Research Methods for Counseling Robert J. Wright, 2013-02-12 Research Methods for Counseling: An Introduction provides a rich, culturally sensitive presentation of current research techniques in counseling. Author Robert J. Wright introduces the theory and research involved in research design, measurement, and assessment with an appealingly clear writing style. He addresses ways to meet the requirements of providing the data needed to facilitate evidence-based therapy and interventions with clients, and also explains methods for the evaluation of counseling programs and practices. This comprehensive resource covers a broad range of research methods topics including qualitative research, action research, quantitative research including, sampling and probability, and probability-based hypothesis testing. Coverage of both action research and mixed methods research designs are also included.

The SAFER-R Model George Everly, Jr., 2017-04 Psychological Crisis Intervention: The SAFER-R Model is designed to provide the reader with a simple set of guidelines for the provision of psychological first aid (PFA). The model of psychological first aid (PFA) for individuals presented in this volume is the SAFER-R model developed by the authors. Arguably it is the most widely used tactical model of crisis intervention in the world with roughly 1 million individuals trained in its operational and derivative guidelines. This model of PFA is not a therapy model nor a substitute for therapy. Rather it is designed to help crisis interventionists stabilize and mitigate acute crisis reactions in individuals, as opposed to groups. Guidelines for triage and referrals are also provided. Before plunging into the step-by-step guidelines, a brief history and terminological framework is provided. Lastly, recommendations for addressing specific psychological challenges (suicidal ideation, resistance to seeking professional psychological support, and depression) are provided.

S3-Leitlinie Verhinderung von Zwang: Prävention und Therapie aggressiven Verhaltens bei Erwachsenen Tilman Steinert, Sophie Hirsch, 2019-10-18 Die vorliegende S3-Leitlinie ist eine Querschnittsleitlinie, die für die Behandlung aller Arten von psychischen Störungen Relevanz haben kann. Sie beinhaltet eine Übersicht über die verfügbare Evidenz zur Behandlung aggressiven Verhaltens bei psychischen Erkrankungen und zur Verhinderung von Zwang in diesem Zusammenhang mit Empfehlungen, die von einem starken Konsens getragen sind. Die enthaltenen Themen sind häufig Gegenstand von Kontroversen zwischen den unterschiedlichen Akteuren in der psychiatrischen Versorgung, weshalb diese Leitlinie von einer interdisziplinären Expertengruppe erarbeitet wurde. Sie richtet sich an alle an der psychiatrischen Versorgung der Bevölkerung beteiligten Berufsgruppen: Psychiater, Psychologen, Psychotherapeuten in Wissenschaft und Praxis, Sozialarbeiter, Pflegepersonal, Juristen sowie Entscheidungsträger in Politik und Managementfunktionen im Gesundheitsbereich.

Safe Dates Vangie Foshee, Stacey Ann Langwick, 2010 According to the Centers for Disease Control and Prevention, every year, 1 in 4 adolescents experience verbal, physical, emotional, or sexual abuse from a dating partner. This evidence-based program helps teens recognize the difference between caring, supportive relationships and

controlling, manipulative, or abusive relationships. It is during the critical pre-teen and teen years that young people begin to learn the skills needed to create and foster positive relationships.

Parenting Matters National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children, 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Crisis Intervention in the Schools Gayle D. Pitcher, Scott Poland, 1992

Crisis Intervention Team (CIT) - Methods for Using Data to Inform Practice: A Step-by-Step Guide U.S. Department of Health and Human Services, 2019-03-17 The Crisis Intervention Team (CIT) program has become a globally recognized model for safely and effectively assisting people with mental and substance use disorders who experience crises in the community. The CIT Model promotes strong community partnerships among law enforcement, behavioral health providers, people with mental and substance use disorders, along with their families and others. While law enforcement agencies have a central role in program development and ongoing operations, a continuum of crisis services available to citizens prior to police involvement is part of the model. These other community services (e.g., mobile crisis teams, crisis phone lines) are essential for avoiding criminal justice system involvement for those with behavioral health challenges ? a goal of CIT programs (Steadman & Morrisette, 2016). CIT is just one part of a robust continuum of behavioral health services for the whole community.

Understanding Violence Against Women National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Panel on Research on Violence Against Women, 1996-06-07 Violence against women is one factor in the growing wave of alarm about violence in American society. High-profile cases such as the O.J. Simpson trial call attention to the thousands of lesser-known but no

less tragic situations in which women's lives are shattered by beatings or sexual assault. The search for solutions has highlighted not only what we know about violence against women but also what we do not know. How can we achieve the best understanding of this problem and its complex ramifications? What research efforts will yield the greatest benefit? What are the questions that must be answered? *Understanding Violence Against Women* presents a comprehensive overview of current knowledge and identifies four areas with the greatest potential return from a research investment by increasing the understanding of and responding to domestic violence and rape: What interventions are designed to do, whom they are reaching, and how to reach the many victims who do not seek help. Factors that put people at risk of violence and that precipitate violence, including characteristics of offenders. The scope of domestic violence and sexual assault in America and its consequences to individuals, families, and society, including costs. How to structure the study of violence against women to yield more useful knowledge. Despite the news coverage and talk shows, the real fundamental nature of violence against women remains unexplored and often misunderstood. *Understanding Violence Against Women* provides direction for increasing knowledge that can help ameliorate this national problem.

Children and Residential Experiences Martha J. Holden, 2009 The CARE practice model provides a framework for residential care based on a theory of how children develop, motivating both children and staff to adhere to routines, structures, and processes, minimizing the potential for interpersonal conflict. The core principles of the model have a strong relationship to positive child outcomes, and can be incorporated into a wide variety of programs and treatment models.

Preventing HIV Transmission National Research Council and Institute of Medicine, Institute of Medicine, Panel on Needle Exchange and Bleach Distribution Programs, 1995-09-14 This volume addresses the interface of two major

national problems: the epidemic of HIV-AIDS and the widespread use of illegal injection drugs. Should communities have the option of giving drug users sterile needles or bleach for cleaning needs in order to reduce the spread of HIV? Does needle distribution worsen the drug problem, as opponents of such programs argue? Do they reduce the spread of other serious diseases, such as hepatitis? Do they result in more used needles being carelessly discarded in the community? The panel takes a critical look at the available data on needle exchange and bleach distribution programs, reaches conclusions about their efficacy, and offers concrete recommendations for public policy to reduce the spread of HIV/AIDS. The book includes current knowledge about the epidemiologies of HIV/AIDS and injection drug use; characteristics of needle exchange and bleach distribution programs and views on those programs from diverse community groups; and a discussion of laws designed to control possession of needles, their impact on needle sharing among injection drug users, and their implications for needle exchange programs.
