Burroughs Unbound S. E. Gontarski, 2021-11-18 In addition to contributing significantly to the growing field of Burroughs scholarship, Burroughs Unbound also directly engages with the growing fields of textual studies, archival research, and genetic criticism, asking crucial questions thereby about the nature of archives and their relationship to a writer's work. These questions about the archive concern not only the literary medium. In the 1960s and 1970s Burroughs collaborated with filmmakers, sound technicians, and musicians, who helped re-contextualized his writings in other media. Burroughs Unbound examines these collaborations and explores how such multiple authorship complicates the authority of the archive as a final or complete repository of an author's work. It takes Burroughs seriously as a radical theorist and practitioner who critiqued drug laws, sexual practice, censorship, and what we today call a society of control. More broadly, his work continues to challenge our common assumptions about language, authorship, textual stability, and the archive in its broadest definition.

Overcoming Your Shadow Mission John Ortberg, 2008-09-02 The challenges, isolation, and relentless demands of leadership can inspire a variety of fears in the heart of a leader; among them fear of failure, fear of mutiny, fear of criticism, fear of disappointing people. However, the greatest fear leaders face is not something that might happen to them, but something that can happen in them—a degeneration of the heart that robs them of their calling and leaves a deep soul dissatisfaction in its place. John Ortberg describes this menacing fear in terms of mission and shadow mission. A mission is the highest purpose to which God calls us; a shadow mission is an authentic mission that has been derailed, often in imperceptible ways. Ortberg writes, “Part of what makes the shadow mission so tempting is that it’s usually so closely related to our gifts and passions. It’s not 180 degrees off track; it is just 10 degrees off track, but that 10 degrees is in the direction of hell.” Every leader has a mission—and a shadow mission. Even Jesus had to battle a shadow mission; it was to be a leader without suffering—to be the Messiah without the cross. Ortberg writes, “If we fail to embrace our true mission, we will live out our shadow mission. We will let our lives center around things that are unworthy, selfish and dark.” Using characters from the remarkable Old Testament story of Esther, Ortberg demonstrates the disastrous consequences of succumbing to shadow mission, and the stunning rewards of whole-hearted commitment to mission. With characteristic humor and insight, the author invites us to follow Esther’s example and courageously choose to embrace the mission God gives. Like Esther, we can lead without fear—even in threatening circumstances—because we know God is always at work in unseen, unknown and unlikely ways.

Recommendation Systems in Software Engineering Martin P. Robillard, Walid Maalej, Robert J. Walker, Thomas Zimmermann, 2014-04-30 With the growth of public and private data stores and the emergence of off-the-shelf data-mining technology, recommendation systems have emerged that specifically address the unique challenges of navigating and interpreting software engineering data. This book collects, structures and formalizes knowledge on recommendation systems in software engineering. It adopts a pragmatic approach with an explicit focus on system design, implementation, and evaluation. The book is divided into three parts: “Part I - Techniques” introduces basics for building recommenders in software engineering, including techniques for collecting and processing software engineering data, but also for presenting recommendations to users as part of their workflow. “Part II - Evaluation” summarizes methods and experimental designs for evaluating recommendations in software engineering. “Part III - Applications” describes needs, issues and solution concepts involved in entire recommendation systems for specific software engineering tasks, focusing on the engineering insights required to make effective recommendations. The book is complemented by the webpage rsse.org/book, which includes free supplemental materials for readers of this book and anyone interested in recommendation systems in software engineering, including lecture slides, data sets, source code, and an overview of people, groups, papers and tools with regard to recommendation systems in software engineering. The book is particularly well-suited for graduate students and researchers building new recommendation systems for software engineering applications or in other high-tech fields. It may also serve as the basis for graduate courses on recommendation systems, applied data

mining or software engineering. Software engineering practitioners developing recommendation systems or similar applications with predictive functionality will also benefit from the broad spectrum of topics covered.

Updating to Remain the Same Wendy Hui Kyong Chun, 2017-08-11 What it means when media moves from the new to the habitual—when our bodies become archives of supposedly obsolescent media, streaming, updating, sharing, saving. New media—we are told—exist at the bleeding edge of obsolescence. We thus forever try to catch up, updating to remain the same. Meanwhile, analytic, creative, and commercial efforts focus exclusively on the next big thing: figuring out what will spread and who will spread it the fastest. But what do we miss in this constant push to the future? In *Updating to Remain the Same*, Wendy Hui Kyong Chun suggests another approach, arguing that our media matter most when they seem not to matter at all—when they have moved from “new” to habitual. Smart phones, for example, no longer amaze, but they increasingly structure and monitor our lives. Through habits, Chun says, new media become embedded in our lives—indeed, we become our machines: we stream, update, capture, upload, link, save, trash, and troll. Chun links habits to the rise of networks as the defining concept of our era. Networks have been central to the emergence of neoliberalism, replacing “society” with groupings of individuals and connectable “YOU.” (For isn't “new media” actually “NYOU media”?) Habit is central to the inversion of privacy and publicity that drives neoliberalism and networks. Why do we view our networked devices as “personal” when they are so chatty and promiscuous? What would happen, Chun asks, if, rather than pushing for privacy that is no privacy, we demanded public rights—the right to be exposed, to take risks and to be in public and not be attacked?
