The Europeanization of National Policies and Politics of Immigration T. Faist, A. Ette, 2007-02-28 The Europeanization of National Policies and Politics of Immigration is the first cutting-edge volume presenting a comparative empirical investigation on the impact of the EU on migration policy at national level. Revealing striking differences, this collection examines traditional member states, new member states as well as non-member states.

Ideologies and National Identities John R. Lampe, Mark Mazower, 2004-01-10 Twentieth-century Southeastern Europe endured three, separate decades of international and civil war, and was marred in forced migration and wrenching systematic changes. This book is the result of a year-long project by the Open Society Institute to examine and reappraise this tumultuous century. A cohort of young scholars with backgrounds in history, anthropology, political science, and comparative literature were brought together for this undertaking. The studies invite attention to fascism, socialism, and liberalism as well as nationalism and Communism. While most chapters deal with war and confrontation, they focus rather on the remembrance of such conflicts in shaping today's ideology and national identity.

Patterns of Local Autonomy in Europe Andreas Ladner, Nicolas Keuffer, Harald Baldersheim, Nikos Hlepas, Pawel Swianiewicz, Kristof Steyvers, Carmen Navarro, 2018-10-26 This book considers local autonomy, measured as a multidimensional concept, from a cross-country comparative perspective, and examines how variations can be explained and what their consequences are. It fills a gap in the literature by providing a comprehensive study of the different components of local autonomy across a large number of countries, over time. It offers a theoretically saturated concept to measure local autonomy and applies it to 39 countries, including all 28 EU member states together with Albania, Georgia, Iceland, Liechtenstein, Macedonia, Moldova, Norway, Serbia, Switzerland Turkey and Ukraine, over a period of 25 years (1990-2014).

Shattered, Cracked, or Firmly Intact? Farida Jalalzai, 2013-02-12 In the past 50 years, fewer than eighty women worldwide have attained the office of prime minister or president. In 2010, women held just seventeen of the world's 252 executive posts - slightly less than seven percent. In *Shattered, Cracked, or Firmly Intact?*, Farida Jalalzai explores the patterns of women executive's paths, powers, and potential impacts, examining the global and national mechanisms that prevent women from attaining executive office. Combining a broad understanding of global dynamics of executive power with detailed studies of individual women leaders, *Shattered, Cracked, or Firmly Intact?* analyzes how institutionally embedded gender expectations limit women's representational impact.

Përdorimi politik i fesë në rindërtimin e identiteteve Albert Doja,2001-12-01
World Economic Outlook, April 2014 International Monetary Fund. Research Dept.,2014-04-08 Global activity has broadly strengthened and is expected to improve further in 2014-15, according to the April 2014 WEO, with much of the impetus for growth coming from advanced economies. Although downside risks have diminished overall, lower-than-expected inflation poses risks for advanced economies, there is increased financial volatility in emerging market economies, and increases in the cost of capital will likely dampen investment and weigh on growth. Advanced economy policymakers need to avoid a premature withdrawal of monetary accommodation. Emerging market economy policymakers must adopt measures to changing fundamentals, facilitate external adjustment, further monetary policy tightening, and carry out structural reforms. The report includes a chapter that analyzes the causes of worldwide decreases in real interest rates since the 1980s and concludes that global rates can be expected to rise in the medium term, but only moderately. Another chapter examines factors behind the fluctuations in emerging market economies' growth and concludes that strong growth in China played a key role in buffering the effects of the global financial crisis in these economies.

Being After Rousseau Richard L. Velkley,2002-05 In *Being after Rousseau*, Richard L.

Velkley presents Jean-Jacques Rousseau as the founder of a modern European tradition of reflection on the relation of philosophy to culture—a reflection that calls both into question. Tracing this tradition from Rousseau to Immanuel Kant, Friedrich Schelling, and Martin Heidegger, Velkley shows late modern philosophy as a series of ultimately unsuccessful attempts to resolve the dichotomies between nature and society, culture and civilization, and philosophy and society that Rousseau brought to the fore. The Rousseauian tradition begins, for Velkley, with Rousseau's criticism of modern political philosophy. Although the German Idealists such as Schelling accepted much of Rousseau's critique, they believed, unlike Rousseau, that human wholeness could be attained at the level of society and history. Heidegger and Nietzsche questioned this claim, but followed both Rousseau and the Idealists in their vision of the philosopher-poet striving to recover an original wholeness that the history of reason has distorted.

Useful Enemies Noel Malcolm, 2019-05-02 From the fall of Constantinople in 1453 until the eighteenth century, many Western European writers viewed the Ottoman Empire with almost obsessive interest. Typically they reacted to it with fear and distrust; and such feelings were reinforced by the deep hostility of Western Christendom towards Islam. Yet there was also much curiosity about the social and political system on which the huge power of the sultans was based. In the sixteenth century, especially, when Ottoman territorial expansion was rapid and Ottoman institutions seemed particularly robust, there was even open admiration. In this path-breaking book Noel Malcolm ranges through these vital centuries of East-West interaction, studying all the ways in which thinkers in the West interpreted the Ottoman Empire as a political phenomenon - and Islam as a political

religion. Useful Enemies shows how the concept of 'oriental despotism' began as an attempt to turn the tables on a very positive analysis of Ottoman state power, and how, as it developed, it interacted with Western debates about monarchy and government. Noel Malcolm also shows how a negative portrayal of Islam as a religion devised for political purposes was assimilated by radical writers, who extended the criticism to all religions, including Christianity itself. Examining the works of many famous thinkers (including Machiavelli, Bodin, and Montesquieu) and many less well-known ones, Useful Enemies illuminates the long-term development of Western ideas about the Ottomans, and about Islam. Noel Malcolm shows how these ideas became intertwined with internal Western debates about power, religion, society, and war. Discussions of Islam and the Ottoman Empire were thus bound up with mainstream thinking in the West on a wide range of important topics. These Eastern enemies were not just there to be denounced. They were there to be made use of, in arguments which contributed significantly to the development of Western political thought.

Introducing Electronic Voting Peter Wolf, Rushdi Nackerdien, Domenico Tuccinardi, 2011-12-01 Electronic voting is often seen as a tool for making the electoral process more efficient and for increasing trust in its management. Properly implemented, e-voting solutions can increase the security of the ballot, speed up the processing of results and make voting easier. However, the challenges are considerable. If not carefully planned and designed, e-voting can undermine the confidence in the whole electoral process. Technology upgrades in elections are always challenging projects that require

careful deliberation and planning. Introducing e-voting is probably the most difficult upgrade as this technology touches the core of the entire electoral process—the casting and counting of the votes. E-voting greatly reduces direct human control and influence in this process. This provides an opportunity for solving some old electoral problems, but also introduces a whole range of new concerns. Consequently, e-voting usually triggers more criticism and opposition and is more disputed than any other information technology application in elections. This Policy Paper outlines contextual factors that can influence the success of e-voting solutions and highlights the importance of considering these factors before choosing to introduce new voting technologies.

Conversion to Islam in the Balkans Anton Minkov, 2004-01-01 By examining available demographic data and petitions submitted by non-Muslims for accepting Islam, this volume convincingly reconstructs the stages of the Islamization process in the Balkans and offers an insight to the motives and factors behind conversion.

Diffusion of Gender Quotas in Latin America and Beyond Adriana Piatti-Crocker, 2011 This book studies the adoption and diffusion of gender quotas in Latin America and beyond. Gender quotas are institutional mechanisms intended to increase the proportion of women rapidly and effectively in key decision-making political posts. Since the 1980s, gender quotas have been implemented in various governmental bodies and, more commonly, in legislatures. Starting in Northern Europe, these policies have expanded to other European countries and later to thirteen Latin American countries. Yet, whereas gender quotas in most European countries - with the exception of Belgium and

France - have been adopted voluntarily by some political parties, in Latin America national legislation mandates all parties to include in their lists a quota for women candidates to legislatures. Although recent scholarship on gender quotas has been devoted to the adoption of gender quotas in a variety of countries, little has been done on Central and South America, despite the fact that the legislative «quota wave» originated there. Diffusion of Gender Quotas in Latin America and Beyond remedies that situation and provides a rich comparative analysis of this policy proliferation in Latin America as well as outside this region by also examining the adoption of legislative quotas in Armenia, Bosnia-Herzegovina, and Serbia.

International Police Cooperation Daniel J. Koenig, Dilip K. Das, 2001 This volume combines the efforts of leading practitioners and academics in criminology to address the challenges of such persistent international problems as organized crime and illegal immigration. This book offers the most current and detailed account of new international cooperative initiatives.

Decentralization and Accountability Stuti Khemani, 2001 Voters in India are more vigilant in monitoring government at the local than at the national level. In state assembly elections voters reward incumbents for local income growth, and punish them for a rise in inequality, over their entire term in office. But in national elections voters behave myopically, rewarding growth in national income and a fall in inflation and inequality only in the year preceding the election.
