L'élevage professionnel d'insectes Benoît R. Sorel,2016-03-23 Vous souhaitez démarrer une activité d'élevage professionnel d'insectes ? Vous souhaitez faire évoluer vos élevages et vous êtes à la recherche de pistes tant théoriques que pratiques pour innover ? Vous souhaitez apporter fiabilité et adaptabilité à vos élevages ? Nous vous proposons pour cela une méthode globale, valable pour toutes les espèces et pour tous les contextes économiques. Elle repose sur une combinaison inédite des pratiques de gestion de qualité selon A. Deming avec des éléments de sociologie des sciences et des techniques selon B. Latour. Avec cette perspective originale, nous mettons en lumière les points économiquement stratégiques : le démarrage de l'élevage, sa maintenance au quotidien, l'évaluation et l'ajustement de la qualité des insectes, et enfin l'adaptation de l'élevage aux fluctuations des contraintes économiques. Pratiquement, nous expliquons comment il faut gérer au mieux des problématiques que la littérature dédiée aborde peu : l'adéquation de l'élevage au cahier des charges, la gestion des difficultés, l'acquisition d'une compréhension théorique du fonctionnement de l'élevage et la création et transmission du savoir-faire. L'objectif de cette méthode est de vous aider à maintenir sur le long terme une production d'insectes de qualité.

Faecal Sludge Management Linda Strande,Damir Brdjanovic,2014-08-15 It is estimated that literally billions of residents in urban and peri-urban areas of Africa, Asia, and Latin America are served by onsite sanitation systems (e.g. various types of latrines and septic tanks). Until recently, the management of faecal sludge from these onsite systems has been grossly neglected, partially as a result of them being considered temporary solutions until sewer-based systems could be implemented. However, the perception of onsite or decentralized sanitation technologies for urban areas is gradually changing, and is increasingly being considered as long-term, sustainable options in urban areas, especially in low- and middle-income countries that lack sewer infrastructures. This is the first book dedicated to faecal sludge management. It compiles the current state of knowledge of the rapidly evolving field of faecal sludge management, and presents an integrated approach that includes technology, management, and planning based on Sandec's 20 years of experience in the field. *Faecal Sludge Management: Systems Approach for Implementation and Operation* addresses the organization of the entire faecal sludge management service chain, from the collection and transport of sludge, and the current state of knowledge of treatment options, to the final end use or disposal of treated sludge. The book also presents important factors to consider when evaluating and upscaling new treatment technology options. The book is designed for undergraduate and graduate students, and engineers and practitioners in the field who have some basic knowledge of environmental and/or wastewater engineering.

Nature Based Strategies for Urban and Building Sustainability Gabriel Perez,Katia Perini,2018-02-14 *Nature Based Strategies for Urban and Building Sustainability* reviews the current state-of-the-art on the topic. In the introduction, the editors review the fundamental concepts of nature elements in the built environment, along with the strategies that are necessary for their inclusion in buildings and cities. Part One describes strategies for the urban environment, discussing urban ecosystems and ecosystem services, while Part Two covers strategies and technologies, including vertical greening systems, green roofs and green streets. Part Three covers the quantitative benefits, results, and issues and challenges, including energy performances and outdoor comfort, air quality improvement, acoustic performance, water management and biodiversity. Provides

an overview of the different strategies available to integrate nature in the built environment Presents the current state of technology concerning systems and methodologies on how to incorporate nature in buildings and cities Features the latest research results on operation and ecosystem services Covers both established and new designs, including those still in the experimental stage

Water and Tribal Settlement in South-East Arabia J. C. Wilkinson,2013-05 This book is a study of the traditional relationships that exist in Oman between land and social organization, and how they have evolved. The author starts with the theme of aridity and, using the extensive literature of the 1200 year old Ibadi community to supplement his field work, shows how the techniques of water exploitation have influenced the country's social organization and its political ideology. He describes how the settlement organization has evolved in two stages; the first in the years before Islam when the Persians irrigated the land using aflaj or horizontal water channels; the second after the Arabs had overthrown the Persians and, influenced by Ibadism, established a more democratic society dominated by a strong tribal structure in the villages. The tribal structure is then examined in detail and the author shows how close the links are between the Islamic ideology, land use, and social organization. As a contribution to the human geography of Oman as well as to general knowledge of the Middle East the book will interest Arabists, Islamic historians and social anthropologists, as well as hydrologists and geographers.

Territorial Ecology and Socio-ecological Transition Nicolas Buclet,2021-05-04 In the same realm as social ecology, industrial ecology and the circular economy, a new interdisciplinary field is growing: territorial ecology. Based on the analysis of the metabolism of human societies at a local level, it helps us diagnose a socioecosystem. This diagnostic is not only based on what is circulating, but also on how it is organized and why. Who is at the origin of a flow? What are their motivations? Who has the power to make decisions about it? This methodology, taking into account both the material description of human societies and the analysis of decisionmaking processes, might also be relevant for territorial diagnostics. It leads us to a systemic view of the consequences of individual and collective actions on the sustainability of local socio ecosystems. Socio-ecological transition implies a substantial evolution of human societies. Innovation, be it technological, organizational or social, is intrinsically involved in this evolution. However, if transition calls for disruptive rather than incremental innovations, we must also assess these innovations with a systemic view of their consequences.

How to Design Wastewater Systems for Local Conditions in Developing Countries David M. Robbins, Grant C. Ligon, 2014-03-15 This is a practical handbook providing a step-by-step approach to the techniques used for characterizing wastewater sources and investigating sites where collection, treatment and reuse/disposal technologies will be installed. It is intended to help enable local implementation of on-site and decentralized wastewater management system (DWMS) for wide scale use in development settings. How to Design Wastewater Systems for Local Conditions in Developing Countries helps local service providers and regulatory officials make informed decisions through the use of tools, checklists and case studies. It includes a link to a web based community of on-site and decentralized wastewater professionals, which contains related tools and case studies. This handbook serves as a reference for training classes, certification programs, and higher education programs in civil and sanitary engineering. There is an increasing interest on the part of local government officials and private sector service providers to implement wastewater treatment systems to solve sanitation problems. The model presented in this handbook promotes activities that first generate data related to source and site conditions that represent critical inputs, and then applies this information to the technology selection process. Matching the most appropriate technologies to the specific needs of the wastewater project is the key that leads to long term sustainability. How to Design Wastewater Systems for Local Conditions in Developing Countries is an invaluable resource for public sector decision makers and private sector service providers in developing countries. It is also a useful text for students at engineering colleges in developing countries interested in taking a class that teaches the methods of decentralized wastewater management system (DWMS) development.

The Top Books of the Year L A C Leverage Professionnel D Insectes Points Stra The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Let's delve into the realm of bestselling books, exploring the captivating narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. L A C Leverage Professionnel D Insectes Points Stra : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens' "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels

represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is an exceptional and suspenseful novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
