games. The first great novel to imagine time travel, *The Time Machine* (1895) follows its scientist narrator on an incredible journey that takes him finally to Earth's last moments—and perhaps his own. The scientist who discovers how to transform himself in *The Invisible Man* (1897) will also discover, too late, that he has become unmoored from society and from his own sanity. *The War of the Worlds* (1898)—the seminal masterpiece of alien invasion adapted by Orson Welles for his notorious 1938 radio drama, and subsequently by several filmmakers—imagines a fierce race of Martians who devastate Earth and feed on their human victims while their voracious vegetation, the red weed, spreads over the ruined planet...

The Food of the Gods H. G. Wells,2013-12-01 Published in 1904, this forgotten classic is sci-fi and dystopia at its best, written by the creator and master of the genre Following extensive research in the field of growth, Mr. Bensington and Professor Redwood light upon a new mysterious element, a food that causes greatly accelerated development. Initially christening their discovery *The Food of the Gods*, the two scientists are overwhelmed by the possible ramifications of their creation. Needing room for experiments, Mr. Besington chooses a farm that offers him the chance to test on chickens, which duly grow monstrous, six or seven times their usual size. With the farmer, Mr. Skinner, failing to contain the spread of the Food, chaos soon reigns as reports come in of local encounters with monstrous wasps, earwigs, and rats. The chickens escape, leaving carnage in their wake. The Skinners and Redwoods have both been feeding their

children the compound illicitly—their eventual offspring will constitute a new age of giants. Public opinion rapidly turns against the scientists and society rebels against the world's new flora and fauna. Daily life has changed shockingly and now politicians are involved, trying to stamp out the Food of the Gods and the giant race. Comic and at times surprisingly touching and tragic, Wells' story is a cautionary tale warning against the rampant advances of science but also of the dangers of greed, political infighting, and shameless vote-seeking.

It is one of the earliest and best-known depictions of an alien invasion of Earth, and has influenced many others, as well as spawning several films, radio dramas, comic book adaptations, and a television series based on the story. Anticipations H.G. Wells,2021-09-18 Anticipations H. G. Wells - Anticipations of the Reaction of Mechanical and Scientific Progress upon Human Life and Thought, or as it is generally known Anticipations was written by H.G. Wells in 1900, at the age of 34. The book became a bestseller, and he personally deemed it the keystone to the main arch of my work.Wells looks at the changes due to occur, because of various technologies. In both a social and material superstructural sense. He starts with the changes caused by the steam engine and the mechanical revolution that occurred. Wells believed that humans were living through a great reorganisation of society, which would ultimately effect every single aspect of life. The accuracy of Wells' predictions are stunning.

The World Set Free H. G. H. G. Wells,2017-03-28 How is this book unique? Font adjustments & biography included Unabridged (100% Original content) Illustrated About The World Set Free by H. G. Wells The World Set Free is a novel written in 1913 and published in 1914 by H. G. Wells. The book is based on a prediction of nuclear weapons of a more destructive and uncontrollable sort than the world has yet seen. It had appeared first in serialised form with a different ending as A Prophetic Trilogy, consisting of three books: A Trap to Catch the Sun, The Last War in the World and The World Set Free. A frequent theme of Wells's work, as in his 1901 nonfiction book Anticipations, was the history of humans' mastery of power and energy through technological advance, seen as a determinant of human progress. The novel begins: The history of mankind is the history of the attainment of external power. Man is the tool-using, fire-making animal. Always down a lengthening record, save for a set-back ever and again, he is doing more. (Many of the ideas Wells develops here found a fuller development when he wrote The Outline of History in 1918-1919.) The novel is dedicated To Frederick Soddy's Interpretation of Radium, a volume published in 1909.
