International Marketing Goodluck Charles, Wineaster Anderson, 2016-09-23 This volume offers an excellent understanding of international marketing theory and practice within a constantly-changing and increasingly-complex global environment, with greater emphasis on developing countries. Designed for academics, researchers, students, practitioners, and policy-makers in the fields of international marketing, international business, and international trade, the book provides in-depth knowledge and understanding of contemporary theories and their applications in international marketing functions and practices. It exposes the readers to the global environmental forces that impact on international marketing involvement and the basic marketing strategies suitable for international marketing. As such, it will enable the reader to develop skills for effective planning, organization, execution, and control of international marketing operations. While a great deal of effort has been spent on meaningfully integrating the theoretical foundations and actual business practices, various concepts are supported by compelling exhibits, industry-specific examples, and illustrations from developing countries. The questions at the end of each chapter are designed to test the readers' understanding and application of what they have learned in actual situations.

Media Studies: Content, audiences, and production Pieter Jacobus Fourie, 2001 This book includes theoretical approaches as well as a production section that focuses on basic techniques and introductory applications of media studies.

Pragmatics of Tense and Time in News Jan Chovanec, 2014-11-15 This book provides the first comprehensive account of temporal deixis in English printed and online news texts. Linking the characteristic usage of tenses with the projection of deictic centres, it notes how conventional tenses, particularly in headlines, are affected by heteroglossia arising from various accessed voices. The resulting tense shifts are interpreted pragmatically as a conventional reader-oriented strategy that creates the impression of temporal co-presence. It is argued that since different tense choices systematically correlate with the three main textual segments of news texts, the function of tense needs to be viewed in a close connection with its local context. Traditional news texts are also contrasted with online news, particularly as far as the effect of hypertextuality on the coding of time is concerned. A two-level structural framework for the analysis of online news is proposed in order to account for their increased textual complexity. The book will be of interest to a wide range of scholars and students working in the fields of media pragmatics, discourse analysis and stylistics.

Hit the Headlines Colin MacFarlane, 2012 Exercises, games and scenarios to encourage 9-15 year olds to seek out further knowledge in areas such as news, journalism, social issues, IT, data assessment, and 'intelligent observation'. Includes suggestions on assisting with editing, creating class or school newspapers or news websites and the employment of journalistic techniques to enhance study topics.

The Basics of Media Writing Scott A. Kuehn, Andrew Lingwall, 2016-12-08 The Basics of Media Writing: A Strategic Approach helps readers develop the essential writing skills and professional habits needed to succeed in 21st-

century media careers. This research-driven, strategy-based media writing textbook digs deeply into how media professionals think and write in journalism, public relations, advertising, and other forms of strategic communication. Authors Scott A. Kuehn and Andrew Lingwall have created two comprehensive writing models to help students overcome their problems in finding and developing story topics by giving them “starting points” to begin writing. The Professional Strategy Triangle model shows students how to think critically about the audience, the situation, and the message before starting a news story or persuasive piece and the FAJA four-point model asks students a series of questions about their story type (Fact, Analysis, Judgment, or Action) to guide them to the right angle or organizational structure for their message. Rooted in classical rhetorical methods, this step-by-step technique enables readers to strategically approach each writing task, no matter the format.

Step-up English Grammar and Composition 8 (A.Y. 2023-24) Onward Fr Francis M Peter, 2023-05-20 Language is one of the highest forms of expression. It acts as the medium to make our ideas, thoughts and feelings understood and appreciated. Like art, language can touch the heart and inspire the soul. And, at the heart and soul of a language, lies its grammar. Grammar helps the learners build a firm foundation for using the language. It is, therefore, very important for learners to develop the grammar skills that they need in order to express themselves meaningfully and creatively. Step-up English Grammar and Composition 1-8 is an NEP-aligned, carefully-graded grammar series developed to address the need of a systematic and step-wise strategy for understanding grammar. The series is based on the eclectic approach to language acquisition and presents a smooth blend of the inductive as well as the deductive method of teaching and learning the language. Each concept has been covered in detail, and great care has been taken to offer the relevant core concepts for the learners at each level. Last but not least, the utmost care has been taken to encapsulate in the series the key parameters laid down in National Education Policy (NEP) 2020. The NEP places the learner at the heart of the teaching-learning process. In recent years, there has been a paradigm shift towards designing a learner-centric curriculum that is based on an activity-based approach. There is also an equal emphasis on equipping young learners with essential twenty-first-century skills. The text as well as the activities in the book promote the holistic development of the learners. Besides, there is a lot of emphasis on enhancing the creativity, critical thinking, and communication and collaboration skills of learners. Salient Features of the Book • A conscious effort has been made to incorporate the major NEP specifications. • Simple, clear and detailed explanations of essential grammatical concepts have been given. • Explanations are followed by ample examples and a variety of well-graded exercises to reinforce the concepts. • Simple and clear instructions have been given in the exercises for easy understanding. • Fun-based, art-integrated exercises, together with a wide range of activities like grids and puzzles, have been used to bring the joy of learning to the classroom. • There is also a great emphasis on building cross-curricular, grade-appropriate vocabulary through exercises and comprehension. • Speaking activities have been made a part of the grammar exercises to instil more confidence in the learners. • All the explanations and exercises have been coupled with learner-friendly layout and illustrations for additional support. • Test papers have been introduced periodically

to check if the learners have grasped the concepts. • Teacher's Resource Books comprise lessons plans, additional activities and teaching guidelines along with the answer key for each book. They are meant to serve as a handy aid for teachers and facilitate a wholesome teaching-learning experience. We hope this series caters to the requirements of the teachers as well as the students and meets our expectations in serving as a guide to the next generation of global citizens. While every possible effort has been made to avoid errors and omissions, any constructive suggestions for the improvement of the series will be welcomed and incorporated in future editions.

Media and Politics Bettina Mottura, Letizia Osti, Giorgia Riboni, 2018-04-18 Media and politics have always been mutually influential. The media plays an important political role of its own in promoting and discussing policies, as well as conveying representations of power and ideology. On the other hand, media outlets are themselves subject to political forces that have an impact on their editorial line. This mutual influence comes to light not only in journalistic practices, but also in how news is constructed and conveyed. This volume explores the relations between politics and various types of media as expressed in different areas of the world, namely Europe, Asia, the Americas, and the Middle East. Such a complex landscape calls for a multiplicity of analytical tools and cannot ignore specific socio-political, geographic, linguistic, and cultural contexts which may be overlooked when approached from a global perspective. In this volume, a combination of senior scholars and young experts from a wide range of disciplines, such as discourse analysis, international relations, and cultural studies, come together in a conversation which recognizes the media as a global phenomenon without neglecting its local

specificities.

Integrated Skill Enhancer in English Language VIII Dr. R.S. Mallik,2010-03

International Encyclopedia of Linguistics William J. Frawley,2003-05-01 The International Encyclopedia of Linguistics, 2nd Edition encompasses the full range of the contemporary field of linguistics, including historical, comparative, formal, mathematical, functional, and philosophical linguistics with special attention given to interrelations within branches of linguistics and to relations of linguistics with other disciplines. Areas of intersection with the social and behavioral sciences--ethnolinguistics, sociolinguistics, psycholinguistics, and behavioral linguistics--receive major coverage, along with interdisciplinary work in language and literature, mathematical linguistics, computational linguistics, and applied linguistics. Longer entries in the International Encyclopedia of Linguistics, ranging up to four thousand words, survey the major fields of study--for example, anthropological linguistics, history of linguistics, semantics, and phonetics. Shorter entries treat specific topics within these fields, such as code switching, sound symbolism, and syntactic features. Other short entries define and discuss technical terms used within the various subfields or provide sketches of the careers of important scholars in the history of linguistics, such as Leonard Bloomfield, Roman Jakobson, and Edward Sapir. A major portion of the work is its extensive coverage of languages and language families. From those as familiar as English, Japanese, and the Romance languages to Hittite, Yoruba, and Nahuatl, all corners of the world receive treatment. Languages that are the subject of independent entries are analyzed in terms of their phonology, grammatical features, syntax, and writing systems. Lists attached to each article on a language group or family enumerate all languages, extinct or still spoken, within that group and provide detailed information on the number of known speakers, geographical range, and degree of intelligibility with other languages in the group. In this way, virtually every known language receives coverage. For ease of reference and to aid research, the articles are alphabetically arranged, each signed by the contributor, supported by up-to-date bibliographies, line drawings, maps, tables, and diagrams, and readily accessible via a system of cross-references and a detailed index and synoptic outline. Authoritative, comprehensive, and innovative, the 2nd edition of the International Encyclopedia of Linguistics will be an indispensable addition to personal, public, academic, and research libraries and will introduce a new generation of readers to the complexities and concerns of this field of study.
