Management Between Strategy and Finance Burkhard Schwenker,Klaus Spremann,2008-11-21 Companies' decision-making and planning systems find themselves in a constant tug of war between strategic and financial considerations. The authors analyze these two opposing currents in business thinking, dissecting their differences and identifying their best practices. They also develop an approach that reconciles the two conflicting schools of thought – without watering down their differences. Schwenker und Spremann argue that both strategic and financial perspectives can serve as a compass in management's decision-making processes: Which perspective to choose depends on the phase of business. The authors distinguish four phases in the company lifecycle – phases in which the business must find the proper position, develop, grow and, ultimately, earn. In the first two phases, strategic considerations should take priority; in the latter two phases, financial considerations rule the day.

Make-to-Order Assembly Management Rainer Kolisch,2012-12-06 Purchasing .Fabrication Assembly Distribution Figure 1.1: Multi-Level Manufacturing System for Make-to-Order Products specific resources of a type, i.e., a certain machine or a single worker, the determination of the sequence operations are processed on a machine, and the assignment of start and finish times to operations. We will modify this framework to be specifically suited for multi level make-to-order manufacturing systems. We assume that the facility design issue is settled, i.e., the location and the layout of the facility as well as the capacity of the three main resource types of the company are determined. These resource types are the engineering department, the fabrication department, and the assembly department. The engineering department is concerned with the construction of new products as well as the modification and customization of existing products. This entails the generation of engineering documents such as blue prints for manufacturing. The capacity of the engineering department is determined by the count and qualification of engineers and by the availability of construction devices such as computer aided design (CAD) systems etc.

Managing Global Innovation Roman Boutellier,Oliver Gassmann,Maximilian von Zedtwitz,2013-06-29 Based on empirical research of over 240 interviews the authors present new concepts and trends in global R&D management. Case studies from 18 best-practice companies give detailed answers to the most pressing challenges for mastering international innovation. ...a real tour de force, probably destined to become a standard in this field for some time to come. Professor Jeff Huang, Harvard University A feast of delights... deserves a very wide readership. Phil Gamlen, ICI Technology - Science and Technology Policy Strategy

Pattern-Oriented Software Architecture, A System of Patterns Frank Buschmann,Regine Meunier,Hans Rohnert,Peter Sommerlad,Michael Stal,2013-04-22 Pattern-oriented software architecture is a new approach to software development. This book represents the progression and evolution of the pattern approach into a system of patterns capable of describing and documenting large-scale applications. A pattern system provides, on one level, a pool of proven solutions to many recurring design problems. On another it shows how to combine individual patterns into heterogeneous structures and as such it can be used to facilitate a constructive development of software systems. Uniquely, the patterns that are presented in this book span several levels of abstraction, from high-level architectural patterns and medium-level design patterns to low-level idioms. The intention of, and motivation for, this book is to support both novices and experts in software development. Novices will gain from the experience inherent in pattern descriptions and experts will hopefully make use of, add to, extend and modify patterns to tailor them to their own needs. None of the pattern descriptions are cast in stone and, just as they are borne from experience, it is expected that further use will feed in and refine individual patterns and produce an evolving system of patterns. Industrieentwicklung Franz Bosbach,John R. Davis,Andreas Fahrmeir,2009-12-22 Die Wettbewerbsfähigkeit der eigenen Industrie war (spätestens) seit dem 19. Jahrhundert immer wieder Gegenstand sorgenvoller Blicke auf eigene Schwächen und fremde Stärken. Am Beispiel britischer und deutscher Debatten der jüngeren Vergangenheit untersucht der Band Erfolg und Misserfolg unterschiedlicher Strategien von Maßnahmen zur Steigerung individueller Leistungsbereitschaft bis hin zu großen Reformprojekten wie dem Thatcherismus.

Beyond Theory Stephen Toulmin,Stephen Edelston Toulmin,Björn Gustavsen,1996 Action Research is one of the most practical and down-to-earth ways of doing research into working life. Beyond Theory draws on examples and actual cases to discuss action research within the framework of the modern, and postmodern, theory of science debate. While action research has been much criticized by the traditionalists, the book reflects a convergence between action research and positions emerging out of the critique of scientific traditionalism. Discussions between these two fields of knowledge, originally so very different, can enrich both. The book will be useful not only to researchers and academics but to anyone who is interested in the role and use of knowledge in social and organizational development.

Dental Erosion Adrian Lussi,2006-01-01 Erosive tooth wear is a multifactorial condition of growing concern to the clinician and is a subject of extensive research. This book is the first which deals in such detail with dental erosion. It presents the whole spectrum of views on the issue, from the molecular level to behavioral aspects, as well as trends in society. The multifactorial etiological pattern of erosive tooth wear is emphasized and is a strand connecting the different chapters of the book. Definition, diagnosis, prevalence, incidence and chemistry of dental erosion are discussed in the first part of the publication. Further, topics like extrinsic and intrinsic causes of dental erosion are covered and a chapter is devoted to dental erosion in children. Methods of assessment are presented and critically evaluated. The book concludes with themes on dental hypersensitivity, risk assessment and preventive measures and restorative options for erosive lesions. This publication is not only highly recommended to faculty members, researchers and dental students, but also to practitioners and other dental professionals who are committed to the prevention and treatment of dental erosion.

Design Methodology for Intelligent Technical Systems Jürgen Gausemeier,Franz Josef Rammig,Wilhelm Schäfer,2014-01-28 Intelligent technical systems, which combine mechanical, electrical and software engineering with control engineering and advanced mathematics, go far beyond the state of the art in mechatronics and open up fascinating perspectives. Among these systems are so-called self-optimizing systems, which are able to

adapt their behavior autonomously and flexibly to changing operating conditions. Self-optimizing systems create high value for example in terms of energy and resource efficiency as well as reliability. The Collaborative Research Center 614 Self-optimizing Concepts and Structures in Mechanical Engineering pursued the long-term aim to open up the active paradigm of self-optimization for mechanical engineering and to enable others to develop self-optimizing systems. This book is directed to researchers and practitioners alike. It provides a design methodology for the development of self-optimizing systems consisting of a reference process, methods, and tools. The reference process is divided into two phases the domain-spanning conceptual design and the domain-specific design and development. For the conceptual design a holistic approach is provided. Domain-specific methods and tools developed especially for the design and development of self-optimizing systems are described and illustrated by application examples. This book will enable the reader to identify the potential for self-optimization and to develop self-optimizing systems independently.
