**The Other End of the Leash** Patricia McConnell, Ph.D.,2009-02-19 Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years' experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man's best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover: • How you can get your dog to come when called by acting less like a primate and more like a dog • Why the advice to “get dominance” over your dog can cause problems • Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief • How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!” Fascinating, insightful, and compelling, The Other End of the Leash is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

**The Making of Middle Indonesia** Gerry van Klinken, 2014-01-30 What holds Indonesia together? 'A strong leader' is the answer most often given. This book looks instead at a middle level of society. Middle classes in provincial towns around the vast archipelago mediate between the state and society and help to constitute state power. 'Middle Indonesia' is a social zone connecting extremes. The Making of Middle Indonesia examines the rise of an indigenous middle class in one provincial town far removed from the capital city. Spanning the late colonial to early New Order periods, it develops an unusual, associational notion of political power. 'Soft' modalities of power included non-elite provincial people in the emerging Indonesian state. At the same time, growing inequalities produced class tensions that exploded in violence in 1965-1966.

The Educator's Guide to Texas School Law Jim Walsh, Sarah Orman, 2022-09-13 Much has changed in the area of school law since the first edition of The Educator's Guide to Texas School Law was published in 1986. This new tenth edition of The Educator's Guide offers an authoritative source on Texas school law through the 2021 legislative sessions. Intended for educators, school board members, attorneys, and taxpayers, it explains what the law is and what the implications are for effective school operations; it helps professional educators avoid expensive and time-consuming lawsuits by taking effective preventive action; and it serves as a highly valuable resource for school law courses and staff development sessions. The tenth edition begins with a review of the legal structure of the Texas school system, incorporating recent features such as charter schools and districts of innovation, then addresses the instructional program, service to students with special needs, the rights of public school employees, the role of religion, student discipline, governmental transparency, privacy, parental rights, and the parameters of legal liability for schools and school personnel. The book includes discussion of major federal legislation, such as the Individuals with Disabilities Education Act, the Family Educational Rights and Privacy Act, Section 504 of the Rehabilitation Act of 1973, and Title IX. On the state level, the book incorporates laws pertaining to cyberbullying, inappropriate relationships between students and employees, and human sexuality instruction.

Surveillance Valley Yasha Levine, 2018-02-06 The internet is the most effective weapon the government has ever built. In this fascinating book, investigative reporter Yasha Levine uncovers the secret origins of the internet, tracing it back to a Pentagon counterinsurgency surveillance project. A visionary intelligence officer, William Godel, realized that the key to winning the war in Vietnam was not outgunning the enemy, but using new information technology to understand their motives and anticipate their movements. This idea -- using computers to spy on people and groups perceived as a threat, both at home and abroad -- drove ARPA to develop the internet in the 1960s, and continues to be at the heart of the modern internet we all know and use today. As Levine shows, surveillance wasn't something that suddenly appeared on the internet; it was woven into the fabric of the technology. But this isn't just a story about the NSA or other domestic programs run by the government. As the book spins forward in time, Levine examines the private surveillance business that powers tech-industry giants like Google, Facebook, and Amazon, revealing how these companies spy on

their users for profit, all while doing double duty as military and intelligence contractors. Levine shows that the military and Silicon Valley are effectively inseparable: a military-digital complex that permeates everything connected to the internet, even coopting and weaponizing the antigovernment privacy movement that sprang up in the wake of Edward Snowden. With deep research, skilled storytelling, and provocative arguments, *Surveillance Valley* will change the way you think about the news -- and the device on which you read it.

*Linking Literature with Life* Alexa L. Sandmann, John F. Ahern, 2002 Three significant changes have impacted the teaching of social studies to young adolescents in the past decade: (1) development of the curriculum standards for social studies by the National Council for the Social Studies (NCSS); (2) growth in the number of middle schools, which are premised on the integration of content; and (3) expansive use of children's literature in social studies. This book is in response to those innovations which are explained in two parts: (1) provides a rationale for using trade books in social studies and details strategies for nurturing students' reading comprehension; and (2) provides annotations for more than 250 trade books, along with ideas for classroom use, and recommends 150+ additional titles. An index by title and an index by subject are also included. (BT)

*Coping with Life Crises* Rudolf Moos, 2013-12-20 This book examines new developments in the area of human competence and coping behavior. It sets forth a conceptual framework that considers the interplay between environmental contexts and personal resources and their impact on how individuals cope with life transitions and crises. The selections cover the tasks confronted in varied life crises and describe the coping strategies employed in managing them. The material identifies the long-term effects of such life events as divorce and bereavement as well as the way in which these stressors can promote personal growth and maturity. The book contains a broad selection of recent literature on coping and adaptation, integrative commentaries that provide the background for each of the areas as well as conceptual linkages among them, and an introductory overview that presents a general perspective on human competence and coping. Illustrative case examples are included. The first part of the book is organized chronologically according to developmental life transitions confronted by many people—from the childhood years through adolescence, career choice and parenthood, divorce and remarriage, middle age and retirement, and death and bereavement. The second part covers unusual life crises and other hazards that typically involve extreme stress such as man-made and natural disasters and terrorism. The book highlights effective coping behavior among healthy individuals rather than psychological breakdown and psychiatric symptoms. The emphasis is on successful adaptation, the ability to cope with life transitions and crises, and the process by which such ix x PREFACE .

**The Young Atheist's Handbook** Alom Shaha, 2012-07-19 Growing up in a strict Muslim community in south-east London, Alom Shaha learnt that religion was not to be questioned. Reciting the Qur'an without understanding what it meant was simply a part of life; so, too, was obeying the imam and enduring beatings when he failed to attend the local mosque. But Alom was more drawn to science and its power to illuminate. As a teen, he lived between two worlds: the home controlled by his authoritarian father, and a school alive with books and ideas. In a charming blend of memoir, philosophy and science, Alom explores the questions about faith and the afterlife that we all ponder. This is a book for anyone who wonders what they should believe and how they should live. It's for those who may need the facts and the ideas, as well as the courage, to break free from inherited beliefs. In this powerful narrative, Alom shows that it is possible to live a compassionate, fulfilling and meaningful life without God.
