Nouns and Verbs Carson-Dellosa Publishing Staff,School Specialty Publishing,Carson-Dellosa Publishing,2003-07-28 Nouns and verbs are the essential building blocks of language study. This modified basic skills book introduces the concept of nouns and verbs in an easy-to-understand format. Each concept is introduced in multiple ways, presenting strategies to support children with different learning styles. Visual learners will be helped by pictures to illustrate each concept and each story. Auditory learners will be aided by listening to the stories, by reading matching parts of sentences out loud, and by enjoying rhymes. Kinesthetic learners will find the tracing, circling, coloring, and underlining exercises helpful. Page designs in this book are clean and uncluttered, minimizing distractions and helping students focus on the lessons at hand. The activities are created specifically to address learning challenges and differing abilities. Students will delight in solving the crossword puzzles, filling in blanks to complete stories, and answering comprehension questions, all in the context of mastering these important language concepts. There are also extension activities, such as the creation of a storybook, to keep students focused on and engaged in learning.

Touch Screen Tablets Touching Children's Lives Joanne Tarasuik,Gabrielle Strouse,Jordy Kaufman,2018-02-28 Touch screen tablets have greatly expanded the technology accessible to preschoolers, toddlers and even infants, given that they do not require the fine motor skills required for using traditional computers. Many parents and educators wish to make evidence-based decisions regarding young children's technology use, yet technological advancements continue to occur faster than researchers can keep up with. Accordingly, despite touch screen tablets entering society more than 5 years ago, we are in the infancy of research concerning interactive media and children. The topic has gained traction in the past couple of years. For example theoretical papers have discussed how interactive media activities differ from physical toys and passive media (Christakis, 2014), and how educational apps development should utilise the four "pillars" of learning (Hirsh-Pasek et al., 2015). Yet there has been little experimental research published on young children and touch screen use.

Origins of Sound Change Alan C. L. Yu,2013-01-10 Explanations for sound change have traditionally focused on identifying the inception of change, that is, the identification of perturbations of the speech signal, conditioned by physiological constraints on articulatory and/or auditory mechanisms, which affect the way speech sounds are analyzed by the listener. While this emphasis on identifying the nature of intrinsic variation in speech has provided important insights into the origins of widely attested cross-linguistic sound changes, the nature of phonologization - the transition from intrinsic phonetic variation to extrinsic phonological encoding - remains largely unexplored. This volume showcases the current state of the art in phonologization research, bringing together work by leading scholars in sound change research from different disciplinary and scholarly traditions. The authors investigate the progression of sound change from the perspectives of speech perception, speech production, phonology, sociolinguistics, language acquisition, psycholinguistics, computer science, statistics, and social and cognitive psychology. The book highlights the fruitfulness of collaborative efforts among phonologists and specialists from neighbouring disciplines in seeking unified theoretical explanations for the origins of sound patterns in language, as well as improved syntheses of synchronic and diachronic phonology.

Comprehension of verb inflection in German-speaking children Brandt-Kobele, Oda-Christina,2014-10-09 Previous studies on the acquisition of verb inflection in normally developing children have revealed an astonishing pattern: children use correctly inflected verbs in their own speech but fail to make use of verb inflections when comprehending sentences uttered by others. Thus, a three-year old might well be able to say something like 'The cat sleeps on the bed', but fails to understand that the same sentence, when uttered by another person, refers to only one sleeping cat but not more than one. The previous studies that have examined children's comprehension of verb inflections have employed a variant of a picture selection task in which the child was asked to explicitly indicate (via pointing) what semantic meaning she had inferred from the test sentence. Recent research on other linguistic structures, such as pronouns or focus particles, has indicated that earlier comprehension abilities can be found when methods are used that do not require an explicit reaction, like preferential looking tasks. This dissertation aimed to examine whether children are truly not able to understand the connection the the verb form and the meaning of the sentence subject until the age of five years or whether earlier comprehension can be found when a different measure, preferential looking, is used. Additionally, children's processing of subject-verb agreement violations was examined. The three experiments of this thesis that examined children's comprehension of verb inflections revealed the following: German-speaking three- to four-year old children looked more to a picture showing one actor when hearing a sentence with a singular inflected verb but only when their eye gaze was tracked and they did not have to perform a picture selection task. When they were asked to point to the matching picture, they performed at chance-level. This pattern indicates asymmetries in children's language performance even within the receptive modality. The fourth experiment examined sensitivity to subject-verb agreement violations and did not reveal evidence for sensitivity toward agreement violations in three- and four-year old children, but only found that children's looking patterns were influenced by the grammatical violations at the age of five. The results from these experiments are discussed in relation to the existence of a production-comprehension asymmetry in the use of verb inflections and children's underlying grammatical knowledge.

Input-based Tasks in Foreign Language Instruction for Young Learners Natsuko Shintani,2016-03-24 The book examines how task-based language teaching (TBLT) can be carried out with young beginner learners in a foreign language context. It addresses how TBLT can be introduced and implemented in a difficult instructional context where traditional teaching approaches are entrenched. The book reports a study that examined how TBLT can be made to work in such a context. The study compares the effectiveness of TBLT and the traditional "present-practice-produce" (PPP) approach for teaching English to young beginner learners in Japan. The TBLT researched in this study is unique as it employed input-based tasks rather than oral production tasks. The study shows that such tasks constitute an ideal means of inducting beginner learners into listening and processing English. It also shows that such tasks lead naturally to the learners trying to use the L2 in communication. It provides evidence to support the claim that TBLT promotes the kind of naturalistic interaction which is beneficial for the development of both interactional and linguistic competence. The book concludes with suggestions for how to implement TBLT in Japanese school contexts.
