**Gabriele Oettingen, Peter M. Gollwitzer**

**The Path to Purpose** William Damon,2009-04-07 The author of *Greater Expectations* cites rising levels of young people who are entering adulthood without a clear sense of purpose, explaining how parents and educators can productively assist children to discover and responsibly pursue their true interests. Reprint.

**Journal of Character Education** Jacques S. Benninga,Marvin W Berkowitz,2019-10-01 The *Journal of Character Education* is the only professional journal in education devoted to character education. It is designed to cover the field—from the latest research to applied best practices. We include original research reports, editorials and conceptual articles by the best minds in our field, reviews of the latest books, and other relevant strategies and manuscripts by educators that describe best practices in teaching and learning related to character education. The *Journal of Character Education* has for over a decade been the sole scholarly journal focused on research, theory, measurement, and practice of character education. This issue includes a Voices section highlighting the 2017 Character.org Sandy Award recipient, along with four peer-reviewed articles, and a book review.

*More God, Less Crime* Byron Johnson,2011-05-15 In *More God, Less Crime* renowned criminologist Byron R. Johnson proves that religion can be a powerful antidote to crime. The book describes how faith communities, congregations, and faith-based organizations are essential in forming partnerships necessary to provide the human and spiritual capital to effectively address crime, offender rehabilitation, and the substantial aftercare problems facing former prisoners. There is scattered research literature on religion and crime but until now, there has never been one publication that systematically and rigorously analyzes what we know from this largely overlooked body of research in a lay-friendly format. The data shows that when compared to current strategies, faith-based approaches to crime prevention bring added value in targeting those factors known to cause crime: poverty, lack of education, and unemployment. In an age of limited fiscal resources, Americans can't afford a criminal justice system that turns its nose up at volunteer efforts that could not only work better than the abysmal status quo, but also save billions of dollars at the same time. This book provides readers with practical insights and recommendations for a faith-based response that could do just that.

*Social Cognition in Middle Childhood and Adolescence* Sandra Bosacki,2016-10-31 Bridging psychological theory and educational practice, this is an innovative textbook on the emotional and social aspects of young people's development. Bosacki's *Social Cognition in Middle Childhood and Adolescence*, First Edition moves beyond tradition cognitivist representations of how children learn and grow, focusing on how to integrate the emotional, cognitive, moral, spiritual and social in young people's experiences. This text bridges the gap between theory and practice; analyses cutting edge research and translates it into culturally sensitive and developmentally appropriate strategies for future educational practice.

**Supporting Children and Youth Through Spiritual Education** Kirmani, Mubina Hassanali,Chapman, Amy L.,Steele, Barbara M.,Moallem, Mahnaz,Schroth, Stephen T.,2023-07-17 Across academic circles over the last few decades, the interest and inquiry on spirituality continues to broaden. Currently, the school system in the United States and many Western countries put their focus on academic achievement at the expense of preparing their students' inner cores for skills they will need to deal with a more complex and challenging world to come. *Supporting Children and Youth Through Spiritual Education* provides a platform for researchers and experts in the field of spirituality in children and youth to voice the urgent need for an educational system that truly nurtures the whole child. The book also considers the need to remove the misunderstandings about the terms "spirituality" and "religion" among those who work directly with children and

youth. Covering key topics such as religion, cognitive development, and spiritual needs, this reference work is critical for principals, administrators, industry professionals, researchers, scholars, practitioners, academicians, instructors, and students.

**Well-Being in Adolescent Girls** Elena Savina, Jennifer M. Moran, 2021-11-04 This book equips school psychologists and other mental health professionals with a comprehensive understanding of mental health and well-being in adolescent girls. The text places adolescent girls in a developmental and social-cultural context and outlines factors that can shape girls' well-being including family, peers, and media. Chapters discuss trajectories that might result in mental distress and dysfunction in adolescent girls and identify pathways to their optimal development. Additionally, the book reviews the domains of well-being including physical health and habits, emotional well-being, healthy relationships, and identity and agency. Each chapter includes theory-informed and empirically supported interventions to help promote girls' positive physical and socio-emotional development and culminates in a list of further recommended resources for the reader. *Well-Being in Adolescent Girls* is a valuable resource for school psychologists, counselors, and other mental health professionals working with adolescents along with those in graduate-level courses in school psychology and school counseling programs.

**From the Laboratory to the Classroom** Jared Cooney Horvath, Jason M. Lodge, John Hattie, 2016-07-22 Over recent years the field of Science of Learning has increased dramatically. Unfortunately, despite claims that this work will greatly impact education, very little research makes it into teacher practice. Although the reasons for this are varied, a primary concern is the lack of a proper translation framework. *From the Laboratory to the Classroom* aims to consolidate information from many different research disciplines and correlate learning principles with known classroom practices in order to establish explanatory foundations for successful strategies that can be implemented into the classroom. It combines theoretical research with the diverse and dynamic classroom environment to deliver original, effective and specific teaching and learning strategies and address questions concerning what possible mechanisms are at play as people learn. Divided into five sections, chapters cover: A Framework for Organizing and Translating Science of Learning Research Motivation and Attention as Foundations for Student Learning Memory and Metamemory Considerations in the Instruction of Human Beings Science of Learning in Digital Learning Environments Educational Approaches for Students Experiencing Learning Difficulties and Developmental Characteristics of Gifted Children Brain, Behaviour and Classroom Practice Forging Research/Practice Relationships via Laboratory Schools This fascinating text gathers an international team of expert scientists, teachers, and administrators to present a coherent framework for the vital translation of laboratory research for educational practice. Applying the Science of Learning framework to a number of different educational domains, it will be an essential guide for any student or researcher in education, educational psychology, neuropsychology, educational technology and the emergent field of neuroeducation.

**Young Adult Development at the School-to-Work Transition** E. Anne Marshall, Jennifer E. Symonds, 2021-01-18 The school-to-work transition is a critical part of the human life-span for young adults, their families, and society. The timing of the transition varies greatly and its co-occurrence with a number of other life transitions make it challenging to summarize or generalize. Individual differences and normative developmental factors, as well as external contextual factors such as global pandemics, changing economic circumstances, workplace demands, and cultural shifts, intersect to create a range of challenges and opportunities for those navigating this transition. Written by internationally renowned scholars in developmental psychology, applied psychology, counseling, and sociology, the chapters in this book highlight the trends, issues, and actions that researchers, academics, practitioners, and policy makers need to consider in

order to effectively support young adults' transition to work pathways. This volume provides an explicitly international perspective on this area, broad coverage of psychological topics on the school-to-work transition, and an inclusive focus on sub-groups and minority groups, making it a must-read for those who support young adults as they move from school to work.

Failing Liberty 101 William Damon,2014-05-01 The author argues that we are failing to prepare today's young people to be responsible American citizens—to the detriment of their life prospects and those of liberty in the United States of the future. He identifies the problems—the declines in civic purpose and patriotism, crises of faith, cynicism, self-absorption, ignorance, indifference to the common good—and shows that our disregard of civic and moral virtue as an educational priority is having a tangible effect on the attitudes, understanding, and behavior of large portions of the youth in our country today.

**Emerging Adulthood in the COVID-19 Pandemic and Other Crises: Individual and Relational Resources** Sophie Leontopoulou,Antonella Delle Fave,2023-01-31 This volume addresses important questions related to the well-being and quality of life of emerging adults during crisis periods. It discusses the particular challenges that emerging adults face during a global or local crisis, the psychosocial resources they mobilize to overcome them and to flourish, the well-being indicators pertinent to youth development across various life domains, and the strategies to promote positive youth development and well-being under conditions of crisis. The volume examines these questions from an international and interdisciplinary point of view, collecting contributions mainly from psychology, but also education, economics, and sociology. It includes novel quantitative and qualitative research, intervention studies, critical reviews, and conceptual chapters. This makes it an essential read for scholars of positive development in emerging adulthood under crisis, as well as a relevant and accessible source of information for discerning lay readers. The specific focus of the majority of contributions on the Covid-19 pandemic makes this volume highly topical. Its focus on both well-being dimensions and problems related to crises offers a deeper understanding of the cultural similarities and differences in individual and collective challenges and resources across world regions. The volume investigates various facets of well-being, including daily experiences, relationships, purpose and growth, learning activities, and achievements. Evidence derived from the contributions to this volume can prove valuable for handling future crises through targeted interventions and programmes in different contexts and life domains.

**Exploring the Concept of Feel for Wellbeing and Performance** Jay Kimiecik,Doug Newburg,2022-12-13 This book analyses and unpacks the term Feel by exploring its many definitions and examples in real life. Incorporating psychological theories and case studies, it offers a groundbreaking look into what it means to Feel and its importance in people's everyday lives. Experiencing life without Feel has led to many deleterious performance, health, and wellbeing consequences. Exploring the Concept of Feel for Wellbeing and Performance takes a deep dive into the origins and definitions of Feel, asking what has happened to the Feel experience, and what people must do to recoup their Feel. With a highly accessible tone and clear structure, the book provides its readers with effective ways to improve performance and enhance wellbeing. The authors challenge the status quo of both performance science and wellbeing practices and begin a conversation on why people should be more proactive when it comes to their Feel. Anyone interested in helping themselves or others with performance excellence and wellbeing will benefit from this book, which blends science and practice and provides many examples of people from all walks of life who live with Feel. The book will also be key reading for students and practitioners interested in sport psychology, leadership studies, mental health studies counselling, and life coaching.

**Education in Times of Environmental Crises** Ken Winograd,2016-04-14 The core

assumption of this book is the interconnectedness of humans and nature, and that the future of the planet depends on humans' recognition and care for this interconnectedness. This comprehensive resource supports the work of pre-service and practicing elementary teachers as they teach their students to be part of the world as engaged citizens, advocates for social and ecological justice. Challenging readers to more explicitly address current environmental issues with students in their classrooms, the book presents a diverse set of topics from a variety of perspectives. Its broad social/cultural perspective emphasizes that social and ecological justice are interrelated. Coverage includes descriptions of environmental education pedagogies such as nature-based experiences and place-based studies; peace-education practices; children doing environmental activism; and teachers supporting children emotionally in times of climate disruption and tumult. The pedagogies described invite student engagement and action in the public sphere. Children are represented as 'agents of change' engaged in social and environmental issues and problems through their actions both local and global.

**Happiness Studies** Tal Ben-Shahar, 2021-07-04 In this book, Tal Ben-Shahar introduces a new interdisciplinary field of study that is dedicated to exploring happiness. The study of happiness ought not be left to psychologists alone. Philosophers, theologians, biologists, economists, and scholars from other disciplines have explored ways of attaining happiness, and to do justice to this important pursuit, we ought to listen to their words and experiment with their prescriptions. Not only does the field of happiness studies embrace different disciplines, it also approaches happiness as a multifaceted and multidimensional variable that includes five parts which form the acronym SPIRE: Spiritual wellbeing Physical wellbeing Intellectual wellbeing Relational wellbeing Emotional wellbeing This book addresses each of these elements of happiness, explains them, and addresses practical ways for their cultivation.

**Moving Beyond Grades to Purposeful Learning** David Wei Loong Hung, 2023-10-16 This book explores future directions in Singaporean education as it moves beyond its historically formative goals of survival, efficiency and performance, and its emphasis on grades and formal credentialing. It examines the future of education via the 4Life framework, a four-form model for purposeful learning centered around social-emotional regulation and the well-being of the individual learner: Life-long learning, the learning that occurs over a learner's lifespan; Life-deep learning, a deep understanding of learned content and adaptive expertise; Life-wide learning, learning in multiple contexts besides the school environment; and Life-wise learning, learning which focuses on the learner's values, morals, character and historical empathy. This book also illustrates how purposeful learning serves to equip learners with the knowledge, skills, dispositions and competencies they need to thrive as adaptive workers in the economy of the future.

**The Palgrave Handbook of Positive Education** Margaret L. Kern, 2021 The approaches outlined in this volume will help expand the narrow focus on academic success to include psychological well-being for students and educators alike. It is a must-read for anyone interested in how positive outcomes such as life satisfaction, positive emotion, and meaning and purpose can be optimized in the educational settings. -- Judith Moskowitz, PhD MPH, Northwestern University Feinberg School of Medicine, USA, IPPA President 2019-2021 This open access handbook provides a comprehensive overview of the growing field of positive education, featuring a broad range of theoretical, applied, and practice-focused chapters from leading international experts. It demonstrates how positive education offers an approach to understanding learning that blends academic study with life skills such as self-awareness, emotion regulation, healthy mindsets, mindfulness, and positive habits, grounded in the science of wellbeing, to promote character development, optimal functioning, engagement in learning, and resilience. The handbook offers an in-depth understanding and critical consideration of the relevance of positive psychology to

education, which encompasses its theoretical foundations, the empirical findings, and the existing educational applications and interventions. The contributors situate wellbeing science within the broader framework of education, considering its implications for teacher training, education and developmental psychology, school administration, policy making, pedagogy, and curriculum studies. This landmark collection will appeal to researchers and practitioners working in positive psychology, educational and school psychology, developmental psychology, education, counselling, social work, and public policy. Margaret (Peggy) L. Kern is Associate Professor at the Centre for Positive Psychology at the University of Melbourne's Graduate School of Education, Australia. Dr Kern is Founding Chair of the Education Division of the International Positive Psychology Association (IPPA). *Handbook of Self-Regulation, Third Edition* Kathleen D. Vohs, Roy F.

Baumeister, 2016-07-01 Revised edition of Handbook of self-regulation, 2011.

**Enhancing Resilience in Youth** Christoph Steinebach, Álvaro I. Langer, 2019-08-28

This book shows how to plan, refine, and implement peer-supported mindfulness-based interventions to prevent mental disorders in children and youths. It focuses on interventions designed to maintain psychosocial health and prevent emotional and behavioral problems in children and youths around the globe. By combining a range of research perspectives, the book connects mindfulness to pro-social behavior, and to positive social and physical environments, in order to enhance resilience. In addition, it presents theoretical aspects and practical recommendations on how to promote mental health and healthy lifestyles in adolescents, such as school-based interventions. Gathering contributions by an international network of researchers and practitioners, the book offers not only state-of-the-art theoretical descriptions of key concepts and interventions, but also best practices for implementing them to strengthen resilience.

Self-Regulation in Adolescence Gabriele Oettingen, Peter M. Gollwitzer, 2015-09-25

During the transition from childhood to adulthood, adolescents face a unique set of challenges that accompany increased independence and responsibility. This volume combines cutting-edge research in the field of adolescence and the field of motivation and self-regulation to shed new light on these challenges and the self-regulation tools that could most effectively address them. Leading scholars discuss general principles of the adolescent period across a wide variety of areas, including interpersonal relationships, health and achievement. Their interdisciplinary approach covers perspectives from history, anthropology and primatology, as well as numerous subdisciplines of psychology - developmental, educational, social, clinical, motivational, cognitive and neuropsychological. *Self-Regulation in Adolescence* stresses practical applications, making it a valuable resource not only for scholars, but also for adolescents and their family members, teachers, social workers and health professionals who seek to support them. It presents useful strategies that adolescents can adopt themselves and raises important questions for future research.

**Emerging Adults' Religiousness and Spirituality** Carolyn McNamara Barry, Mona

M. Abo-Zena, 2014 *Emerging Adults' Religiousness and Spirituality* seeks to understand how the developmental process of meaning-making encompasses American emerging adults' religiousness and spirituality. This volume does not focus on disentangling religion and spirituality conceptually, but rather emphasizes their centrality in the psychology of

human development. It highlights the range of experiences and perspectives of emerging adults in the U.S. grounded in social context, social position, and religious or spiritual identification. Chapters are written by an interdisciplinary group of authors and explore topics such as the benefits and detriments of religiousness and spirituality to emerging adults; contexts and socializing agents such as parents and peers, the media, religious communities, and universities; and variations of religiousness and spirituality concerning gender, sexuality, culture, and social position.

**Mentoring for Wellbeing in Schools** Benjamin Kutsyuruba, Frances K.

Kochan, 2024-01-01 This volume of the Perspectives on Mentoring Series explores the role of mentoring in promoting wellbeing of both mentees or proteges and mentors in K-12 school settings. At its core, mentoring is about helping, advising, supporting, and guiding mentees and proteges to gain a wide variety of skills, abilities, and/or attributes. Another outcome of mentoring, less often discussed, is the positive impact it can have on the mental health and wellbeing of both the mentor and mentee. Of particular interest for this edited volume is how mentoring can promote mental health, build resilience, and develop capacity to maintain and sustain emotional, psychological, and social wellbeing for all in the K-12 school settings. The notion of wellbeing, in general, includes both hedonic aspects of feeling good (positive emotions) and eudemonic (conducive to happiness) aspects of living well that entail experiences of positive relationships, meaningfulness in life and work, senses of mastery and personal growth, autonomy, and achievement. This edited volume expands and adds to the existing literature on mentoring in schools, by offering a collection of works that examine the connection between mentorship and wellbeing. This volume includes chapters that describe effective mentoring for wellbeing, detail positive approaches to mentoring youth, offer recommendations for growing the wellbeing of pre-service teachers, early career teachers, and mid-late career teachers, illustrate approaches to growing a community of educators through mentoring and developing teacher leaders as agents of change and facilitators of wellbeing, and discuss studies and models for nurturing and promoting wellbeing among and through school leaders in national and international settings. Through these chapters, authors advocate for greater attention to how to support and nurture wellbeing as central to mentorship efforts in K-12 school settings. ENDORSEMENTS: Mentoring for Wellbeing in Schools shines light on wellbeing in studies of mentoring in K-12 education. This collection provides researchers, practitioners, and policymakers alike with a rich array of wellbeing in mentoring relationships—not as an add-on feature of mentorship but rather an essential aspect of mentors’ support and role. As demonstrated from various perspectives, a culture of wellbeing in schools has multiple benefits for people and organizational cultures, including teacher and leader preparation. Readers, especially those concerned with the flourishing of schools in a pandemic world, will walk away better prepared to make mentoring work. — Carol A. Mullen, Virginia Tech Effectively marshalled by Kutsyuruba and Kochan, respected international authorities on mentoring, the authors provide a wealth of examples and guidance on much-needed means of promoting wellbeing and human flourishing in schools. Given the vast number of threats and impediments to the wellbeing of students, trainee teachers, established teachers, and principals worldwide, this work is extremely timely. Arguably, it should be compulsory reading for school principals, mentors, teacher educators, mentor trainers, education researchers in these spaces, and – perhaps more importantly – anyone who holds public office and makes or has the capacity to influence decisions which impact the work of school teachers and principals. — Andrew J. Hobson, University of Brighton, UK
