Heritage Regimes and the State Regina Bendix,Aditya

Eggert, Arnika Peselmann, 2012 What happens when UNESCO heritage conventions are ratified by a state? How do UNESCO's global efforts interact with preexisting local, regional and state efforts to conserve or promote culture? What new institutions emerge to address the mandate? The contributors to this volume focus on the work of translation and interpretation that ensues once heritage conventions are ratified and implemented. With seventeen case studies from Europe, Africa, the Caribbean and China, the volume provides comparative evidence for the divergent heritage regimes generated in states that differ in history and political organization. The cases illustrate how UNESCO's aspiration to honor and celebrate cultural diversity diversifies itself. The very effort to adopt a global heritage regime forces myriad adaptations to particular state and interstate modalities of building and managing heritage.

World Drug Report 2009, 2009-07 The World Drug Report 2009 presents comprehensive information on the illicit drug situation. It provides detailed estimates and trends on production, trafficking and consumption in the opium/heroin, coca/cocaine, cannabis and amphetamine-type stimulants markets. This year, for the first time, the Report includes special feature sections on the quality of drug data available to the United Nations Office on Drugs and Crime (UNODC), trends in drug use among young people and police-recorded drug offences. It also discusses one of the most formidable unintended consequences of drug control 'the black market for drugs' and how the international community best can tackle it

Railways and the Western European Capitals M.

Nilsen, 2008-10-13 This book looks at the effect of railways on London,

Paris, Brussels, and Berlin, focusing on each city as a case study for one aspect of implantation.

Essays in Public Economics Agnar Sandmo, 1978

The (Mis)Behaviour of Markets Benoit B. Mandelbrot, Richard L. Hudson, 2010-10-01 This international bestseller, which foreshadowed a market crash, explains why it could happen again if we don't act now. Fractal geometry is the mathematics of roughness: how to reduce the outline of a jagged leaf or static in a computer connection to a few simple mathematical properties. With his fractal tools, Mandelbrot has got to the bottom of how financial markets really work. He finds they have a shifting sense of time and wild behaviour that makes them volatile, dangerous - and beautiful. In his models, the complex gyrations of the FTSE 100 and exchange rates can be reduced to straightforward formulae that yield a much more accurate description of the risks involved.

The United Nations world water development report 2020

UNESCO World Water Assessment Programme, 2020-03-23 The 2020 edition of the WWDR, titled 'Water and Climate Change' illustrates the critical linkages between water and climate change in the context of the broader sustainable development agenda. Supported by examples from across the world, it describes both the challenges and opportunities created by climate change, and provides potential responses - in terms of adaptation, mitigation and improved resilience - that can be undertaken by enhancing water resources management, attenuating water-related risks, and improving access to water supply and sanitation services for all in a sustainable manner. It addresses the interrelations between water, people, environment and economics in a changing climate, demonstrating how climate change can be a positive catalyst for improved water management, governance and

financing to achieve a sustainable and prosperous world for all. The report provides a fact-based, water-focused contribution to the knowledge base on climate change. It is complementary to existing scientific assessments and designed to support international political frameworks, with the goals of helping the water community tackle the challenges of climate change, and informing the climate change community about the opportunities that improved water management offers in terms of adaptation and mitigation.

Historical journey in a linguistic archipelago Émilie Aussant, Jean-Michel Fortis, 2020-12-14 This volume offers a selection of papers presented during the 14th International Conference on the History of the Language Sciences (ICHoLS XIV, Paris, 2017). Part I brings together studies dealing with descriptive concepts. First examined is the notion of “accidens” in Latin grammar and its Greek counterparts. Other papers address questions with a strong echo in today’s linguistics: localism and its revival in recent semantics and syntax, the origin of the term “polysemy” and its adoption through Bréal, and the difficulties attending the description of prefabs, idioms and other “fixed expressions”. This first part also includes studies dealing with representations of linguistic phenomena, whether these concern the treatment of local varieties (so-called patois) in French research, or the import and epistemological function of spatial representations in descriptions of linguistic time. Or again, now taking the word “representation” literally, the visual display of grammatical relations, in the form of the first syntactic diagrams. Part II presents case studies which involve wider concerns, of a social nature: the “from below” approach to the history of Chinese Pidgin English underlines the social roles of speakers and the diversity of speech situations, while the scrutiny of Lhomond’s Latin and French textbooks demonstrates the

interplay of pedagogical practice, cross-linguistic comparison and descriptive innovation. An overview of early descriptions of Central Australian languages reveals a whole spectrum of humanist to positivist and antihumanist stances during the colonial age. An overarching framework is also at play in the anthropological perspective championed by Meillet, whose socially and culturally oriented semantics is shown to live on in Benveniste. The volume ends with a paper on Trần Đức Thảo, whose work is an original synthesis between phenomenology and Marxist semiology, wielded against the “idealistic” doctrine of Saussure.

Qui est qui en France ,2013

Exiting war Romain Fathi, Margaret Hutchison, Andrekos Varnava, Michael Walsh, 2022-01-18 *Exiting war* explores a particular 1918–20 ‘moment’ in the British Empire’s history, between the First World War’s armistices of 1918, and the peace treaties of 1919 and 1920. That moment, we argue, was a challenging and transformative time for the Empire. While British authorities successfully answered some of the post-war tests they faced, such as demobilisation, repatriation, and fighting the widespread effects of the Spanish flu, the racial, social, political and economic hallmarks of their imperialism set the scene for a wide range of expressions of loyalties and disloyalties, and anticolonial movements. The book documents and conceptualises this 1918–20 ‘moment’ and its characteristics as a crucial three-year period of transformation for and within the Empire, examining these years for the significant shifts in the imperial relationship that occurred and as laying the foundation for later change in the imperial system.

Towards a European Civil Code ,1994

The Economics of Taxation, second edition Bernard

Salanie,2011-11-10 A concise and rigorous text that combines theory, empirical work, and policy discussion to present core issues in the economics of taxation. This concise introduction to the economic theories of taxation is intuitive yet rigorous, relating the theories both to existing tax systems and to key empirical studies. The Economics of Taxation offers a thorough discussion of the consequences of taxes on economic decisions and equilibrium outcomes, as well as useful insights into how policy makers should design taxes. It covers such issues of central policy importance as taxation of income from capital, environmental taxation, and tax credits for low-income families. This second edition has been significantly revised and updated. Changes include a substantially rewritten chapter on direct taxation; a discussion of recent research in the chapter on mixed taxation; the replacement of the chapter on capital taxation with a chapter on the “new dynamic public finance”; and considerations of environmental taxation in both theory and policy chapters. The book is aimed at graduate students or advanced undergraduates taking public finance classes as well as economists who want to learn more about the topic. It combines discussion of theory, empirical work, and policy objectives in compact form. Appendixes provide necessary background material on consumer and producer theory and the theory of optimal control.

The Assassination of Symon Petliura and the Trial of Scholem Schwarzbard, 1926-1927 David Engel,2016 English summary: In May 1926, in Paris, a Jewish emigre watchmaker from Ukraine named Scholem Schwarzbard shot and killed the former president of the Ukrainian National Republic, Symon Petliura. Seventeen months later Schwarzbard was exonerated by a Paris court, even though he confessed to the crime and pleaded no mitigating circumstances. The assassination and trial, in which the murders of many thousands of

Jews in Ukraine in 1919 became a central issue, riveted public attention in France and around the world and sent the relations between Jews and Ukrainians, Europe's two largest stateless national minorities, into highly fraught new directions. The volume presents newly-discovered archival documents in eight languages, along with articles from the contemporary French, German, Ukrainian, Russian, Hebrew, Yiddish, and American presses, in order to illuminate this episode from multiple points of view. An extensive introduction and copious explanatory notes place a complicated and multifaceted story in historical perspective, helping readers understand why the events unfolded as they did and what they meant to the different groups that had a vital stake in them. German description: Im Mai 1926 erschoss in Paris ein jüdischer Emigrant aus der Ukraine, der Uhrmacher Scholem Schwarzbard, den ehemaligen Präsidenten der Ukrainischen Nationalrepublik, Symon Petljura. Siebzehn Monate später wurde Schwarzbard von einem Pariser Gericht freigesprochen, obwohl er die Tat gestanden und nicht auf mildernde Umstände pladiert hatte. Das Attentat und der Prozess, in dem die tausendfachen Morde an den Juden der Ukraine im Jahr 1919 zur Sprache kamen, erregten öffentliche Aufmerksamkeit in Frankreich und der gesamten Welt. Sie schlugen sich wesentlich auf die Beziehungen zwischen Juden und Ukrainern, den zwei größten staatenlosen nationalen Minderheiten Europas, nieder. Der Band vereint neu entdeckte Archivalien in acht Sprachen sowie journalistische Beiträge aus französischen, deutschen, ukrainischen, russischen, hebräischen, jiddischen und amerikanischen Zeitungen und Zeitschriften. Damit wird diese historische Episode aus zahlreichen Perspektiven beleuchtet. Eine ausführliche Einleitung und ein umfassender Anmerkungsapparat setzen diese komplizierte und vielschichtige

Geschichte in ihren historischen Kontext und helfen Lesern den Ablauf der Geschehnisse und deren Bedeutung für die unterschiedlichen Gruppen zu verstehen, die wesentlichen Anteil an ihnen hatten.

Travels and Discoveries in North and Central Africa Heinrich Barth, 1857

Winning the Peace Robert Cameron Orr, 2004 Events in Iraq, Afghanistan, and the Balkans have proved that failed and defeated states threaten the national security interests of the United States and the stability of entire regions. But success in addressing these threats clearly depends on more than military might; the post-conflict period is equally crucial. Case studies in this book examine the U.S. approach in Kosovo, East Timor, Sierra Leone, Afghanistan, and Iraq. The book offers policy guidance on how to handle current reconstruction challenges and on building capacity to do a better job when America is inevitably called on to restore failed nations in the future.

Body and Spirit in the Middle Ages Gaia Gubbini, 2020-08-10 A crucial question throughout the Middle Ages, the relationship between body and spirit cannot be understood without an interdisciplinary approach – combining literature, philosophy and medicine. Gathering contributions by leading international scholars from these disciplines, the collected volume explores themes such as lovesickness, the five senses, the role of memory and passions, in order to shed new light on the complex nature of the medieval Self.

The Constitution as Code Paul R. Baier, 2015 The Constitution as Code links Rudolph von Jhering and François Génys to the United States Constitution: Durch das römische Recht, über das römische

Recht hinaus; par la constitution, mais au-delà de la constitution. This provocative paper was presented at the Fourth Worldwide Congress of Mixed Jurisdiction Jurists, Montreal, Canada. It voices a thesis: Liberty evolves: judicial interpretation in le sens évolutif. The same day, Justice Anthony Kennedy announced the U.S. Supreme Court's opinion in Obergefell v. Hodges, the same-sex marriage case, another of Professor Baier's Beweise (proofs). PAUL R. BAIER is the Judge Henry A. Politz Professor of Law, Paul M. Hebert Law Center, Louisiana State University, USA. He holds the J.D., Harvard Law School. Editor, Harvard Legal Commentary; Judicial Fellow, Supreme Court of the United States; Scholar-in-Residence Louisiana Bar Foundation. Constitutional Interpretation: Procédés d'Elaboration (with Justice Harry A. Blackmun) (LSU-Aix-Marseille III Summer Study in Law, 1986, 1992); Separation of Powers and the Rule of Law (Tulane Law School, Siena, Italy, 1991, with Justice Antonin Scalia). His play, Father Chief Justice: Edward Douglass White and the Constitution, has been in production for fifteen years, playing most recently on the stage of the Social Law Library, Boston, Massachusetts, featuring four members of the Massachusetts Supreme Court. Professor Baier is Secretary of the Supreme Court of Louisiana Historical Society.

Maritime Logistics Dong-Wook Song, Photis Panayides, 2012-04-03
Globalisation and the rapid increase in world trade in the past decade have contributed to greater demand for international transport and logistics and, consequently, the expansion of the maritime industry. The dramatic changes in the mode of world trade and cargo transportation make it more important than ever to have a clear

understanding of the way in which freight is transported by sea and the role of ports in this exchange. Maritime Logistics examines the latest development, knowledge and practices taking place in logistics and supply chain within the port and shipping industry. Written by a team of international experts, who provide a truly global perspective on this increasingly key area of logistics, the book covers everything that students of logistics, as well as those working within the industry should know and understand including shipping lines, dry bulk and port-centric logistics.
