Flexible Automation and Intelligent Manufacturing: The Human-Data-Technology Nexus Kyoung-Yun Kim,Leslie Monplaisir,Jeremy Rickli,2022-10-12 This is an open access book. It gathers the first volume of the proceedings of the 31st edition of the International Conference on Flexible Automation and Intelligent Manufacturing, FAIM 2022, held on June 19 - 23, 2022, in Detroit, Michigan, USA. Covering four thematic areas including Manufacturing Processes, Machine Tools, Manufacturing Systems, and Enabling Technologies, it reports on advanced manufacturing processes, and innovative materials for 3D printing, applications of machine learning, artificial intelligence and mixed reality in various production sectors, as well as important issues in human-robot collaboration, including methods for improving safety. Contributions also cover strategies to improve quality control, supply chain management and training in the manufacturing industry, and methods supporting circular supply chain and sustainable manufacturing. All in all, this book provides academicians, engineers and professionals with extensive information on both scientific and industrial advances in the converging fields of manufacturing, production, and automation.

Telerheumatology Christine Peoples,2022-07-14 This book details the practice of telerheumatology. Telemedicine is defined as the delivery of healthcare and the exchange of healthcare information across distances. Following, telerheumatology is the delivery of rheumatology care through telemedicine. There exists an increasing demand from patients, caregivers, and healthcare systems for access to academic specialists through telemedicine. This has been the case for the past several years and the demand has only increased with the ongoing COVID-19 pandemic. There is currently a lack of rheumatologists in rural areas and that is expected to spread to a general lack by 2025. Telerheumatology offers an excellent and timely solution to fill these gaps and provide care. Telerheumatology care has been shown to be feasible and quite effective. The current COVID-19 pandemic has thrust the concept of telemedicine into the spotlight. However, not all telerheumatology care is the same and there exists many nuances and differences when examining telerheumatology care across the United States and the world. After comprehensively reviewing the origins of telerheumatology, this work defines in detail the current practice of telerheumatology, along with the specific impact of the COVID-19 pandemic and all applications of telerheumatology. Expert authors also provide a detailed roadmap for providers to initiate, sustain, and grow a telerheumatology program. The book concludes by covering future directions of telerheumatology, including areas for expansion, improvement, and innovation. After reading this work, the editor and all the contributing authors hope that it will inspire, provoke thought and discussion, and lead to increased adaptation of providing telerheumatology care by rheumatologists and rheumatology providers.

Rehumanize Your Business Ethan Beute,Stephen Pacinelli,2019-04-16 Accelerate sales and improve customer experience Every day, most working professionals entrust their most important messages to a form of communication that doesn't build trust, provide differentiation, or communicate clearly enough. It's easy to point to the sheer volume of emails, text messages, voicemails, and even social messaging as the problem that reduces our reply rates and diminishes our effectiveness. But the faceless nature of that communication is also to blame. Rehumanize Your Business explains how to dramatically improve relationships and results with your customers, prospects, employees, and recruits by adding personal videos to emails, text messages, and social messages. It explains the what, why, and how behind this new movement toward simple, authentic videos—and when to replace some of your plain, typed-out communication with webcam and smartphone recordings. • Restore face-to-face communication for clarity and connection • Add a personal, human touch to your emails and other messages • Meet people who've sent thousands of videos • Learn to implement your own video habit in an easy, time-saving way • Boost your replies, appointments, conversion, referrals, and results dramatically If you're ready to influence, teach, sell, or serve in a more personal way, Rehumanize Your Business is your guide.

Edge Computing Systems with Kubernetes Sergio Méndez,2022-10-14 Understand how to use K3s and k3OS for different use cases and discover best practices for building an edge computing system Key FeaturesA guide to implementing an edge computing environmentReduce latency and costs for real-time applications running at the edgeFind stable and relevant cloud native open source software to complement your edge environmentsBook Description Edge computing is a way of processing information near the source of data instead of processing it on data centers in the cloud. In this way, edge computing can reduce latency when data is processed, improving the user experience on real-time data visualization for your applications. Using K3s, a light-weight Kubernetes and k3OS, a K3s-based Linux distribution along with other open source cloud native technologies, you can build reliable edge computing systems without spending a lot of money. In this book, you will learn how to design edge computing systems with containers and edge devices using sensors, GPS modules, WiFi, LoRa communication and so on. You will also get to grips with different use cases and examples covered in this book, how to solve common use cases for edge computing such as updating your applications using GitOps, reading data from sensors and storing it on SQL and NoSQL databases. Later chapters will show you how to connect hardware to your edge clusters, predict using machine learning, and analyze images with computer vision. All the examples and use cases in this book are designed to run on devices using 64-bit ARM processors, using Raspberry Pi devices as an example. By the end of this book, you will be able to use the content of these chapters as small pieces to create your own edge computing system. What you will learnConfigure k3OS and K3s for development and production scenariosPackage applications into K3s for shipped-node scenariosDeploy in occasionally connected scenarios, from one node to one million nodesManage GitOps for applications across different locationsUse open source cloud

native software to complement your edge computing systemsImplement observability event-driven and serverless edge applicationsCollect and process data from sensors at the edge and visualize it into the cloudWho this book is for This book is for engineers (developers and/or operators) seeking to bring the cloud native benefits of GitOps and Kubernetes to the edge. Anyone with basic knowledge of Linux and containers looking to learn Kubernetes using examples applied to edge computing and hardware systems will benefit from this book.

Neurobiology Sebastian Dworkin,2023-12-09 This volume will serve as a guide for students in the field of neurobiology, and be a bridge between basic science researchers, doctors, and surgeons in clinical practice. Written in the highly successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and cutting-edge, *Neurobiology: Methods and Protocols* aims to ensure successful results in the further study of this vital field.
