Cinemas, Identities and Beyond D. H. Fleming, Cheung Ruby, 2020-07-13 *Cinemas, Identities and Beyond* examines different modes of representing and constructing identities in and through the medium of film, transcending the narrow confines of the local / national / regional, and challenging spatial and temporal boundaries. It gathers fifteen essays that explore different dimensions of identities in contexts ranging from domestic spheres, urban milieus, socio-political environments, diasporic film-making issues, anthropology, film festivals, and psychoanalysis, to the examination of stardom in society. Engaging with cinematic representations, narrative conventions, film form, industry concerns, and other socio-cultural-economic-political factors relating to the production, distribution, exhibition and consumption of film, *Cinemas, Identities and Beyond* contributes to one of the most thought-provoking contemporary debates on cinemas and identities in film studies. Revisiting films such as *Farewell My Concubine*, *The Matrix* trilogy, *The Straight Story*, *El Topo*, and *Days of Being Wild*, this anthology establishes a framework that actively queries stabilised, ideological paradigms. The book discovers new frontiers and discourses to help us better understand ourselves and our surroundings when another decade of the new millennium is about to begin. *Cinemas, Identities and Beyond* will prove to be of value to a broad range of scholars, critics and students who are interested in issues pertaining to identities, and their construction in and beyond film.

Classification as a Tool for Research Hermann Locarek-Junge, Claus Weihs, 2010-08-03 *Clustering and Classification, Data Analysis, Data Handling and Business Intelligence* are research areas at the intersection of statistics, mathematics, computer science and artificial intelligence. They cover general methods and techniques that can be applied to a vast set of applications such as in business and economics, marketing and finance, engineering, linguistics, archaeology, musicology, biology and medical science. This volume contains the revised versions of selected papers presented during the 11th Biennial IFCS Conference and 33rd Annual Conference of the German Classification Society (Gesellschaft für Klassifikation - GfKl). The conference was organized in cooperation with the International Federation of Classification Societies (IFCS), and was hosted by Dresden University of Technology, Germany, in March 2009.
