XYZT Kristen Alvanson, 2019-07-02 Genre-defying fiction that accelerates cross-cultural dialogue into a kaleidoscopic rush of sensory estrangements, fairy tales, and alien encounters. There's really no difference between us and them, so we're told... Based on the author's experiences of living as an American in Iran, Kristen Alvanson's XYZT is a wildly imaginative dramatization of the idea of a dialogue of civilizations and its potentially outlandish ramifications. As part of an advanced technological test program, volunteers are shuttled back and forth between the US and Iran, hidden from the watchful eyes of immigration police and state bureaucracies. Each is given a single opportunity to be received by a local host and to have a brief authentic experience of what it means to live as "them" before being transported back home. But far from heralding the bliss of mutual recognition, the experiment unleashes a series of displacements so disorienting that the fabric of reality begins to fray. Ordinary people become entangled in extraordinary situations, and everyday life bleeds into mythological encounters, alternate universes and dark psychedelic journeys in alien lands where the real and the imaginary are indistinguishable. A treasury of tales told from multiple perspectives and in a multiplicity of styles, XYZT is an audacious cross-genre experiment, a firsthand memoir of what it means to see what they see, and a science-fictional, nonstandard engagement with anthropology in which cross-cultural encounters take on all

the unpredictable features of a contemporary fairy tale.

Paper Cadavers Kirsten Weld, 2014-02-26 In *Paper Cadavers*, an inside account of the astonishing discovery and rescue of Guatemala's secret police archives, Kirsten Weld probes the politics of memory, the wages of the Cold War, and the stakes of historical knowledge production. After Guatemala's bloody thirty-six years of civil war (1960–1996), silence and impunity reigned. That is, until 2005, when human rights investigators stumbled on the archives of the country's National Police, which, at 75 million pages, proved to be the largest trove of secret state records ever found in Latin America. The unearthing of the archives renewed fierce debates about history, memory, and justice. In *Paper Cadavers*, Weld explores Guatemala's struggles to manage this avalanche of evidence of past war crimes, providing a firsthand look at how postwar justice activists worked to reconfigure terror archives into implements of social change. Tracing the history of the police files as they were transformed from weapons of counterinsurgency into tools for post-conflict reckoning, Weld sheds light on the country's fraught transition from war to an uneasy peace, reflecting on how societies forget and remember political violence.

Chasing Serenity: A River Rain Novel Kristen Ashley, 2021-09-07 New York Times and USA Today bestselling author Kristen Ashley brings a new novel in her River Rain series... From a very young age, Chloe Pierce was trained to look after the ones she loved. And she was trained by the best. But when the

man who looked after her was no longer there, Chloe is cast adrift—just as the very foundation of her life crumbled to pieces. Then she runs into tall, lanky, unpretentious Judge Oakley, her exact opposite. She shops. He hikes. She drinks pink ladies. He drinks beer. She's a city girl. He's a mountain guy. Obviously, this means they have a blowout fight upon meeting. Their second encounter doesn't go a lot better. Judge is loving the challenge. Chloe is everything he doesn't want in a woman, but he can't stop finding ways to spend time with her. He knows she's dealing with loss and change. He just doesn't know how deep that goes. Or how ingrained it is for Chloe to care for those who have a place in her heart, how hard it will be to trust anyone to look after her... And how much harder it is when it's his turn.

One Job Town Steven High,

Community Archives, Community Spaces Jeannette Bastian, Andrew Flinn, 2019-12-19 This book traces the trajectory of the community archives movement, expanding the definition of community archives to include sites such as historical societies, social movement organisations and community centres. It also explores new definitions of what community archives might encompass, particularly in relation to disciplines outside the archives. Over ten years have passed since the first volume of *Community Archives*, and inspired by continued research as well as by the formal recognition of community archives in the UK, the community archives movement has become an important area of research, recognition and appreciation by archivists,

archival scholars and others worldwide. Increasingly the subject of papers and conferences, community archives are now seen as being in the vanguard of social concerns, markers of community-based activism, a participatory approach exemplifying the on-going evolution of 'professional' archival (and heritage) practice and integral to the ability of people to articulate and assert their identity. *Community Archives, Community Spaces* reflects the latest research and includes practical case studies on the challenges of building and sustaining community archives. This new book will appeal to practitioners, researchers, and academics in the archives and records community as well as to historians and other scholars concerned with community building and social issues.

The SAGE Encyclopedia of Communication Research Methods Mike Allen, 2017-01-15 Communication research is evolving and changing in a world of online journals, open-access, and new ways of obtaining data and conducting experiments via the Internet. Although there are generic encyclopedias describing basic social science research methodologies in general, until now there has been no comprehensive A-to-Z reference work exploring methods specific to communication and media studies. Our entries, authored by key figures in the field, focus on special considerations when applied specifically to communication research, accompanied by engaging examples from the literature of communication, journalism, and media studies. Entries cover every step of the research process, from the creative

development of research topics and questions to literature reviews, selection of best methods (whether quantitative, qualitative, or mixed) for analyzing research results and publishing research findings, whether in traditional media or via new media outlets. In addition to expected entries covering the basics of theories and methods traditionally used in communication research, other entries discuss important trends influencing the future of that research, including contemporary practical issues students will face in communication professions, the influences of globalization on research, use of new recording technologies in fieldwork, and the challenges and opportunities related to studying online multi-media environments. Email, texting, cellphone video, and blogging are shown not only as topics of research but also as means of collecting and analyzing data. Still other entries delve into considerations of accountability, copyright, confidentiality, data ownership and security, privacy, and other aspects of conducting an ethical research program. Features: 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats. Although organized A-to-Z, front matter includes a Reader's Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries. Back matter includes a Chronology of the development of the field of communication research; a Resource Guide to classic books, journals, and associations; a Glossary introducing the

terminology of the field; and a detailed Index. Entries conclude with References/Further Readings and Cross-References to related entries to guide students further in their research journeys. The Index, Reader's Guide themes, and Cross-References combine to provide robust search-and-browse in the e-version.

Media Matter Francisca Comas Rubí, Karin Priem, Sara González Gómez, 2021-11-22 This volume discusses a broad range of themes and methodological issues around images, photography and film. It is about sharing a fascination about the visual history of education and how images became the most influential (circulating) media within the field of education on local, regional, national and international levels. Within this volume images are primarily analyzed as presenters, mediators, and means of observation. Images are seen as mobile reproducible media which play an active role within the public and educational sphere. They are means of

observation and storytelling, they shape identities by presenting models of how we should act in and perceive the world, they circulate through different contexts and media, all of which impacts their meanings.

Rage Against the Minivan Kristen Howerton, 2020-06-09 “Howerton writes unflinchingly about what it means to be raising children in today’s world and how to liberate ourselves from the myth of perfect motherhood.”—Glennon Doyle, author of *Untamed* and *Love Warrior*, founder of Together Rising In this smart and subversively funny memoir, Kristen Howerton navigates the emotional and sometimes messy waters of motherhood and challenges the idea that there’s a “right” way to raise kids. Recounting her successes, trials, mishaps, and hard-won wisdom, this mother of four advocates for letting go of the expectations, the guilt, and the endless race to be the perfect parent to the perfect child in the perfect family. This book is for ● the parent who loves their kids like crazy but feels like parenting is making them crazy, too ● the parent who said “I will never . . .” and now they have ● the parent who looks like they have it all together but feels like a hot mess on the inside ● the parent who looks like a hot mess on the outside, too ● the parent who asks Am I good enough? Doing enough? Doing it right? What’s wrong with me? What’s wrong with these children? Are they eighteen yet? With her signature blend of vulnerability, sarcasm, and insight, Howerton shares her unexpected journey from infertility to adoption to pregnancy to divorce to dealing with the shock and awe of raising teens. As a mom of a multiracial family and as a

marriage and family therapist, she tackles the thorny issues parents face today, like hard conversations about racism, disciplining other people's kids, the reality of Dad Privilege, and (never) attaining that elusive work/life balance. *Rage Against the Minivan* is a permission slip to let it go and allow yourself to be a "good enough" parent, focused on raising happy, kind, loving humans.

Remembering Ludlow but Forgetting the Columbine Leigh Campbell-Hale, 2023-02-15 Mining the American West *Remembering Ludlow but Forgetting the Columbine* examines the causes, context, and legacies of the 1927 Columbine Massacre in relation to the history of labor organizing and coal mining in both Colorado and the United States. While historians have written prolifically about the 1914 Ludlow Massacre, there has been a lack of attention to the violent event remembered now as the Columbine Massacre in which police shot and killed six striking coal miners and wounded sixty more protestors during the 1927–1928 Colorado Coal Strike, even though its aftermath exerted far more influence upon subsequent national labor policies. This volume is a comparative biography of three key participants before, during, and after the strike: A. S. Embree, the IWW strike leader; Josephine Roche, the owner of the coal mine property where the Columbine Massacre took place; and Powers Hapgood, who came to work for Roche four months after she signed the 1928 United Mine Worker's contract. The author demonstrates the significance of this event to national debates about labor during the period,

as well as changes and continuities in labor history starting in the progressive era and continuing with 1930s New Deal labor policies and through the 1980s. This examination of the 1927–1928 Colorado Coal Strike reorients understandings of labor history from the 1920s through the 1960s and the construction of public memory—and forgetting—surrounding those events. *Remembering Ludlow but Forgetting the Columbine* appeals to academic and general readers interested in Colorado history, labor history, mining history, gender studies, memory, and historiography.

The Toxic Museum Helene Tello, 2023-12-29 The Toxic Museum examines the use of pesticides in German museum collections at the end of the 19th and early 20th centuries. It reconstructs the research of substances against harmful insects in museum collections within the historical context of the formation of nation-states, colonialism, a strengthening chemical industry, the First World War, and the resulting broad-based hygiene movement through the lens of the Ethnologisches Museum (Ethnological Museum) in Berlin. Because of their persistence, the consequences of the use of pesticides in museum collections are now unmistakable and well documented in many places. Numerous objects are highly contaminated and are only accessible under difficult conditions regarding occupational health and safety. This creates obstacles for conservation and scientific processing, as well as for mediation in the

context of exhibitions and external loans. The most precarious and difficult situations arise when contaminated museum objects are repatriated to their countries of origin. This monograph examines contemporary challenges in the 21st century museum landscape and contextualises the history of pesticide use at the turn of the 20th century. The Toxic Museum will be of great interest to students and scholars working in conservation, museology, monument preservation, art and cultural studies, ethnology, history, and economics.

Science in the Archives Lorraine Daston, 2017-04-04 *Science in the Archives* reveals affinities and continuities among the sciences of the archives, across many disciplines and centuries, in order to present a better picture of essential archival practices and, thereby, the meaning of science. For in both the natural and human sciences, archives of the most diverse forms make cumulative, collective knowledge possible. Yet in contrast to laboratories, observatories, or the field, archives have yet to be studied across the board as central sites of science. The volume covers episodes in the history of astronomy, geology, genetics, classical philology, climatology, history, medicine, and ancient natural philosophy, as well as fundamental practices such as collecting, retrieval strategies, and data mining. The time frame spans doxology in Greco-Roman antiquity to NSA surveillance techniques and the quantified-self movement. Each chapter explores the practices, politics, economics, and open-ended potential of the sciences of the archives, making this the first book devoted to the role of archives in the natural and human sciences.
