Bad Boyfriends Jeb Kinnison, 2014-03-08 This book is a practical guide to using the science of attachment and relationships to find the right life partner. If you were brought up in the Western world, you've been trained on fairy tales of love and relationships that are misleading at best, and at worst have you making mistake after mistake in starting relationships with the wrong kinds of people who will waste your time and keep you from finding a loyal partner. Science has the answer! Or at least a guide to save you the time and effort of discovering for yourself how many wrong types of romantic partners there are. Reading this book will help you recognize the signs of some of the syndromes that prevent people from being good partners. We'll go through those syndromes and point out some of the signs. Those little red flags you sometimes notice when you are getting to know someone? Often they speak loud and clear once you understand the types, and you can decide immediately to run away or approach with caution those who show them. If you're young and just starting to look for a partner, good news-the world is swarming with well-adjusted, charming matches for you, if you know how to recognize them. The bad news: you are inexperienced and you may not recognize the right type of person when you date them. Many people expect to experience an immediate sense of excitement, an overwhelming rush of attraction, and to fall in love rapidly and equally with someone who feels the same. This rarely happens, and when it does it usually ends badly! And expecting it will cause you to let go of people who are steady, loving, and attentive, if you had given them a chance. So once you've identified someone who makes you laugh, answers your messages, and is there for you when you want them, don't make the mistake of tossing them aside for the merely good-looking, sexy, or intriguing stranger. If you're older, bad news: while you were spending time and effort on relationships you were hoping would turn out better, or even happily

nestled in a good relationship or two, most of the secure, reliable, sane people in your age group got paired off. They're married or happily enfamilied, and most of the people your age in the dating pool are tragically unable to form a good long-term relationship. You should always ask yourself, why is this one still available?-there may be a good answer (recently widowed or left a long-term relationship), or it may be that this person has just been extraordinarily unlucky in having over twenty short relationships in twenty years (to cite one case!) But it's far more likely you have met someone with a problematic attachment style. As you age past 40, the percentage of the dating pool that is able to form a secure, stable relationship drops to less than 30%[1]; and since it can take months of dating to understand why Mr. or Ms. SeemsNice is really the future ex-partner from Hell, being able to recognize the difficult types will help you recognize them faster and move on to the next. This book outlines the basics (which might be all you need), and points you toward more resources if you want to understand more about your problem partner. If you're wondering if the guy or girl you've been hanging out with might not be quite right, this is the place to match those little red flags you've noticed with known bad types. And by getting out fast, you can avoid emotional damage and wasted time, and get going on finding someone who's really right for you. Study all of the bad types and you'll detect them before even getting involved. Or you could be one of the few people who recognizes their own problems in one of these types. There are study materials and plans of action for you, too. If you've had lots of relationships and they all seem to go wrong, the common factor is you! Your task is to make yourself into a better partner - a goal that even the most evolved of us can always work toward.

120 Grounds for Divorce Mark Savage,2014-04-28 A football fan's journey to visit all league (and many non-league) grounds in between teaching, posting letters, punk, divorce and fatherhood. It

is a memoir of a Crewe Alexandra fan and should appeal to any football fan who gets excited when the new fixture list looms in June. As a result enthusiastic planning is made into getting to new grounds and weekends are organised around exciting fixtures that get you buzzing!

Shrivers Jeb Kinnison,2015-11-25 In this third book of the Substrate Wars series, ten years have passed since the student rebels invented quantum gateways and tamed the world's governments. Replicators have ended hunger and need, and colony planets have allowed everyone who wanted independence to settle new worlds. This peace and prosperity is threatened when scientists discover evidence that other civilizations have been destroyed by the planet-scouring Shrivers, who intercept an Earth probe and discover Earth's location in its memory. The rebels and Earth governments have to cooperate to build a defense force to stop the invading Shriver fleet. Meanwhile, Justin's daughter Katherine (Kat) has been contacted by the First, the uploaded civilizations that inhabit the substrate as a virtual realm. She is chosen to argue humanity's case in front of the tribunal which will decide whether humanity will be allowed to upload with the First, or be exterminated by the Shrivers.

NEMO'S WORLD: THE SUBSTRATE WARS 2 5 STARS. Good science fiction is usually about humanity rather than deep space or death rays. NEMO'S WORLD is well-written science fiction that harkens back to the golden age of Heinlein and Asimov. -IndieReader. RED QUEEN: THE SUBSTRATE WARS 1 4.5 STARS. The prologue begins with a quote from Robert Heinlein, 'There is nothing in this world so permanent as a temporary emergency.' This quote from 1950 eerily foreshadows life in the United States in the immediate future where there is only one political party with true power. The idea of freedom and the right to self-determination are explored throughout the book as the students seek a refuge from the ubiquitous spying from Homeland Security.-IndieReader.

Nemo's World Jeb Kinnison, 2015-03-19 In this thrilling sequel to 2014's Red Queen, the student rebels have escaped Earth, but the US and Chinese governments continue to try to copy their discovery of quantum gateways to find them and destroy the threat they represent to security interests. The rebels hold off Earth government attacks and continue to develop the new technology, which will change life for everyone and open a million habitable planets for colonization. Samantha and Justin are the romantic couple at the center of the rebellion, and their fellow rebels include anarchist cyber-geeks from the Grey Tribe and some of their former professors. The rebels recruit a PR specialist from London, Daniella Pink, and begin a campaign to fight the propaganda governments have used to paint them as dangerous terrorists. When the US effort to copy their technology, led by Samantha's former boyfriend Dylan, gets too close to success, the rebels strike back. The Homeland Security surveillance the rebels suffered under in Red Queen is reversed, and the US President and security agencies discover they must go to great lengths to avoid the rebel's listening ears. Nemo's World continues the cat-and-mouse game with the governments of the world as young rebels learn to use the weapon that will change the world, and unlock the universe for mankind. If they live long

enough to use it

The Great Mental Models Shane Parrish, Rhiannon Beaubien, 2020-03-27 This is the second book in The Great Mental Models series and the highly anticipated follow up to the Wall Street Journal best seller, Volume 1: General Thinking Concepts. We tend to isolate the things we know in the domain we learned it. For example: What does the inertia of a rolling stone have to do with perseverance and being open minded? How can the ancient process of steel production make you a more creative and innovative thinker? What does the replication of our skin cells have to do with being a stronger and more effective leader? On the surface, these concepts may appear to be dissimilar and unrelated. But the surprising truth is the hard sciences (physics, chemistry, and biology) offer a wealth of useful tools you can use to develop critically important skills like: * Relationship building * Leadership * Communication * Creativity * Curiosity * Problem solving * Decision-making This second volume of the Great Mental Models series shows you how to make those connections. It explores the core ideas from the hard sciences and offers nearly two dozen models to add to your mental toolbox. You'll not only get a better understanding of the forces that influence the world around you, but you'll learn how to direct those forces to create outsized advantages in the areas of your life that matter most to you.

Violence and Mental Health Jutta Lindert, Itzhak Levav, 2015-02-25 Violence is one of the most

important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of ‘undoing violence’ by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.

Nakama Seiichi Makino, Yukiko Abe Hatasa, Kazumi Hatasa, 1998 This proficiency-oriented introductory Japanese program emphasizes practical communication, the development of all four language skills, student interaction, and cultural awareness. *Nakama 1* consists of 12 chapters, and *Nakama 2* consists of a review chapter, plus 10 additional chapters. Both volumes feature thematically organized chapters that focus on high-frequency communicative situations and introduce

students to the Japanese language and its three writing systems: hiragana, katakana, and kanji. Hiragana (in Chapters 1-3 of Nakama 1) and katakana (in Chapters 4-6 of Nakama 1) are introduced through unique mnemonic devices that help students learn the characters. Ninety kanji characters are introduced in Chapters 7-12 of Nakama 1, and approximately 290 Kanji are presented in Chapters 1-10 of Nakama 2, with stroke-by-stroke writing techniques. A series of specially created manga precede each chapter dialogue and serve as visual advanced organizers. Chapter dialogues present a lively, continuous story line that illustrate typical daily events in Japanese life and provide a realistic context in which to learn vocabulary and grammatical structures. Exercises progress from directed practice to a wide range of open-ended communicative activities that emphasize pair and group work. Reading, writing, and speaking strategies are presented and practiced throughout the program to help develop students' language proficiency. The Houghton Mifflin Japanese Web Site provides additional materials for students and instructors, including links to relevant Internet sites and to a text-specific site developed by the co-authors, Kazumi Hatasa and Yukiko Abe Hatasa.

Must Love Curves Christa Wick,2013-06-07 Short, curvy and full of heat -- these six Wicked Shorts and their heroines kick your evening or anytime into high gear as the plus-size beauties find acceptance, love and sexual nirvana in the arms of alphas who know how to make a big, beautiful woman lose her mind. Previously released as singles and totaling 53,000+ words, this collection brings together: Curves for Two -- Thick as thieves since childhood, Chase and Roman have been to hell and back together. Returning from their second tour in Afghanistan, they intend to settle down. There's only one small problem -- they have to convince plus-size beauty Grace Michaels to share their future. First, they need to get her into bed. Curves Ahead -- Plus-size and very single, Rachel is completely blind to just how sexy her smoking hot neighbor Carter Philips thinks she is. After too many failed attempts at dating other men, she's certain no one will ever love her big girl curves. So why not give in to life as a spinster and get a kitten -- a little black ball of fur so mischievous she names him Pan. Pan's latest prank? Opening the bedroom curtains as Rachel sleeps bare assed in

bed. What she sees through the patio window when she wakes is an even bigger and far better surprise -- Carter devouring her naked body with a voracious gaze while masturbating. Should she jump up and shut the curtains or roll over and spread her legs? Slow Hand Curves -- Plus-size virgin Amber Rice isn't looking for love, just an orgasm. She's never had one! So her sister-in-law sends her to the DFW Wellness Center for a massage by physical therapist Samuel Slow Hand Pepin. Slow Hand Sam is more than ready to deliver a bone shattering orgasm to the blue-eyed beauty. With Sam mesmerized by Amber's porcelain skin, soft curves and complete innocence, will this Texas virgin get more than she was looking for? Curve Patrol -- Plus-size illustrator Patricia Pattycake Harper lives alone in the house she grew up in. Her small Georgia neighborhood has changed a lot since she was a kid, but one thing remains constant -- her secret crush on neighborhood hottie Noah Lodge. When a voyeur is reported lurking around Patty's bedroom window, Patrol Officer Lodge is first on the scene. Knowing the pervy perp is still on the loose, Noah does the one thing he's sure will keep his best friend's little sister safe. He spends the night in Patty's bed. Sunny with a Chance of Curves -- Cute but chunky weather girl Ursula Cain is certain her super sexy neighbor Jack Santos is the biggest flirt in the universe. In the six months he's lived next door to her, he's asked her out at least once a week. Too bad Jack has a revolving bedroom door and not one of the ladies using it is over a size ten. When Ursula has a bad run of predicting the weather, Jack goads her into a bet. If rain ruins his Saturday soccer game, she has to make it up to him Sunday -- in bed. Spanked by the Vet -- Instead of thanking her long-time crush Cayce Gerard after he rescues her from a truly disastrous date, Ashley Phillips wants to read him the riot act. When the gentle veterinarian uncharacteristically turns her over his knee and starts spanking her spoiled butt, Ashley's protests turn to moans and her secret is finally out. What will the good doctor do?
