Cross-Border Infringement of Personality Rights via the Internet Symeon C. Symeonides, 2021-01-11 Conflicts of laws arising from injuries to rights of personality—such as defamation or invasion of privacy—have always been difficult, if only because they implicate conflicting societal values about the rights of freedom of speech and access to information, on the one hand, and protection of reputation and privacy, on the other hand. The ubiquity of the internet has dramatically increased the frequency and intensity of these conflicts. This book explores the ways in which various Western countries have addressed these conflicts, but also advances new, practical ideas about how these conflicts should be resolved. These ideas are part of an international model law unanimously adopted by a Resolution of the Institut de droit international, which addresses jurisdiction, choice of law, and recognition and enforcement of foreign judgments. The book provides extensive article-by-article commentary, which explains the philosophy and intended operation of the Resolution.

Pathologie infectieuse et démarche de soins François Pebret, Maryse Veron, 1996 Destiné aux étudiants en soins infirmiers ainsi qu'aux professionnels en contact avec les personnes touchées par le VIH, cet ouvrage expose les connaissances de base, traite des dimensions sociales, psychologiques et juridiques de la maladie, présente la méthode de la démarche de soin et les diagnostics infirmiers. Roger Charbonney (octobre 1997).

Les personnalités pathologiques GUELFY Julien-Daniel, HARDY Patrick, 2013-07-01 Depuis la fin du XIXe siècle, l'intérêt des psychiatres et des psychologues pour les personnalités pathologiques ne s'est jamais démenti. Cependant, ces dix dernières années ont été fortement marquées par une nette progression des connaissances sur les troubles de la personnalité, acquises dans des champs aussi divers que l'épidémiologie clinique, la psychopathologie, la génétique, l'étude des tempéraments et des traits ou encore la thérapeutique. Cette évolution s'est accompagnée d'une intensification des débats portant, notamment, sur l'évaluation et la classification complexes de ces troubles. Face aux différentes questions soulevées par ces avancées, cet ouvrage a pour principal objectif de faire une mise à jour concise et complète de l'état des connaissances sur le sujet. Les différentes approches de la personnalité sont abordées, du normal au pathologique, tout en envisageant les problèmes de classification et d'évaluation posés par ces troubles. Puis, chaque personnalité – son épidémiologie et son évolution – est analysée en détail, ainsi que ses rapports avec les autres pathologies mentales. Enfin, une large place est faite aux aspects thérapeutiques et médico-légaux.

McLean Screening Instrument for Borderline Personality Disorder (MSI-BPD) Director Laboratory for the Study of Adult Development McLean Hospital Belmont Massachusetts Associate Professor of Psychology Harvard Medical School Boston Massachusetts Mary C Zanarini, Ed.D, Mary C. Zanarini, 2008-06 The McLean Screening Instrument-BPD is a 10-item, yes/no, self-report patient screening scale. It is used with an undiagnosed population to identify people who need further evaluation for BPD. The scale demonstrates strong sensitivity (the degree to which it correctly identifies patients who do have the disorder), as well as strong specificity (the degree to which it correctly identifies patients who do not have the disorder).

Addictions chez l'enfant et l'adolescent G. Picherot, C. Stheneur, 2014-07-07 L'abord pédiatrique des addictions de l'enfant et de l'adolescent est peu fréquent. Pourtant, les pédiatres, les médecins généralistes et autres soignants sont, autant que les pédopsychiatres, confrontés aux risques d'addictions. Après les données épidémiologiques, psychopathologiques et sociales, sont abordées les conséquences des addictions parentales sur le fœtus et l'enfant. Les consommations de produits licites et illicites sont ensuite détaillées (alcool, tabac, cannabis, autres drogues). Une grande part est faite aux anorexies mentales restrictives et aux addictions sans substance : écrans, jeux de hasard et sport, sans oublier les jeux d'évanouissement rarement associés aux problématiques d'addiction et néanmoins marqués par leur répétition et leur gravité. Prendre en charge l'enfant ou l'adolescent, c'est aussi travailler avec les familles, les associations et l'école. On peut dans ces domaines développer des expériences originales à inscrire dans l'organisation des soins. La prévention et les soins sont proches mais la bonne volonté ne suffit pas, la recherche doit être encore active pour ces pathologies encore trop souvent incomprises.

Handbook of Good Psychiatric Management for Borderline Personality Disorder John G. Gunderson, 2014-01-15 The diagnosis and treatment of patients with BPD can be fraught with anxiety, uncertainty, and complexity. How welcome, then, is the Handbook of Good Psychiatric Management for Borderline Personality Disorder, which teaches clinicians what to do and how to do it, as well as what not to do and how to avoid it. The author, a renowned researcher and clinician, has developed a new evidence-based treatment, Good Psychiatric Management (GPM) that comfortably utilizes cognitive, behavioral, and psychodynamic interventions that are practical and simple to implement. Because psychoeducation is an important component of GPM, the book teaches clinicians how to educate their patients about BPD, including the role of genetics and the expected course of the disease. This approach offers advantages both to practitioners, who become more adept at honest communication, and to patients, who are encouraged to have realistic hopes and to focus on strategies for coping with BPD in daily life. The book is structured for maximum learning, convenience, and utility, with an impressive array of features. Section I provides background on BPD, including the myths that sometimes discourage clinicians from treating these patients and that hamper the effective treatment of the disorder. Section II, the GPM Manual, provides a condensed and clear description of the most essential and specific GPM interventions that clinicians can learn from and use in everyday practice. Section III, the GPM Workbook, offers case vignettes which reference chapters from the manual. Each vignette has a number of decision points where alternative interventions are proposed and discussed. To further facilitate learning, a set of nine interactions is found in a series of online video demonstrations. Here, readers can see in vivo illustrations of the GPM model in practice. Finally, a set of appendices provides critical information, such as a comparison of GPM with other evidence-based treatments of BPD, scaling risk and response strategies, and family guidelines. Designed to be a basic case management text for all hospital, outpatient clinic, or office-based psychiatrists or mental health professionals who assume primary responsibility for the treatment of those with BPD, the Handbook of Good Psychiatric Management for Borderline Personality Disorder constitutes a breakthrough in the treatment of these often misunderstood patients.

Visiteurs du soi (Les) Jean Cottraux, 2004 « La psychiatrie et la psychologie font désormais partie de notre panorama quotidien. Elles sont révélatrices des inquiétudes, des désirs et des attentes d'un nombre croissant d'hommes et de femmes. Encore marginales il y a trente ans, les psychothérapies se banalisent au point d'apparaître comme un phénomène de société. Mais la recherche de soi passe-t-elle nécessairement par la rencontre avec un psy ? Après tout, l'humanité a bien vécu sans psy durant des millénaires et elle s'en est très bien portée. Que doit-on attendre réellement des psychothérapies ? Et comment se servir au mieux des psys ? » J. C. Psychiatre, enseignant à l'université Lyon-I, Jean Cottraux dirige l'Unité de traitement de l'anxiété de l'hôpital neurologique au CHU de Lyon. Ancien président de l'Association européenne de thérapie comportementale, Founding Fellow de l'Académie de thérapie cognitive de Philadelphie, il a notamment publié *Les Ennemis intérieurs* et *La Répétition des scénarios de vie*.

Les Borderlines Bernard Granger, Daria Karaklic, 2012-01-12 Une personnalité borderline, c'est quelqu'un qui est d'humeur changeante, qui a des émotions intenses et excessives, une altération de la perception et du raisonnement. Elle peut éprouver un sentiment d'abandon, de persécution, voire de vide, s'automutiler, et même attenter à sa vie. Que faire alors si on est soi-même borderline ou si un proche l'est ? À qui s'adresser ? Quel doit être le comportement de l'entourage ? Dans ce livre, Bernard Granger et Daria Karaklic montrent que la dégradation, la violence et l'autodestruction ne sont pas une fatalité. Des solutions sont possibles et ce trouble a même de grandes chances d'être surmonté à condition qu'on soit bien soigné. Le professeur Bernard Granger est psychiatre et psychothérapeute, membre de l'Association française de thérapies cognitives et comportementales, professeur à l'université Paris-Descartes et responsable de l'unité de psychiatrie de l'hôpital Tarnier (Assistance publique-Hôpitaux de Paris). Daria Karaklic est docteur en psychologie clinique, attachée d'enseignement et de recherche en psychopathologie à l'Institut de psychologie de l'université Paris-Descartes.

Sexual Murderers Jean Proulx, Eric Beauregard, Maurice Cusson, Alexandre Nicole, 2007-09-10 Little is known about Sexual Murderers – those who kill in a sexual context. Recent studies have compared their backgrounds and characteristics with that of rapists and/or violent (non-sexual) offenders. This translation of a French original by the renowned Jean Proulx challenges existing knowledge on sexual murders, offers new tools for profiling and interrogation, and helps to establish a new research base. Current theories of sexual murder, its prevalence, reasons including attachment theories, profiling and interrogation techniques are all addressed in Proulx's distinctive, thought-provoking style.

Treatment of Personality Disorders Jan J.L. Derksen, Cesare Maffei, Herman Groen, 2013-03-09 It has been almost twenty years since DSM-III created a major shift in psychiatric classification procedures and in diagnostic and treatment practice by introducing the multi-axial system and, for our patients specifically, the Axis II: Personality Disorders. Researchers and clinicians were forced to focus on many issues related to the field of personality and its disorders. This meant an immense impetus for research, both empirical and theoretical. Many recent developments are described in this book, as reviews or as original articles. This book also covers developments in Europe as well as in North America. Important questions still remain unanswered, such as: What is the relationship between the different clusters: A, B, & C? Are we talking about dimensions, categories, or typologies? What can be done for patients who have more than one personality disorder? Is a pro typical approach required? Consequently, is a multiconceptual approach in treatment and research required? The authors contribute to this discussion and provide guidelines for further thinking in research and treatment planning. For clinicians, it is of major importance to know whether the disorder can be influenced by treatment, and whether permanent change is really possible. A very important question is whether a person indeed has a personality disorder, and how this diagnosis affects clinical practice.

Traité Européen de psychiatrie de l'enfant et de l'adolescent FERRARI, 2012-09-01 L'objectif du Traité européen de psychiatrie et de psychopathologie de l'enfant et de l'adolescent est de proposer une étude rigoureuse et fine du développement psychologique, de ses perturbations et des troubles psychiatriques qui peuvent survenir chez l'enfant depuis la période périnatale jusqu'à l'adolescence, ce faisant d'identifier les facteurs qui participent à leur genèse ou à leur pérennisation : facteurs neurobiologiques, génétiques, impact des milieux familial ou socioculturel dans lesquels vit l'enfant et des interactions qu'il entretient avec ceux-ci, voire parfois de certaines conséquences de pathologies somatiques préexistantes... Les différentes approches théoriques,

étiologiques, diagnostiques et thérapeutiques sont présentées par des praticiens venus de différents pays européens, tous reconnus pour leurs compétences quant aux questions exposées, mais aussi pour la diversité de leurs expériences personnelles, permettant la confrontation de celles-ci, dans le champ d'une pédopsychiatrie, vaste, diversifiée et surtout ouverte. Les champs recouverts explorent six grands axes : les différents aspects du développement de l'enfant et de l'adolescent (psychoaffectif, sensoriel, de l'attachement, du langage, de l'identité sexuelle...) ; · l'examen et l'évaluation de l'enfant et de l'adolescent (examen clinique, psychologique, cognitif, neuropsychologique, psychomoteur, du langage...) ; · la psychiatrie périnatale (celle de la vie fœtale, des premières interactions parents-nourrisson...) ; · les grandes catégories nosographiques ; · l'organisation de la psychiatrie infantile dans les pays européens ; · les différentes modalités de la prise en charge (les différentes psychothérapies, les différents modes de rééducation cognitives, psychomotrices, de langage, les questions liées aux apprentissages scolaires, les traitements médicamenteux, les aspects législatifs de la protection de l'enfant et de l'adolescence...). Les deux grandes originalités de cet ouvrage sont : · l'importance accordée à l'approche psychopathologique comme mode de compréhension des processus psychiques à l'œuvre, au-delà d'une unique référence à la seule symptomatologie repérable en première approche clinique ; · l'importance accordée à la diversité de l'approche européenne, tant dans l'organisation des soins que dans l'impact des modèles socioculturels de chaque pays dans la compréhension de la psychopathologie de l'enfant et de l'adolescent.
