The Chatter of the Visible Patrizia C. McBride, 2016-03-22 The Chatter of the Visible examines the paradoxical narrative features of the photomontage aesthetics of artists associated with Dada, Constructivism, and the New Objectivity. While montage strategies have commonly been associated with the purposeful interruption of and challenge to narrative consistency and continuity, McBride offers an historicized reappraisal of 1920s and 1930s German photomontage work to show that its peculiar mimicry was less a rejection of narrative and more an extension or permutation of it—a means for thinking in narrative textures exceeding constraints imposed by “flat” print media (especially the novel and other literary genres). McBride’s contribution to the conversation around Weimar-era montage is in her situation of the form of the work as a discursive practice in its own right, which affords humans a new way to negotiate temporality, as a particular mode of thinking that productively relates the particular to the universal, or as a culturally specific form of cognition.

Bicycle Diaries David Byrne, 2010-09-28 ...an engaging book: part diary, part manifesto. The Guardian A round-the-world bicycle tour with one of the most original artists of our day. Urban bicycling has become more popular than ever as recession-strapped, climate-conscious city dwellers reinvent basic transportation. In this wide-ranging memoir, artist/musician and co-founder of Talking Heads David Byrne—who has relied on a bike to get around New York City since the early 1980s—relates his adventures as he pedals through and engages with some of the world's major cities. From Buenos Aires to Berlin, he meets a range of people both famous and ordinary, shares his thoughts on art, fashion, music, globalization, and the ways that many places are becoming more bike-friendly. *Bicycle Diaries* is an adventure on two wheels conveyed with humor, curiosity, and humanity.

Goethe’s Faust and the Divan of Ḥāfiẓ Hiwa Michaeli, 2019-10-21 This book explores the poetic articulations of a shift from a transcendent to an immanent worldview, as reflected in the manner of evaluation of body and soul in Goethe’s *Faust* and Ḥāfiẓ’ *Divan*. Focusing on two lifeworks that illustrate their authors’ respective intellectual histories, this cross-genre study goes beyond the textual confines of the two poets’ *Divans* to compare important building blocks of their intellectual worlds.

Knowledge, Science, and Literature in Early Modern Germany Gerhild Scholz Williams, Stephan K. Schindler, 1996 Focusing on knowledge, science and literature in early modern Germany, this collection presents 12 essays on emerging epistemologies regarding: the transcendent nature of the Divine; the natural world; the body; sexuality; intellectual property; aesthetics; demons; and witches.

Being and Time Martin Heidegger, 1962 A new 2024 translation of Martin Heidegger's major work *Being and Time* (*Sein und Zeit*), originally published in 1927 in multiple publications. This edition contains a new afterword by the Translator, a timeline of Heidegger's life and works, a philosophic index of core Heideggerian concepts and a guide for terminology across 19th and 20th century Existentialists. This translation is designed for readability and accessibility to Heidegger's enigmatic and dense philosophy. Complex and specific philosophic terms are translated as literally as possible and academic footnotes have been removed to ensure easy reading. *Being and Time* presents a complex philosophical discourse on the nature of being (*Sein*) and time (*Zeit*), focusing in particular on the temporal-existentialist concept of *Dasein*, a term that combines the German words for to be (*sein*) and there (*da*). This classic philosophic work examines the traditional metaphysical understanding of being, arguing that this understanding, typically based on the idea of a constant presence, fails to account for the temporal and existential dimensions of being. Heidegger proposes that an understanding of being requires an analysis of *Dasein*, which is characterized not only by its existence, but also by its being in the world and its temporal existence. The concept of *Dasein* is central to his argument, emphasizing that *Dasein* is always already situated in a world, and its understanding of being is shaped by its temporal existence. This perspective challenges traditional metaphysical notions of being as static and unchanging, proposing instead that being is fundamentally temporal and connected to human existence and understanding. As the title suggests, Heidegger sees the question of Being as indistinguishable from Time, arguing that Newtonian conceptions of time as a series of now-points are inadequate for understanding the being of *Dasein*. His *Ontochronology* argues that the existential and ontological analysis of *Dasein* reveals a more fundamental concept of time, one that is integral to the structure of Being itself. The text further elaborates on the idea of thrownness and several other existentialist themes. Thrownness is one of the three conditions that signifies *Dasein*'s immersion in the world, where it finds itself already entangled in a web of relations and meanings. This thrownness, combined with *Dasein*'s inherent being-toward-death, underscores the existential condition of human beings, framing their existence as a continual engagement with their own finitude and the possibilities of their being. Heidegger posits that understanding the nature of being requires a fundamental rethinking of both being and time, dogmatically stating that the true nature of being can only be grasped through an understanding of the temporality that characterizes the existence of being.

The Economics of Ecosystems and Biodiversity: Ecological and Economic Foundations Pushpam Kumar, 2012-12-20 Human well-being relies critically on ecosystem services provided by nature. Examples include water and air quality regulation, nutrient cycling and decomposition, plant pollination and flood control, all of which are dependent on biodiversity. They are predominantly public goods with limited or no markets and do not command any price in the conventional economic system, so their loss is often not detected and continues unaddressed and unabated. This in turn not only impacts human well-being, but also seriously undermines the sustainability of the economic system. It is against this background that TEEB: The Economics of Ecosystems and Biodiversity project was set up in 2007 and led by the United Nations Environment Programme to provide a comprehensive global assessment of economic aspects of these issues. This book, written by a team of international experts, represents the scientific state of the art, providing a comprehensive assessment of the fundamental ecological and economic principles of measuring and valuing ecosystem services and biodiversity, and showing how these can be mainstreamed into public policies. This volume and subsequent TEEB outputs will provide the authoritative knowledge and guidance to drive forward the biodiversity conservation agenda for the next decade.

Chaos Bound N. Katherine Hayles, 2018-03-15 N. Katherine Hayles here investigates parallels between contemporary literature and critical theory and the science of chaos. She finds in both scientific and literary discourse new interpretations of chaos, which is seen no longer as disorder but as a locus of maximum information and complexity. She examines structures and themes of disorder in *The Education of Henry Adams*, Doris Lessing’s *Golden*

Notebook, and works by Stanislaw Lem. Hayles shows how the writings of poststructuralist theorists including Barthes, Lyotard, Derrida, Serres, and de Man incorporate central features of chaos theory.

The Sleepwalkers Hermann Broch,2023-02-15 First published in the US in 1932, The Sleepwalkers is about three protagonists sleepwalking, that is, living between vanishing and emerging ethical systems just as the somnambulist exists in a state between sleeping and waking. Together they present a panorama of German society and its progressive deterioration of values that culminated in defeat and collapse at the end of World War I. The novel explores what Broch described as the loneliness of the I in its three parts. The protagonists of the first two parts of the book are represented as holding to certain sets of values. Broch describes the struggles they undergo as their codes for living, or values, prove inadequate to the realities of the social environment they find themselves in. Joachim von Pasenow in the first part is the romantic. In the second part, August Esch tries to live according to the motto business is business. Eventually, in the third part, the amoral Huguenau's only standard for behavior is his personal profit. He follows this maxim in all his actions, swindling and murdering without remorse. Ultimately, he reaches a point of zero values without remorse and his dealings bring him finally to the zero point of values. Although Broch doesn't hold Huguenau up as someone to admire, he does present him as the inevitable harbinger of fascism. As one reviewer noted, His characters are sleepwalkers because their own lives are shaped by the forces of the nightmare reality in which they live.

The Stages of Higher Knowledge Rudolf Steiner,2009-08 What does it mean to be human? Human development unfolds in a twofold way. On the one hand, there is an ever-more profound incarnation, or inhabitation, of the physical body. On the other hand, there is the increasing discrimination of the individual objects of the world. Difficulties and obstacles along this path can lead to so-called disabilities. König's approach to curative education allows us to see these disabilities as meaningful ways of coping with or resolving the various problems that arise in living in a physical body. From this point of view, disabilities are exaggerated forms of ways we all use to cope with life. The point is not only to see the deviations, but to see them against the mighty backdrop of a comprehensive child anthropology. Being Human presents the outline of just such a comprehensive anthropology. Being Human is of value not only to those working in special education, but to anyone interested in the dynamics of incarnation and normal development.

Hermann Hesse Hermann Hesse,2013-01-22 Hermann Hesse: A Pictorial Biography offers a wealth of unknown photographic and textual material which was first discovered among Hesse's literary effects after his death. Over 200 photographs chronicle his family background, his school and apprentice years, his first literary efforts and initial successes, his travels to India and throughout Europe, his continuing growth as a writer. These photographs, apart from illustrating Hesse's long and varied life, amply document his position in the cultural life of his time and his relationships with celebrated contemporaries. The photographs are accompanied by a brief text prepared by Volker Michels, a leading Hesse scholar, which includes comments about Hesse from such writers as Thomas Mann, Martin Buber, T.S. Eliot, and Andre Gide, examples of Hesse's unpublished light verse, and a detailed chronological table. Hesse's own essay Life Story Briefly Told serves as an introduction. Together, text and pictures provide the Hesse reader with new tools to interpret and evaluate the life and works of this exceptional man and artist.

Action- and production-oriented literature lessons Nina Bergner,2022-02-07 Seminar paper from the year 2003 in the subject Didactics - German - Pedagogy, Linguistics, grade: 1,0, University of Würzburg, language: English, abstract: In writing didactics, the action and production-oriented approach has a central position today. The beginnings of the teaching concept lie in the 1970s, although there were already tendencies towards this type of writing lessons before that. In the 1990s, action and production orientation found its way into curricula; writing on texts is now an integral part of German lessons. In the following, after a clarification of terms, the most important basic principles of action- and production-oriented literature lessons are to be shown and on the basis of which the necessity of action- and production-oriented German lessons is to be justified. The historical development is then shown and finally some of the action- and production-oriented methods for teaching are presented. The conclusion of the work should be a specially devised project to show how forms of action and production orientation can be realized in the classroom. Schiller's drama Maria Stuart was chosen for this purpose.

Contingency and Normativity: The Challenges of Richard Rorty Rosa Maria Calcaterra,2019-03-27 Contingentism depicts normativity as one of our human effective possibilities rather than as a metaphysical bottleneck which we should necessary fulfill. The book is a critical survey of Richard McKay Rorty's "neo-pragmatism", in the light of various theoretical arguments as well as of his own resourceful attempts to renew philosophy from within its practice.

Autobiographical Writings Hermann Hesse,1972-01 Hesse narrates his own life and describes the spiritual crises which underlie his major works.

Secondary Education for All R. H. Tawney,1988-07-01 Secondary Education for All cannot be considered independently from the life and career of its author, R. H. Tawney. Written in 1922 in time for the general election, it is the Labour party's first major statement on adolescent education. It reflects the historical insights and ardent political convictions of an economic historian turned socialist, and helped to bring the issue of education reform from the periphery of politics to a more central position. Through the introduction of free secondary education for all, Tawney hoped to rid education of class inequality over a generation. This is a classic and influential text which acted as a springboard for educational advance which reflects the growing educational and political debate of 1920s Britain.
