

Great Derangement Climate Change And The Unthinka

Mike Hulme

The Great Derangement Amitav Ghosh,2017-07-24 Are we deranged? The acclaimed Indian novelist Amitav Ghosh argues that future generations may well think so. How else to explain our imaginative failure in the face of global warming? In his first major book of nonfiction since *In an Antique Land*, Ghosh examines our inability—at the level of literature, history, and politics—to grasp the scale and violence of climate change. The extreme nature of today's climate events, Ghosh asserts, make them peculiarly resistant to contemporary modes of thinking and imagining. This is particularly true of serious literary fiction: hundred-year storms and freakish tornadoes simply feel too improbable for the novel; they are automatically consigned to other genres. In the writing of history, too, the climate crisis has sometimes led to gross simplifications; Ghosh shows that the history of the carbon economy is a tangled global story with many contradictory and counterintuitive elements. Ghosh ends by suggesting that politics, much like literature, has become a matter of personal moral reckoning rather than an arena of collective action. But to limit fiction and politics to individual moral adventure comes at a great cost. The climate crisis asks us to imagine other forms of human existence—a task to which fiction, Ghosh argues, is the best suited of all cultural forms. His book serves as a great writer's summons to confront the most urgent task of our time.

Tales of Two Planets John Freeman,2020-08-04 Building from his acclaimed anthology *Tales of Two Americas*, beloved writer and editor John Freeman draws together a group of our greatest writers from around the world to help us see how the environmental crisis is hitting some of the most vulnerable communities where they live. In the past five years, John Freeman, previously editor of *Granta*, has launched a celebrated international literary magazine, *Freeman's*, and compiled two acclaimed anthologies that deal with income inequality as it is experienced. In the course of this work, one major theme came up repeatedly: Climate change is making already dire inequalities much worse, devastating further the already devastated. But the problems of climate change are not restricted to those from the less developed world. Galvanized by his conversations with writers and activists around the world, Freeman engaged with some of today's most eloquent storytellers, many of whom hail from the places under the most acute stress—from the capital of Burundi to Bangkok, Thailand. The response has been extraordinary. Margaret Atwood conjures with a dys-topian future in a remarkable poem. Lauren Groff whisks us to Florida; Edwidge Danticat to Haiti; Tahmima Anam to Bangladesh; Yasmine El Rashidi to Egypt, while Eka Kurniawan brings us to Indonesia, Chinelo Okparanta to Nigeria, and Anuradha Roy to the Himalayas in the wake of floods, dam building, and drought. This is a literary all-points bulletin of fiction, essays, poems, and reportage about the most important crisis of our times.

The Nutmeg's Curse Amitav Ghosh,2022-09-07 In this ambitious successor to *The Great Derangement*, acclaimed writer Amitav Ghosh finds the origins of our contemporary climate crisis in Western colonialism's violent exploitation of human life and the natural environment. A powerful work of history, essay, testimony, and polemic, Amitav Ghosh's new book traces our contemporary planetary crisis back to the discovery of the New World and the sea route to the Indian Ocean. *The Nutmeg's Curse* argues that the dynamics of climate change today are rooted in a centuries-old geopolitical order constructed by Western colonialism. At the center of Ghosh's narrative is the now-ubiquitous spice nutmeg. The history of the nutmeg is one of conquest and exploitation—of both human life and the natural environment. In Ghosh's hands, the story of the nutmeg becomes a parable for our environmental crisis, revealing the ways human history has always been entangled with earthly materials such as spices, tea, sugarcane, opium, and fossil fuels. Our crisis, he shows, is ultimately the result of a mechanistic view of the earth, where nature exists only as a resource for humans to use for our own ends, rather than a force of its own, full of agency and meaning. Writing against the backdrop of the global pandemic and the Black Lives Matter protests, Ghosh frames these historical stories in a way that connects our shared colonial histories with the deep inequality we see around us today. By interweaving discussions on everything from the global history of the oil trade to the migrant crisis and the animist spirituality of Indigenous communities around the world, *The Nutmeg's Curse* offers a sharp critique of Western society and speaks to the profoundly remarkable ways in which human history is shaped by non-human forces.

The Anthropocene Unconscious Mark Bould,2021-11-02 From Ducks, Newburyport to zombie movies and the *Fast and Furious* franchise, how climate anxiety permeates our culture The art and literature of our time is pregnant with catastrophe, with weather and water, wildness and weirdness. The Anthropocene - the term given to this geological epoch in which humans, anthropos, are wreaking havoc on the earth - is to be found bubbling away everywhere in contemporary cultural production. Typically, discussions of how culture registers, figures and mediates climate change focus on 'climate fiction' or 'cli-fi', but *The Anthropocene Unconscious* is more interested in how the Anthropocene and especially anthropogenic climate destabilisation manifests in texts that are not overtly about climate change - that is, unconsciously. The Anthropocene, Mark Bould argues, constitutes the unconscious of 'the art and literature of our time'. Tracing the outlines of the Anthropocene unconscious in a range of film, television and literature - across a range of genres and with utter disregard for high-low culture distinctions - this playful and riveting book draws out some of the things that are repressed and obscured by the term 'the Anthropocene', including capital, class, imperialism, inequality, alienation, violence, commodification, patriarchy and racial formations. *The Anthropocene Unconscious* is about a kind of rewriting. It asks: what happens when we stop assuming that the text is not about the anthropogenic biosphere crises engulfing us? What if all the stories we tell are stories about the Anthropocene? About climate change?

Incendiary Circumstances Amitav Ghosh,2007-04-23 A journalist who "illuminates the human drama behind the headlines" writes about today's dramatic events, from terrorist attacks to tsunamis (*Publishers Weekly*). "An uncannily honest writer," Amitav Ghosh has published firsthand accounts of pivotal world events in publications including the *New York Times*, *Granta*, and the *New Yorker* (*The New York Times Book Review*). This volume brings together the finest of these pieces, chronicling the turmoil of our times. *Incendiary Circumstances* begins with Ghosh's arrival in the Andaman and Nicobar Islands just days after the devastation of the 2005 tsunami. We then travel back to September 11, 2001, as Ghosh retrieves his young daughter from school, sick with the knowledge that she must witness the kind of firestorm that has been in the background of his life since childhood. In his travels, Ghosh has stood on an icy mountaintop on the contested border between India and Pakistan; interviewed Pol Pot's sister-in-law in Cambodia; shared the elation of Egyptians when Naguib Mahfouz won the Nobel Prize; and stood with his threatened Sikh neighbors through the riots following Indira Gandhi's assassination. In these pieces, he offers an up-close look at an era defined by the ravages of politics and nature. "Ghosh is the perfect chronicler of an increasingly globalized world . . . Reading [him] is a mind-expanding experience. Once you've finished this book, you're very likely to press it into your friends' hands and beg them to read it as well." —*Sunday Oregonian*

Gun Island Amitav Ghosh,2019-09-10 Named a Best Book of Fall by *Vulture*, *Chicago Review of Books* and Amazon From the award-winning author of the bestselling epic *Ibis* trilogy comes a globetrotting, folkloric adventure novel about family and heritage *Bundook*. *Gun*. A common word, but one that turns Deen Datta's world upside down. A dealer of rare books, Deen is used to a quiet life spent indoors, but as his once-solid beliefs begin to shift, he is forced to set out on an extraordinary journey; one that takes him from India to Los Angeles and Venice via a tangled route through the memories and experiences of those he meets along the way. There is Piya, a fellow Bengali-American who sets his journey in motion; Tipu, an entrepreneurial young man who opens Deen's eyes to the realities of growing up in today's world; Rafi, with his desperate attempt to help someone in need; and Cinta, an old friend who provides the missing link in the story they are all a part of. It is a journey that will upend everything he thought he knew about himself, about the Bengali legends of his childhood, and about the world around him. Amitav Ghosh's *Gun Island* is a beautifully realized novel that effortlessly spans space and time. It is the story of a world on the brink, of increasing displacement and unstoppable transition. But it is also a story of hope, of a man whose faith in the world and the future is restored by two remarkable women.

Slow Violence and the Environmentalism of the Poor Rob Nixon,2011-06-01 The violence wrought by climate change, toxic drift, deforestation, oil spills, and the environmental aftermath of war takes place gradually and often invisibly. Using the innovative concept of slow violence to describe these threats, Rob Nixon focuses on the inattention we have paid to the attritional lethality of many environmental crises, in contrast with the

sensational, spectacle-driven messaging that impels public activism today. Slow violence, because it is so readily ignored by a hard-charging capitalism, exacerbates the vulnerability of ecosystems and of people who are poor, disempowered, and often involuntarily displaced, while fueling social conflicts that arise from desperation as life-sustaining conditions erode. In a book of extraordinary scope, Nixon examines a cluster of writer-activists affiliated with the environmentalism of the poor in the global South. By approaching environmental justice literature from this transnational perspective, he exposes the limitations of the national and local frames that dominate environmental writing. And by skillfully illuminating the strategies these writer-activists deploy to give dramatic visibility to environmental emergencies, Nixon invites his readers to engage with some of the most pressing challenges of our time.

Uncanny and Improbable Events Amitav Ghosh, 2021-08-26 In twenty short books, Penguin brings you the classics of the environmental movement. In this personal and wide-ranging exploration of how our collective imaginations fail to grasp the scale of environmental destruction, Amitav Ghosh summons writers and novelists to confront the most urgent story of our times. Over the past 75 years, a new canon has emerged. As life on Earth has become irrevocably altered by humans, visionary thinkers around the world have raised their voices to defend the planet, and affirm our place at the heart of its restoration. Their words have endured through the decades, becoming the classics of a movement. Together, these books show the richness of environmental thought, and point the way to a fairer, saner, greener world.

Flood of Fire Amitav Ghosh, 2015-08-04 The stunningly vibrant final novel in the bestselling Ibis Trilogy It is 1839 and China has embargoed the trade of opium, yet too much is at stake in the lucrative business and the British Foreign Secretary has ordered the colonial government in India to assemble an expeditionary force for an attack to reinstate the trade. Among those consigned is Kesri Singh, a soldier in the army of the East India Company. He makes his way eastward on the Hind, a transport ship that will carry him from Bengal to Hong Kong. Along the way, many characters from the Ibis Trilogy come aboard, including Zachary Reid, a young American speculator in opium futures, and Shireen, the widow of an opium merchant whose mysterious death in China has compelled her to seek out his lost son. The Hind docks in Hong Kong just as war breaks out and opium pours into the market like monsoon flood. From Bombay to Calcutta, from naval engagements to the decks of a hospital ship, among embezzlement, profiteering, and espionage, Amitav Ghosh charts a breathless course through the culminating moment of the British opium trade and vexed colonial history. With all the verve of the first two novels in the trilogy, *Flood of Fire* completes Ghosh's unprecedented reenvisioning of the nineteenth-century war on drugs. With remarkable historic vision and a vibrant cast of characters, Ghosh brings the Opium Wars to bear on the contemporary moment with the storytelling that has charmed readers around the world.

Easternisation Gideon Rachman, 2016 Selected as a Book of the Year by Evening Standard The West's domination of world politics is coming to a close. The flow of wealth and power is turning from West to East and a new era of global instability has begun. Easternisation is the defining trend of our age - the growing wealth of Asian nations is transforming the international balance of power. This shift to the East is shaping the lives of people all over the world, the fate of nations and the great questions of war and peace. A troubled but rising China is now challenging America's supremacy, and the ambitions of other Asian powers - including Japan, North Korea, India and Pakistan - have the potential to shake the whole world. Meanwhile the West is struggling with economic malaise and political populism, the Arab world is in turmoil and Russia longs to reclaim its status as a great power. We are at a turning point in history: but Easternisation has many decades to run. Gideon Rachman offers a road map to the turbulent process that will define the international politics of the twenty-first century.

Polysituatedness John Kinsella, 2017-01-31 This book is concerned with the complexities of defining 'place', of observing and 'seeing' place, and how we might write a poetics of place. From Kathy Acker to indigenous Australian poet Jack Davis, the book touches on other writers and theorists, but in essence is a hands-on 'praxis' book of poetic practice. The work extends John Kinsella's theory of 'international regionalism' and posits new ways of reading the relationship between place and individual, between individual and the natural environment, and how place occupies the person as much as the person occupies place. It provides alternative readings of writers through place and space, especially Australian writers, but also non-Australian. Further, close consideration is given to being of 'famine-migrant' Irish heritage and the complexities of 'returning'. A close-up examination of 'belonging' and exclusion is made on a day-to-day basis. The book offers an approach to creating poems and literary texts constituted by experiencing multiple places, developing a model of polyvalent belonging known as 'polysituatedness'. It works as a companion volume to Kinsella's earlier Manchester University Press critical work, *Disclosed Poetics: Beyond Landscape to Lyricism*.

Anthropocene Fictions Adam Trexler, 2015-04-20 Since the Industrial Revolution, humans have transformed the Earth's atmosphere, committing our planet to more extreme weather, rising sea levels, melting polar ice caps, and mass extinction. This period of observable human impact on the Earth's ecosystems has been called the Anthropocene Age. The anthropogenic climate change that has impacted the Earth has also affected our literature, but criticism of the contemporary novel has not adequately recognized the literary response to this level of environmental crisis. Ecocriticism's theories of place and planet, meanwhile, are troubled by a climate that is neither natural nor under human control. *Anthropocene Fictions* is the first systematic examination of the hundreds of novels that have been written about anthropogenic climate change. Drawing on climatology, the sociology and philosophy of science, geography, and environmental economics, Adam Trexler argues that the novel has become an essential tool to construct meaning in an age of climate change. The novel expands the reach of climate science beyond the laboratory or model, turning abstract predictions into subjectively tangible experiences of place, identity, and culture. Political and economic organizations are also being transformed by their struggle for sustainability. In turn, the novel has been forced to adapt to new boundaries between truth and fabrication, nature and economics, and individual choice and larger systems of natural phenomena. *Anthropocene Fictions* argues that new modes of inhabiting climate are of the utmost critical and political importance, when unprecedented scientific consensus has failed to lead to action. Under the Sign of Nature: Explorations in Ecocriticism

Film and the Natural Environment Adam O'Brien, 2017-12-26 Environmental themes are present in cinema more than ever before. But the relationship between film and the natural world is a long and complex one, not reducible to issues such as climate change and pollution. This volume demonstrates how an awareness of natural features and dynamics can enhance our understanding of three key film-studies topics - narrative, genre, and national cinema. It does so by drawing on examples from a broad historical and geographical spectrum, including *Sunrise*, *A River Called Titas*, and *Profound Desires of the Gods*. The first introductory text on a topic which has long been overlooked in the discipline, *Film and the Natural Environment* argues that the nonhuman world can be understood not just as a theme but as a creative resource available to all filmmakers. It invites readers to consider some of the particular strengths and weaknesses of cinema as communicator of environmental phenomena, and collates ideas and passages from a range of critics and theorists who have contributed to our understanding of moving images and the natural world.

Why Geology Matters Doug Macdougall, 2011-05-02 Volcanic dust, climate change, tsunamis, earthquakes—geoscience explores phenomena that profoundly affect our lives. But more than that, as Doug Macdougall makes clear, the science also provides important clues to the future of the planet. In an entertaining and accessibly written narrative, Macdougall gives an overview of Earth's astonishing history based on information extracted from rocks, ice cores, and other natural archives. He explores such questions as: What is the risk of an asteroid striking Earth? Why does the temperature of the ocean millions of years ago matter today? How are efforts to predict earthquakes progressing? Macdougall also explains the legacy of greenhouse gases from Earth's past and shows how that legacy shapes our understanding of today's human-caused climate change. We find that geoscience in fact illuminates many of today's most pressing issues—the availability of energy, access to fresh water, sustainable agriculture, maintaining biodiversity—and we discover how, by applying new technologies and ideas, we can use it to prepare for the future.

Literature for a Changing Planet Martin Puchner, 2022-02-08 Puchner ranges across four thousand years of world literature to draw vital lessons about how we put ourselves on the path of climate change. He proposes

a new way of reading in a warming world, shows how literature can help us recognize our shared humanity, and discusses the possible futures of storytelling

Don't Even Think About It George Marshall,2015-08-18 The director of the Climate Outreach and Information Network explores the psychological mechanism that enables people to ignore the dangers of climate change, using sidebars, cartoons and engaging stories from his years of research to reveal how humans are wired to primarily respond to visible threats.

We're Doomed. Now What? Roy Scranton,2018-07-17 An American Orwell for the age of Trump, Roy Scranton faces the unpleasant facts of our day with fierce insight and honesty. *We're Doomed. Now What?* penetrates to the very heart of our time. Our moment is one of alarming and bewildering change—the breakup of the post-1945 global order, a multispecies mass extinction, and the beginning of the end of civilization as we know it. Not one of us is innocent, not one of us is safe. Now what? *We're Doomed. Now What?* addresses the crisis that is our time through a series of brilliant, moving, and original essays on climate change, war, literature, and loss, from one of the most provocative and iconoclastic minds of his generation. Whether writing about sailing through the melting Arctic, preparing for Houston's next big storm, watching *Star Wars*, or going back to the streets of Baghdad he once patrolled as a soldier, Roy Scranton handles his subjects with the same electric, philosophical, demotic touch that he brought to his groundbreaking *New York Times* essay, "Learning How to Die in the Anthropocene."

Climate Change and the Art of Devotion Sugata Ray,2019-07-31 In the enchanted world of Braj, the primary pilgrimage center in north India for worshippers of Krishna, each stone, river, and tree is considered sacred. In *Climate Change and the Art of Devotion*, Sugata Ray shows how this place-centered theology emerged in the wake of the Little Ice Age (ca. 1550–1850), an epoch marked by climatic catastrophes across the globe. Using the frame of geoaesthetics, he compares early modern conceptions of the environment and current assumptions about nature and culture. A groundbreaking contribution to the emerging field of eco-art history, the book examines architecture, paintings, photography, and prints created in Braj alongside theological treatises and devotional poetry to foreground seepages between the natural ecosystem and cultural production. The paintings of deified rivers, temples that emulate fragrant groves, and talismanic bleeding rocks that Ray discusses will captivate readers interested in environmental humanities and South Asian art history. Why We Disagree about Climate Change Mike Hulme,2009-04-30 Climate change is not 'a problem' waiting for 'a solution'. It is an environmental, cultural and political phenomenon which is re-shaping the way we think about ourselves, our societies and humanity's place on Earth. Drawing upon twenty-five years of professional work as an international climate change scientist and public commentator, Mike Hulme provides a unique insider's account of the emergence of this phenomenon and the diverse ways in which it is understood. He uses different standpoints from science, economics, faith, psychology, communication, sociology, politics and development to explain why we disagree about climate change. In this way he shows that climate change, far from being simply an 'issue' or a 'threat', can act as a catalyst to revise our perception of our place in the world. *Why We Disagree About Climate Change* is an important contribution to the ongoing debate over climate change and its likely impact on our lives.
