Children and Everyday Life in the Roman and Late Antique World Christian Laes, Ville Vuolanto, 2016-11-10 Children and Everyday Life in the Roman and Late Antique World explores what it meant to be a child in the Roman world - what were children's concerns, interests and beliefs - and whether we can find traces of children's own cultures. By combining different theoretical approaches and source materials, the contributors explore the environments in which children lived, their experience of everyday life, and what the limits were for their agency. The volume brings together scholars of archaeology and material culture, classicists, ancient historians, theologians, and scholars of early Christianity and Judaism, all of whom have long been involved in the study of the social and cultural history of children. The topics discussed include children's living environments; clothing; childhood care; social relations; leisure and play; health and disability; upbringing and schooling; and children's experiences of death. While the main focus of the volume is on Late Antiquity its coverage begins with the early Roman Empire, and extends to the early ninth century CE. The result is the first book-length scrutiny of the agency and experience of pre-modern children.

Ancient Rome: Ancient History Book Facts And Pictures For Children Bold Kids, 2022-03-07 You can teach your kids many facts about Ancient Roman history and culture by reading about the Roman gods. They were very popular and worshiped by all the people in the world. It was not unusual to find temples dedicated to them in the ruins of the Forum. They were also known for being very skilled fighters. The emperors became gods as well. They were the most powerful people in the world. Unlike today, the Roman family was headed by the father, who had all the power, but the wife still had a large say in family matters. Wealthy families sent their children to school and had them taught reading, writing, mathematics, literature, debate, and art. The poor children were not sent to school and had to make do with what they had. The rich kids went to public schools and were taught the skills necessary for leading a household, while the poor children were kept out. The Romans had couches in their homes. They sat on their left arm and ate. In the Colosseum, women washed their clothes in the Tiber. Their wealth also meant that they had access to a lot of things that we take for granted. For example, the Colosseum had an eight hundred-seat theatre and a 1,000 drinking fountains. In ancient times, men had iron helmets, while women had wooden shields and bare arms.

The Head in the Sand Julia Donaldson, 2004 Arthur Godbold discovers a bronze head of the Roman Emperor Claudius. Precursors of Functional Literacy Ludo Th Verhoeven, Carsten Elbro, Pieter Reitsma, 2002-01-01 The purpose of this volume is to present recent research in the field of the acquisition of functional literacy and its precursors. The volume aims to capture the state of the art in this rapidly expanding field. An attempt is made to clarify the vague and often inconsistent definitions of functional literacy from the perspective of development. Cognitive, linguistic, educational, and social factors of literacy development are all taken into account. The volume consists of three subsequent parts. The first part goes into phonological precursors of literacy development. In this part the focus is on the development of early language precursors of reading and writing. The cultural foundations of these precursors are explored, and their links with reading development are dealt with in detail. Different psycholinguistic approaches are also proposed to explain the occurrence of literacy problems. In the second part, the scope is on the constraints of reading and writing efficiency at the word level and beyond. The acquisition of reading and writing is seen as a result from the interaction between phonological, orthographic, and semantic processes. A crosslinguistic perspective is taken

on the role of writing system factors in the acquisition of literacy skills. The final part deals with the role of social and educational factors in literacy acquisition. Starting from a crosscultural perspective, the central issue is how the attainment of functional literacy is dependent on sociocultural variation. The predictors of more advanced levels of literacy development are considered, including foreign language literacy and adult literacy.
