**American Cosmic** D.W. Pasulka,2019-01-18 More than half of American adults and more than seventy-five percent of young Americans believe in intelligent extraterrestrial life. This level of belief rivals that of belief in God. *American Cosmic* examines the mechanisms at work behind the thriving belief system in extraterrestrial life, a system that is changing and even supplanting traditional religions. Over the course of a six-year ethnographic study, D.W. Pasulka interviewed successful and influential scientists, professionals, and Silicon Valley entrepreneurs who believe in extraterrestrial intelligence, thereby disproving the common misconception that only fringe members of society believe in UFOs. She argues that widespread belief in aliens is due to a number of factors including their ubiquity in modern media like *The X-Files*, which can influence memory, and the believability lent to that media by the search for planets that might support life. *American Cosmic* explores the intriguing question of how people interpret unexplainable experiences, and argues that the media is replacing religion as a cultural authority that offers believers answers about non-human intelligent life.

Intimate Alien David J. Halperin,2020-03-24 A voyage of exploration to the outer reaches of our inner lives. UFOs are a myth, says David J. Halperin—but myths are real. The power and fascination of the UFO has nothing to do with space travel or life on other planets. It's about us, our longings and terrors, and especially the greatest terror of all: the end of our existence. This is a book about UFOs that goes beyond believing in them or debunking them and to a fresh understanding of what they tell us about ourselves as individuals, as a culture, and as a species. In the 1960s, Halperin was a teenage UFOlogist, convinced that flying saucers were real and that it was his life's mission to solve their mystery. He would become a professor of religious studies, with traditions of heavenly journeys his specialty. With *Intimate Alien*, he looks back to explore what UFOs once meant to him as a boy growing up in a home haunted by death and what they still mean for millions, believers and deniers alike. From the prehistoric Balkans to the deserts of New Mexico, from the biblical visions of Ezekiel to modern abduction encounters, *Intimate Alien* traces the hidden story of the UFO. It's a human story from beginning to end, no less mysterious and fantastic for its earthliness. A collective cultural dream, UFOs transport us to the outer limits of that most alien yet intimate frontier, our own inner space.

**Secrets of Ufo Technology** Kenneth W. Behrendt,2007-03-01 In *Secrets of UFO Technology*, Kenneth W. Behrendt (author of *The Physics of the Paranormal*) reveals some of the conclusions he reached concerning the UFO phenomenon after decades of intensive research. The result is a unique treatment of the subject that is far in advance of what has been generally available to date. After learning how an extraterrestrial craft negates its normal mass and weight to achieve gravity free, inertialess flight, you'll be ready to take inspection tours of a typical flying saucer and mother ship. During your journey of discovery, you'll also learn how UFOs stall automobiles, how alien craft and their crews can become invisible, how ufonauts levitate themselves for independent flight outside of their craft, and all about the shocking details behind the cattle mutilation cases. *Secrets of UFO Technology* is a profusely illustrated work that truly has the potential to revolutionize the science of ufology!

*UFO Religions* Christopher Partridge,2012-11-12 The spectre of the UFO, as popularized by shows such as *The X-Files*, has brought an astonishing slant to the face of modern religious practice. But what motivates the fantastical and sometimes sinister beliefs of UFO worshippers? *UFO Religions* critically examines some of the fascinating issues surrounding UFO worship - abduction narratives, UFO-based interpretations of other religions, the growth of pseudo-sciences purporting to explain UFOs, and the responses of the core scientific community to such claims. Focusing on contemporary global UFO groups including the Raelian Movement, Heaven's Gate, Unarius and the Ansaaru Allah Community, it gives a clear profile of modern UFO controversies and beliefs.

Are We Alone? Paul Davies,1996-06-28 Scientists and governments are actively searching for signs of life in the universe. Will their efforts meet with success? Award-winning author Paul Davies, an eminent scientist who writes with the flair of a science fiction writer, explores the ramifications that the discovery of extraterrestrial life would have for our science, our religions, and our worldview in general.

**Encounters** D. W. Pasulka,2023-11-07 A revolution is underway. For the first time in human history, we are at the cusp of experiencing contact with nonhuman life-forms of all kinds due to technological innovations and research into the experiences of people at the forefront of this development. In *Encounters*, author D.W. Pasulka takes readers to the forefront of this revolution, sharing the work of experts across a spectrum of fields who are working to connect humanity with unknown life-forms. Most of us have visions of nonhuman encounters that are shaped far more by Hollywood than they are informed by the current research. *Encounters* rewrites our visions of nonhuman species by featuring the work and stories of contemporary innovators who are rethinking our most basic assumptions about life and its manifestations beyond our experience. The author of *American Cosmic*, D.W. Pasulka is a professor of religion at UNC, Wilmington; her work as a scholar has given her the tools to systematically examine data that exceeds rational categories—exactly the skillset needed to parse the world of UFOs, angels, AI, dreams, and other dimensions, which exist at the edges of human understanding. *Encounters* is a riveting exploration of the leading science of nonhuman life and a bold glimpse of the future of humanity in a universe where we are far from alone.

**UFO Religion** Gregory L. Reece,2007-08-20 Lines laid across the plain near the Peruvian site of Nazca have been explained as ancient roads or features of a long-forgotten religious calendar. So

why did Erich von Daniken interpret these markings as the contours of a huge galactic spaceport? In his assessment of the uncanny and frequently eerie world of UFO-logy, Gregory L Reece travels deep into a mindset which believes that the gods of mythology were really visitors from the stars. Venturing into the Mojave Desert to watch the night skies for flying saucers; exploring Nevada's top-secret installation 'Area 51'; and visiting Roswell, famous site of a supposed saucer crash in 1947, the author's quest for the truth brings him more than he bargained for. He has his atomic structure recharged in a machine supposedly designed by extraterrestrial technology, encounters a whole galaxy of alien life-forms, and meets those who claim themselves to have been abducted by UFOs. Along the way, he tries to make sense both of the sinister 'Men in Black' and of lethal 'Tall Whites', deadly aliens who liquidate human beings without mercy. What is it about flying saucer culture that speaks to people with an apparently religious intensity and fervour? For those looking for the answers, UFO Religion is the definitive guide and handbook to one of the most extraordinary and compelling cults of our times.

**The Abduction of Betty and Barney Hill** Matthew Bowman,2023-08-29 A gripping account of an alien abduction and its connections to the breakdown of American society in the 1960s In the mid-1960s, Betty and Barney Hill became famous as the first Americans to claim that aliens had taken them aboard a spacecraft against their will. Their story—involving a lonely highway late at night, lost memories, and medical examinations by small gray creatures with large eyes—has become the template for nearly every encounter with aliens in American popular culture since. Historian Matthew Bowman examines the Hills' story not only as a foundational piece of UFO folklore but also as a microcosm of 1960s America. The Hills, an interracial couple who lived in New Hampshire, were civil rights activists, supporters of liberal politics, and Unitarians. But when their story of abduction was repeatedly ignored or discounted by authorities, they lost faith in the scientific establishment, the American government, and the success of the civil rights movement. Bowman tells the fascinating story of the Hills as an account of the shifting winds in American politics and culture in the second half of the twentieth century. He exposes the promise and fallout of the idealistic reforms of the 1960s and how the myth of political consensus has given way to the cynicism and conspiratorialism and the paranoia and illusion of American life today.

**Escape Philosophy** Roy Christopher,2022 The physical body has often been seen as a prison, as something to be escaped by any means necessary: technology, mechanization, drugs and sensory deprivation, alien abduction, Rapture, or even death and extinction. Taking in horror movies from David Cronenberg and UFO encounters, metal bands such as Godflesh, ketamine experiments, AI, and cybernetics, Escape Philosophy is an exploration of the ways that human beings have sought to make this escape, to transcend the limits of the human body, to find a way out. As the physical world continues to crumble at an ever-accelerating rate, and we are faced with a particularly 21st-century kind of dread and dehumanization in the face of climate collapse and a global pandemic, Escape Philosophy asks what this escape from our bodies might look like, and if it is even possible.

**Astrophilosophy, Exotheology, and Cosmic Religion** Andrew M. Davis,Roland Faber,2024-01-22 Astrophilosophy, Exotheology, and Cosmic Religion: Extraterrestrial Life in a Process Universe applies Alfred North Whitehead's process philosophy and the associated process philosophies of Henri Bergson, Teilhard de Chardin, and others to the interdisciplinary layers of astrobiology, extraterrestrial life, and the impact of discovery. This collection, edited by Andrew M. Davis and Roland Faber, asks questions such as "How have process thinkers imagined universal creative evolution and its implications for philosophies, theologies, and religions beyond earth?" and "How might their claims as to the primacy of organism, temporality, novelty, value, and mind enrich current discussions and debates across disciplines?" As experts in their fields, the contributors are informed by, but not limited to, process conceptualities. The chapters not only advance recent discussions in astrobiology, cosmology, and evolution but also consider a constellation of philosophical topics, from shared extraterrestrial knowledge and values to the possibilities or limitations

afforded by A.I. technology, the Fermi Paradox, the Drake Equation, and the increasing need to nurture the cosmic dimensions of theological and religious traditions.

**In Light-Years There's No Hurry: Cosmic Perspectives on Everyday Life** Marjolijn van Heemstra,2023-06-20 How seeing Earth through the eyes of an astronaut brings new wonder and meaning to life on our planet. One stifling summer night, the poet and journalist Marjolijn van Heemstra lay awake, unable to sleep—like so many of us feeling anxious and alienated, deeply exhausted yet restless. Amid the suffocating stream of daily obligations, the clamor of notifications and increasingly dismal headlines, she longed for a way to rise above the frenzy, for a renewed sense of meaning and connection. Then she learned about the overview effect—a permanent shift in consciousness many astronauts experience when beholding Earth from outside the atmosphere—and wondered: could the perspective of outer space offer the internal space she sought? The lyrical account of van Heemstra's yearlong quest to experience the overview effect on Earth, *In Light-Years There's No Hurry* invites us to lift our gaze above eye level and discover our connections with the cosmos, our planet, and each other. We follow as van Heemstra's cosmic awareness expands and she finds herself feeling simultaneously lighter and more grounded. Compared with the complexity of the universe, daily life on Earth begins to seem more manageable, while understanding the improbability of our collective existence gives her new patience and tenderness for her neighbors. The grand rhythms of light-years and eons become a source of restoration and relief—a comforting, necessary reminder to slow down and zoom out. Contemplating the solace a cosmic perspective offers in our chaotic, divided world, *In Light-Years There's No Hurry* is a moving meditation on what it is to be human amid the vastness of the universe.

*Handbook of UFO Religions*,2021-03-08 The *Handbook of UFO Religions*, edited by scholar of new religions Benjamin E. Zeller, offers the most expansive and detailed study of the persistent, popular, and global phenomenon of religious engagements with ideas about extraterrestrial life.

**UFOs** Karl Svozil,2023-08-01 Unidentified phenomena in space, in the Earth's atmosphere, and in waters are too important to leave their exploration to the military and scientific laypersons. Their proper scientific study is important for a variety of reasons; in particular, scientists and the public at large need to know the basic facts, to be informed about the way evidence is recorded, and to understand the difference between reliable evidence and fiction, as well as between plausible explanations and fantasy. With this objective, the book surveys the history of UFO observations, the variety of recorded phenomena, and recounts the efforts of investigative commissions and their published findings. Although wild rumors are demystified in the process, this is not an exercise in rumor-bashing. An open and at the same time critical mindset is the key. Many narratives and hypothesis appear implausible relative to our present state of knowledge; but this alone should not lead to their outright exclusion. Thus the author also pays attention to UFO sightings that have so far eluded explanation in terms of known physics or meteorology. Here the reader will encounter some of the more speculative but scientifically tenable proposals, for example, relating to sudden zigzag motion without apparent inertia or recognizable propulsion, yet always with a clear guide to their plausibility. Last but not least, the book outlines plans and suggestions for future research capable of revealing the existence and intentions of extraterrestrial intelligences, outer-space engineers, or technologies so far known only from science fiction.

*God and Astrobiology* Richard Playford,Stephen Bullivant,Janet Siefert,2024-02-29 The perception that life on other planets would be, problematic for religious people, and indeed for religion itself, is a longstanding one. It is partially rooted in fact: astrobiological speculations have, on occasion, engendered religious controversies. Historical discussions are often far more nuanced, and less one-sided than often imagined. 'Exotheology' is a lively subdiscipline within several religious traditions. This Element offers a wide-ranging introduction to the multifarious 'problems of God and astrobiology', real and perceived. It covers major topics within Christian theology (e.g., creation, incarnation, salvation), as well as issues specific to Judaism, Islam, Buddhism, and Hinduism. It also discusses the very different perspectives offered by other (non)religious traditions, including Mormonism, various 'alien-positive' new religious movements (e.g., Heaven's Gate, Scientology, Raëlism), and the 'Ancient Astronaut' theories popularized by Erich von Däniken and the History channel's Ancient Aliens.

*Living Folk Religions* Sravana Borkatakya-Varma,Aaron Michael Ullrey,2023-05-30 *Living Folk Religions* presents cutting-edge contributions from a range of disciplines to examine religious folkways across cultures.
