**Structural Condition Assessment** Robert T. Ratay,2005-01-17 In *Structural Condition Assessment*, editor-in-chief Robert T. Ratay gathers together the leading people in the field to produce the first unified resource on all aspects of structural condition assessment for strength, serviceability, restoration, adaptive reuse, code compliance, and vulnerability. Organized by the four main stages of a structural evaluation, this book provides an introduction to structural deterioration and its consequences, the business and legal aspects of conducting an evaluation, initial survey and evaluation techniques for various structures, and specific tests for five of the most common structural materials (concrete, steel, masonry, timber and fabric.)

*Guideline for Condition Assessment of the Building Envelope* Structural Engineering Institute,2000-01-01 This Standard provides a guideline and methodology for assessing the condition and performance of existing building envelope systems and components, and identifying problematic and dysfunctional elements. As the adaptive reuse, rehabilitation, and improvement of existing buildings have assumed a more prominent role in meeting national needs, the ability to accurately assess the conditions of a building is imperative. The condition of the building envelope is most important since failures can result in safety and health problems, as well as structural damage. Proper evaluation of the building envelope is often the first step toward stabilization and rehabilitation of the building. This Standard is a compilation of basic information, procedures, and references, and will be an asset to the investigator developing a logical approach to the assessment of the building envelope in order to focus on fundamental defects rather than outward symptoms.

*Property Condition Assessment Handbook* Charles McClain,MR Charles Joseph McClain Aia,2013-04 Published in the early 1990s as the first book dedicated to the systematic evaluation of building systems, this handbook is designed to assist real estate investors, property owners and building professionals in establishing engineering assessment programs in order to make informed investment decisions and/or determine the financial and operational viability of properties. This 20th Anniversary Edition has been updated with hundreds of new component photographs, industry references, red flag commentary, forms to use as templates and building evaluation techniques. This hands-on guide establishes how to appraise structural, roofing, mechanical, plumbing, electrical, lighting and interior systems for defects, useful life and code violations, as well as how to rate the systems for remaining useful life. This book will show the reader how to establish and estimate costs for uncovered issues, and much, much more. Learn how to conduct a facility assessment from the ground up -- literally! This book is the only book you need -- it includes all of the information needed to inform on the process of building condition assessments, and will show you how go about conducting your own assessments while avoiding common mistakes and red flags.

**Condition Assessment of Aged Structures** J K Paik, R E Melchers, 2014-01-23 Any structural system in service is subject to age-related deterioration, leading to potential concerns regarding maintenance, health & safety, environmental and economic implications. Condition assessment of aged structures is an invaluable, single source of information on structural assessment techniques for marine and land-based structures such as ships, offshore installations, industrial plant and buildings. Topics covered include: - Current practices and standards for structural condition assessment - Fundamental mechanisms and advanced mathematical methods for predicting structural deterioration - Residual strength assessment of deteriorated structures - Inspection and maintenance of aged structures - Reliability and risk assessment of aged structures Professionals from a broad range of disciplines will be able to gain a better understanding of current practices and standards for structural condition assessment or health monitoring, and what future trends might be. Single source of information on structural assessment techniques for marine and land-based structures Examines the residual strength and reliability of aged structures Assesses current practices covering inspection, health monitoring and maintenance

**Managing Building Deterioration** Syamilah Yacob, Azlan Shah Ali, Cheong Peng Au-Yong, 2021-09-20 This book presents the results of a novel investigation into building deterioration and defects in Malaysia's public schools. It sets forth an in-depth theoretical and empirical underpinning the maintenance management of public schools with the view to develop a building deterioration prediction model of building condition based on factors contributing to building defects for school buildings. The approach adopted is mixed method encompassing archived documentation, questionnaire survey and interview of sampled schools in Malaysia. It presents a number of useful tables, graphs and statistical analysis which are useful in understanding the factors contributing to building defects under reference. The prediction model assists the decision making of maintenance management to be more efficient with comprehensive budgeting as well as optimal maintenance and repair work. The book is of relevance to school

managers, maintenance management practitioners and academics towards measuring and improving the building condition in schools.

**Seismic Evaluation of Existing Buildings** ,1993-07 Provides design professionals & local building officials with a standard methodology to evaluate buildings of different types & occupancies in areas of different seismicity throughout the U.S.

**Concrete Solutions** Michael Grantham,2016-09-19 Concrete Solutions contains the contributions from some 30 countries to Concrete Solutions, the 6th International Conference on Concrete Repair (Thessaloniki, Greece, 20-23 June 2016). Strengthening and retrofitting are major themes in this volume, with NDT and electrochemical repair following closely, discussing the latest advances and technologies in concrete repair. The book brings together some interesting and challenging theoretical approaches and questions if we really understand and approach such topics as corrosion monitoring correctly. Concrete Solutions is an essential reference work for those working in the concrete repair field, from engineers to architects and from students to clients. The Concrete Solutions Series of international conferences on concrete repair began in 2003 with a conference held in St. Malo, France in association with INSA Rennes. Subsequent conferences have seen the Series partnering with the University of Padua (Italy) in 2009, with TU Dresden (Germany) in 2011 and with Queen's University Belfast (Northern Ireland) in 2014. In 2016 Thessaloniki (Greece) hosted the conference, partnering with both Aristotle University of Thessaloniki (AUTH) and Democritus University of Thrace (DUTH). The next conference in the series will be held in 2019 in Istanbul.

*Sustainable Building with Earth* Horst Schroeder,2015-09-28 This book provides an insightful overview of the current state of earth building. The author approaches the subject from the perspective of the building material's life cycle, featuring in-depth explanations of the cycle's individual steps: extraction and classification of construction soil; production of earth building materials and earthen structures; planning, construction and renovation of earth buildings; and demolition and recycling of earthen structures. This unique resource provides examples of sophisticated earth building projects and illustrates the diverse applications of earth as a building material. Compared to conventional mineral building materials, earth possesses particularly positive ecological qualities such as its energy balance and recyclability. Architects, engineers, students, manufacturers and distributors of building materials, building contractors, building biologists, public authorities and preservationists will benefit from this book's ample coverage of restoring, optimizing and building with this material of the past, present and future.

**Rapid Visual Screening of Buildings for Potential Seismic Hazards: Supporting Documentation** ,2015 The Rapid Visual Screening (RVS) handbook can be used by trained personnel to identify, inventory, and screen buildings that are potentially seismically vulnerable. The RVS procedure comprises a method and several forms that help users to quickly identify, inventory, and score buildings according to their risk of collapse if hit by major earthquakes. The RVS handbook describes how to identify the structural type and key weakness characteristics, how to complete the screening forms, and how to manage a successful RVS program.

**Rethinking Sustainability Towards a Regenerative Economy** Maria Beatrice Andreucci,Antonino Marvuglia,Milen Baltov,Preben Hansen,2021 This open access book is based on work from the COST Action RESTORE - REthinking Sustainability TOwards a Regenerative Economy, and highlights how sustainability in buildings, facilities and urban governance is crucial for a future that is socially just, ecologically restorative, and economically viable, for Europe and the whole planet. In light of the search for fair solutions to the climate crisis, the authors outline the urgency for the built environment sector to implement adaptation and mitigation strategies, as well as a just transition. As shown in the chapters, this can be done by applying a broader framework that enriches places, people, ecology, culture, and climate, at the core of the design task - with a particular emphasis on the benefits towards health and resilient business practices. This book is one step on the way to a paradigm shift towards restorative

sustainability for new and existing buildings. The authors want to promote forward thinking and multidisciplinary knowledge, leading to solutions that celebrate the richness of design creativity. In this vision, cities of the future will enhance users' experience, health and wellbeing inside and outside of buildings, while reconciling anthropic ecosystems and nature. A valuable resource for scientists and students in environmental sciences and architecture, as well as policy makers, practitioners and investors in urban and regional development.

**Australian Residential Property Development for Investors** Ron Forlee, 2015-01-28 The all-in-one reference for the new residential real estate investor Australian Residential Property Development for Investors is the practical, step-by-step guide for beginners and experienced investors in the real estate and construction industries. From site selection to sale, this book walks you through each phase of the property development process to show you how careful planning can considerably enhance returns on your investment. This practical and effective guide features the latest information on development economics, the impact of electronic media, new cost-effective building methods, and a collection of case studies that illustrate these ideas in action. With a focus on practical outcomes, you'll learn how to approach the property from an investor's perspective to minimize risk and maximize returns. Australians have long had a love affair with residential property. We have one of the highest rates of home ownership in the world, and investing in residential real estate is a popular route to financial security. This book shows you how to make property development feasible within your time and budget constraints, netting you more profit and less headache. Select the site with the most profit potential, and find dependable financing. Work more effectively with contractors, councils, consultants, and solicitors. Apply standard monitoring and risk management techniques to your investment. Cost and market the improved property appropriately to target the right buyers. Newcomers are understandably overwhelmed by zoning, financing, construction, marketing, and everything else that goes into property development, frequently resulting in mistakes and missed profit. For the fledgling developer hoping to make the most of a new investment, Australian Residential Property Development for Investors provides all-in-one reference, with proven systems, techniques, and tools.

**Handbook of Facility Assessment** James E. Piper, 2021-01-20 First published in 2004. This practical guide is designed for facility and maintenance managers who are facing repair or replace decisions for their buildings. Filled with useful information and resources to aid in the decision process, this hands-on reference shows readers how to accurately rate the condition of existing equipment and components, effectively assess their options, and avoid making costly mistakes. Detailed step-by-step instructions are provided, along with forms listing specific criteria identified for rating each building component. Topics include the assessment process; building site, shell, and interior; HVAC, plumbing, electrical, transportation, and safety systems; and more.

Risk Management in Architectural Design Claudio Martani, 2014-09-11 This book analyzes the risk management process in relation to building design and operation and on this basis proposes a method and a set of tools that will improve the planning and evaluation of design solutions in order to control risks in the operation and management phase. Particular attention is paid to the relationship between design choices and the long-term performance of buildings in meeting requirements expressing user and client needs. A risk dashboard is presented as a risk measurement framework that identifies and addresses areas of uncertainty surrounding the satisfaction of particularly relevant requirements over time. This risk dashboard will assist both designers and clients. It will support designers by enabling them to improve the maintainability of project performance and will aid clients both in devising a brief that emphasizes the most relevant aspects of maintainability and in evaluating project proposals according to long-term risks. The results of assessment of the proposed method and tools in tests run on a number of buildings of worship are also reported.
