This facility makes it ideal for sharing images and video on social networking websites, or via email through the Canon Image Gateway. The camera features Canon's HS System, which combines a DIGIC 6 image processor and a 12.1-megapixel High-Sensitivity CMOS image sensor. Autofocus (AF) times and reduced shooting lag are improved over previous G-series models and continuous shooting speeds of up to 9.3 frames-per-second are possible. The G16 captures 1080p/60p Full HD video and has a built-in stereo microphone and an HDMI output for viewing videos on an HDTV. New shooting modes include Star mode for capturing the night sky: Star Nightscape will capture stars in a landscape image, while Star Trails will capture trails of stars in a still image; Star Time Lapse Movie will shoot continuous still images of stars and combine them into a video that replicates the motion of the stars in the sky. With the handheld HDR Scene mode multiple shots of a particular scene are combined to create a high dynamic range image without the need for a tripod. This mode includes Natural, Art Bold, Art Embossed, Art Standard and Art Vivid options. The dials and controls on this digital compact camera are styled similarly to those on Canon's range of EOS digital SLR cameras. The G16 is also compatible with Canon Speedlite flashes and select accessories.
