**Leslie Davenport**

*Dreams and Guided Imagery* Tallulah Lyons, 2012-05-14 From the Cancer Project of the International Association for the Study of Dreams (IASD) come Dream Appreciation and Guided Imagery approaches that can help anyone move into the fullness of living, no matter the circumstances. This important work is a vital aspect of an integrative approach to medicine which includes looking at all levels of our being and experience. In *Dreams and Guided Imagery*, Tallulah Lyons provides a path for readers to mine the rich fields of dream work in order to actively engage their unconscious inner resources. I highly recommend this book to anyone seeking a tool to interact with dreams and guided imagery as a part of a life practice centered on embracing health and wholeness. Matthew P. Mumber, M.D., Harbin Clinic Radiation Oncology Center, editor, *Integrative Oncology: Principles and Practice*. I know from my many years of research on dreams and from my clinical experience, that dreams are the most connective and creative parts of our minds. Dreams sometimes pick up hints about physical illness, and also emotional problems of which we are not aware in our waking lives; and dreams can help us be more in touch with ourselves. *Dreams and Guided Imagery* is an excellent and well-written book based on years of work with cancer patients sharing dreams in a group setting. It is full of vivid examples, as well as suggestions and instructions for the reader. I recommend it highly, not only for patients with cancer, but for anyone who wants to learn from dreams in a group

setting. Ernest Hartmann, M.D., first Editor-in-Chief of the journal *Dreaming*, and author of twelve books, most recently, *The Nature and Function of Dreaming*, and *Boundaries: A New Way to Look at the World*

In this groundbreaking book, Dr. Martin L. Rossman-hailed as one of the greatest healers of our generation by Rachel Naomi Remen-shows cancer patients how to use imagery in specific ways that can help them in their fight against cancer. The wisdom and knowledge that Judy has learned from her experience with cancer can be our guide and coach.' - Bernie Siegel MD, Author of *Love, Medicine & Miracles* and *The Art of Healing*. *Dancing with Cancer* focuses on the creation of a positive and proactive mindset with which to face the specific challenges and stages of

cancer. It combines the author's own experience of using what she calls Thought Work (including creative self-expression, healing energy work and meditation) with conventional cancer treatment in order to connect her intentions for healing to the everyday reality of a diagnosis of incurable bone-marrow cancer. The book offers guidance and inspiration not only to cancer sufferers as they undergo the various stages of treatment but also to those supporting them, enabling them to understand better the experience of the cancer patient as well as the possibilities of mind-body empowerment. Part I allows the reader to gain inspiration and reassurance from Judy's personal cancer story, as well as put into practice her Thought Work suggestions, which include revelatory questionnaires and journaling, creative exercises (such as drawing healing mandalas) and guided meditations. Part II gives a more detailed description of the Thought Work tools, including instructions for setting healing intentions, for using mindful breathing and for cultivating an attitude of gratitude, as well as meditations for a range of cancer situations and step-by-step instructions for creating artworks. Throughout the book are examples of Judy's own transformative artworks, which she offers along with the reminder that any creative self-expression can be healing – it is not the outcome but the physical process of doing that matters, enabling multi-level transformation.
