Relational Leadership Nicholas Clarke, 2018-02-19
The traditional idea of leadership as being about the solo, heroic leader has now run its course. A new way of thinking about leadership is now needed to address major challenges such as achieving greater social responsibility, enhancing leadership capacity and recognising the importance of context as affecting how leadership occurs. Relational leadership offers a new perspective of leadership that addresses these challenges. At its core, relational leadership recognises leadership as centred in the relationships that form between both formal and informal leaders and those that follow them, far more so than the personality or behaviours of individual leaders. This book introduces readers to the most up-to-date research in this area and the differing theoretical perspectives that can help us better understand leadership as a relational phenomenon. Important characteristics of effective leadership relationships such as trust, respect and mutuality are discussed, focusing on how they develop and how they bring about leadership effects. Specific forms of relational leadership such as shared leadership, responsible leadership, global team leadership and complexity leadership are addressed in subsequent chapters. The book is the first to examine recent ideas about how these new forms of relational leadership are put into practice as

well as techniques, tools and strategies available to organisations to help do so. The inclusion of three detailed case studies is specifically designed to help readers understand many of the key concepts covered in the book, with key learning points emphasised. The book offers an excellent summary of the state-of-the-art topics in this new and exciting field of relational leadership.

The Leader in Me Stephen R. Covey, 2012-12-11
Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? *The Leader in Me* is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first

things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Leadership for Sustainability R. Bruce

Hull, David P. Robertson, Michael

Mortimer, 2020-11-17 Solving today's environmental and sustainability challenges requires more than expertise and technology. Effective solutions will require that we engage with other people, wrestle with difficult questions, and learn how to adapt and make confident decisions despite uncertainty. We need new approaches to leadership that empower professionals at all levels to tackle wicked problems and work towards sustainability.

Leadership for Sustainability gives readers perspective and skills for promoting creative and collaborative solutions. Blending systems thinking approaches with leadership techniques, it offers dozens of strategies and specific practices that build on the foundation of three main skills: connecting, collaborating, and adapting. Inspiring case studies show how the book's strategies and principles can be applied to diverse situations: Coordinating the activities of widely dispersed individuals and groups who may not even know they are connected, illustrated by the work of urban planners, local businesses, citizens, and other stakeholders advancing ambitious climate action goals via a Community Energy Plan in Arlington County, Virginia Collaborating with diverse stakeholders to span boundaries despite their

differences of opinion, expertise, and culture, as illustrated by the bold actions of a social entrepreneur who transformed the global food service industry with the “plant-forward” movement. Adapting to continuous change and confounding uncertainty, as a small nonprofit organization mobilizes partners to tackle poverty, water scarcity, sanitation, and climate change in rural India. Readers will come away with a holistic understanding of how to lead from where they are by applying leadership principles and practices to a wide range of wicked situations. While the challenges we face are daunting, the authors argue that these situations present opportunities for creating a more just, healthy, and prosperous world.
