**Leaving Parnassus** Seth Adam Whidden, 2007 *Leaving Parnassus: The Lyric Subject in Verlaine and Rimbaud* considers how the crisis of the lyric subject in the middle of the nineteenth century in France is a direct response to the aesthetic principles of Parnassian poetry, which dominated the second half of the century much more than critics often think. The poets considered here rebel against the strict confines of traditional and contemporary poetry and attempt to create radically new discursive practices. Specifically, the close readings of poems apply recent studies of subjectivity in poetry and focus on the works of Paul Verlaine and Arthur Rimbaud to see how each subverts the dominant tradition of French poetry in a unique way. Whereas previous studies considered isolated aspects of each poet's lyric subject, *Leaving Parnassus* shows that the situation of the lyric is a source of subversion throughout the poets' entire work, and as such it is crucial to our full understanding of their respective innovations.

**Cosmography and the Idea of Hyperborea in Ancient Greece** Renaud Gagné, 2021-04-22 *Cosmography* is defined here as the rhetoric of cosmology: the art of composing worlds. The mirage of Hyperborea, which played a substantial role in Greek religion and culture throughout Antiquity, offers a remarkable window into the practice of composing and reading worlds. This book follows Hyperborea across genres and centuries, both as an exploration of the extraordinary record of Greek thought on that further North and as a case study of ancient cosmography and the anthropological philology that tracks ancient cosmography. Trajectories through the many forms of Greek thought on Hyperborea shed light on key aspects of the cosmography of cult and the cosmography of literature. The philology of worlds pursued in this book ranges from Archaic hymns to Hellenistic and Imperial reconfigurations of Hyperborea. A thousand years of cosmography is thus surveyed through the rewritings of one idea. This is a book on the art of reading worlds slowly.

*Divine Names on the Spot II* F Porzia, C Bonnet, 2023-09-14 English summary: Names, images, and narratives are intimately related and frequently polysemous. As pieces of information on the gods, they convey fragments of knowledge and attempts to interpret the multifaceted complexity of the divine world. In what Robert Parker describes as an archipelago, images and narratives are like compasses used to approach the mapping of the gods. The different contributions collected in this volume, dealing with the Greek and the Semitic worlds (the two main areas of the Mapping Ancient Polytheisms project), explore connections but also discrepancies between these different semantics, in order to highlight specificities and commonalities in the onomastic and iconographic languages. French description: Les noms, les images et les recits sont intimement liés et volontiers polysemiques. En tant qu'éléments d'information sur les dieux, ils véhiculent des fragments de connaissance et constituent autant de tentatives d'interprétation de la complexité multiforme du monde divin. Dans ce que Robert Parker décrit comme un archipel, les images et les recits sont comme des boussoles qui facilitent la cartographie des dieux. Les différentes contributions rassemblées dans ce volume, traitant des mondes grec et sémitique (les deux principaux domaines abordés dans le projet Mapping Ancient Polytheisms), explorent les connexions mais aussi les divergences existant entre ces différentes sémantiques, afin

de mettre en évidence les spécificités et les points communs entre langage onomastique et langage iconographique.

The Situationist City Simon Sadler, 1999-08-18 Simon Sadler searches for the Situationist City among the detritus of tracts, manifestos, and works of art that the Situationist International left behind. From 1957 to 1972 the artistic and political movement known as the Situationist International (SI) worked aggressively to subvert the conservative ideology of the Western world. The movement's broadside attack on establishment institutions and values left its mark upon the libertarian left, the counterculture, the revolutionary events of 1968, and more recent phenomena from punk to postmodernism. But over time it tended to obscure Situationism's own founding principles. In this book, Simon Sadler investigates the artistic, architectural, and cultural theories that were once the foundations of Situationist thought, particularly as they applied to the form of the modern city. According to the Situationists, the benign professionalism of architecture and design had led to a sterilization of the world that threatened to wipe out any sense of spontaneity or playfulness. The Situationists hankered after the pioneer spirit of the modernist period, when new ideas, such as those of Marx, Freud, and Nietzsche, still felt fresh and vital. By the late fifties, movements such as British and American Pop Art and French Nouveau Réalisme had become intensely interested in everyday life, space, and mass culture. The SI aimed to convert this interest into a revolution—at the level of the city itself. Their principle for the reorganization of cities was simple and seductive: let the citizens themselves decide what spaces and architecture they want to live in and how they wish to live in them. This would instantly undermine the powers of state, bureaucracy, capital, and imperialism, thereby revolutionizing people's everyday lives. Simon Sadler searches for the Situationist City among the detritus of tracts, manifestos, and works of art that the SI left behind. The book is divided into three parts. The first, *The Naked City*, outlines the Situationist critique of the urban environment as it then existed. The second, *Formulary for a New Urbanism*, examines Situationist principles for the city and for city living. The third, *A New Babylon*, describes actual designs proposed for a Situationist City.
