Chris De Feyter

Art, Fine Motor, and Cognitive Ideas for Special Education Susan J. Smith, 1986 The book's practical classroom strategies and activities are designed to help teachers individualize instruction for children with developmental ages of 3-7 years. Part I offers suggestions for organizing the special educator's schedule and workload (including such topics as reviewing the individualized education program, developing a weekly schedule, homework assignments, and classroom assistance from parents and volunteers). In Part II, suggestions are offered for opening lines of communication in the classroom without increasing the noise level (including sections on the daily schedule, individual prescriptions, silently requesting help, restroom passes, weekly chore board, and classroom rules). Thirty visual motor learning activities are outlined in Part III, and 18 long-term art projects are described in Part IV. Finally, Part V presents nine hands-on bulletin board ideas that the teacher can adapt to meet various learning objectives. Each activity is arranged according to objectives, materials needed, preparation, and procedural steps. (JW)

In Like a Lion Out Like a Lamb Marion Dane Bauer, 2012-01-02 A fresh take on a familiar saying, perfect for the first rainy days of spring. Rattling windows with the roar of a late-winter storm, March shows up like a lion--wild and messy, muddy and wet. In rhythmic, exuberant text, Newbery Honor-author Marion Dane Bauer conveys the changeable nature of spring weather, as the lion makes way for the lamb--with a huge sneeze!--as the trees and flowers spring into bloom. Full of humor and motion, Caldecott-winning illustrator Emily Arnold McCully's soft watercolors bring the blustering lion and gentle lamb to life. From hail and wet snow to vibrant green fields full of blossoms, the illustrations grow brighter, springing into new life--and hinting and the summer to come. The lively text and paintings illustrate the ways in which we personify spring weather, making this book a perfect introduction to figurative language--and lots of fun to read as well.

Developmental coordination disorder (DCD) is frustrating for the children who must deal with it every day, for their parents, and for the professionals who work with these children. Children with Developmental Coordination Disorder offers new hope to children who are experiencing this distinctive movement skill syndrome. It suggests ways they can overcome the challenges they encounter wherever motor skills are needed: in the classroom, on the playground, and at home doing self-care. This groundbreaking volume challenges pediatric therapists to examine the assessment and intervention approaches that are currently being used with children who have DCD. Children with Developmental Coordination Disorder offers new model that draws on research in the fields of motor learning, educational psychology, cognitive strategies, and occupational therapy. In addition to theoretical background, this book provides a detailed protocol for CO-OP (Cognitive Orientation to Daily Occupational Performance), an intervention that has been shown to facilitate problem-solving and enhance motor skill acquisition for children with DCD. Children with Developmental Coordination Disorder offers a comprehensive discussion of the disorder, including: identification and assessment of children with DCD analysis of the Bruininks Oseretsky Test of Motor Proficiency and the Movement Assessment Battery for Children the theoretical and empirical basis for current treatment approaches new motor learning theories and their implications for treatment the systematic development and evaluation of the CO-OP approach, from early case studies through videotape analysis and retrospective chart review Based on six years of systematic, cooperative research, Children with Developmental Coordination

Disorder demonstrates the success of a unique cognitive approach to intervention with these frustrated children.

Learning disabilities screening and evaluation guide for low- and middle-income countries Anne M. Hayes, Eileen Dombrowski, Allison H. Shefcyk, Jennae Bulat, 2018-04-29 Learning disabilities are among the most common disabilities experienced in childhood and adulthood. Although identifying learning disabilities in a school setting is a complex process, it is particularly challenging in low- and middle-income countries that lack the appropriate resources, tools, and supports. This guide provides an introduction to learning disabilities and describes the processes and practices that are necessary for the identification process. It also describes a phased approach that countries can use to assess their current screening and evaluation services, as well as determine the steps needed to develop, strengthen, and build systems that support students with learning disabilities. This guide also provides intervention recommendations that teachers and school administrators can implement at each phase of system development. Although this guide primarily addresses learning disabilities, the practices, processes, and systems described may be also used to improve the identification of other disabilities commonly encountered in schools.

Occupational Therapy Practice Guidelines for Early Childhood Gloria Frolek Clark,Karrie Kingsley,2013-01-01 Currently in the United States, 20% of children ages 6 years or younger live in poverty. Poor children have fewer opportunities than their peers to resources that are important for child development. At the same time, the prevalence of developmental disabilities has increased to 1 in every 6 children. Early identification of developmental delays is critical, and more than half of all American parents do not know the warning signs. Occupational therapy professionals in early intervention and preschool practice can provide the necessary services to support children's health in early childhood. This Practice Guideline explains the occupational therapy process for young children--and their families, caregivers, and teachers--which includes evaluation, intervention, and outcomes planning to enhance a child's occupational performance, adaptation, health and wellness, community participation, role competence, and self-advocacy. Topics include social-emotional development; feeding, eating, and swallowing; cognitive and motor development; service delivery; autism; obesity, cerebral palsy; and parent training. This work can help occupational therapy practitioners, as well as those who manage, reimburse, or set policy regarding occupational therapy services, understand the contribution of occupational therapy in evaluating and serving young children. This guideline can also serve as a resource for parents, school administrators, educators, and other early childhood staff.
