Kuwabara Payne McKenna Blumberg Architects ,2013-10-24 Kuwabara Payne McKenna Blumberg Architects, founded in 1987 in Toronto, is one of most innovative architectural offices in North America today. They have made a name for themselves both for their integrated design process embodying collaboration with experts, clients and future users as well as the diversity of their aesthetically refined and finely detailed designs. The work ranges from cultural institutions such as the Toronto International Film Festival and Orchestra Hall in Minneapolis to ecologically innovative concepts such as Manitoba Hydro Place in Winnipeg, developed with leading climate engineers Transsolar of Stuttgart. A respectful approach toward the integration of heritage buildings is also a characteristic feature, illustrated by the designs for the Royal Conservatory and the Gardiner Museum in Toronto. Finally, educational and research facilities are also a strong focus in KPMB's work exemplified by the Centre for Innovation and Governance Campus in Waterloo, Ontario, and the Joseph L. Rotman School of Management in Toronto, as well as future projects for the Massachusetts Institute for Technology (MIT) and Princeton University in the United States.

Generating Business Referrals Without Asking Stacey Brown Randall,2018-07-03 “Clear, creative, compelling . . . This book is a must read for anybody who wants to power their business through high-octane referrals.” –Ken Samuelson, Principle, The Morehead Group Every business needs referrals from satisfied clients. A good referral can lead to a closed sale faster and easier than any other lead. But let’s face it. Asking for referrals can be awkward. And asking is often ineffective. That’s why Stacey Brown Randall developed a method of getting referrals—without asking. In her book *Generating Business Referrals Without Asking*, she shares her system for revolutionizing any business. Her structured approach reduces the hustle and increases productivity and profit. With Randall’s system, you can stop wasting time and money marketing to cold leads and stalking would-be clients on social media. And you can start doing what you love most—providing the excellent service that made you go into business in the first place. In *Generating Business Referrals Without Asking*, you’ll get Randall’s five steps to steady business growth, case studies from business professionals, and a step-by-step roadmap that even the busiest business owner can implement. “Stacey shows you how to unleash a referral explosion by turning your referral strategy on its head . . . You will also learn the steps on how to build a referral generation plan that you can follow for years to come, bringing in more referrals than you can imagine.” –Pat Hiban, New York Times–bestselling author of *6 Steps to 7 Figures*

Strengthening Forensic Science in the United States National Research Council,Division on Engineering and Physical Sciences,Committee on Applied and Theoretical Statistics,Policy and Global Affairs,Committee on Science, Technology, and Law,Committee on Identifying the Needs of the Forensic Sciences Community,2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science

community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
