Logo Design Workbook Sean Adams, Noreen Morioka, Terry Lee Stone, 2006-03-01 Logo Design Workbook focuses on creating powerful logo designs and answers the question, What makes a logo work? In the first half of this book, authors Sean Adams and Noreen Morioka walk readers step-by-step through the entire logo-development process. Topics include developing a concept that communicates the right message and is appropriate for both the client and the market; defining how the client's long-term goals might affect the look and needs of the mark; choosing colors and typefaces; avoiding common mistakes; and deciphering why some logos are successful whereas others are not. The second half of the book comprises in-depth case studies on logos designed for various industries. Each case study explores the design brief, the relationship with the client, the time frame, and the results.

Networks of Outrage and Hope Manuel Castells, 2015-06-04 Networks of Outrage and Hope is an exploration of the new forms of social movements and protests that are erupting in the world today, from the Arab uprisings to the indignadas movement in Spain, from the Occupy Wall Street movement to the social protests in Turkey, Brazil and elsewhere. While these and similar social movements differ in many important ways, there is one thing they share in common: they are all interwoven inextricably with the creation of autonomous communication networks supported by the Internet and wireless communication. In this new edition of his timely and important book, Manuel Castells examines the social, cultural and political roots of these new social movements, studies their innovative forms of self-organization, assesses the precise role of technology in the dynamics of the movements, suggests the reasons for the support they have found in large segments of society, and probes their capacity to induce political change by influencing people's minds. Two new chapters bring the analysis up-to-date and draw out the implications of these social movements and protests for understanding the new forms of social change and political democracy in the global network society.

**The History of Forgetting** Norman M. Klein, 2008-08-17 Los Angeles is a city which has long thrived on the continual re-creation of own myth. In this extraordinary and original work, Norman Klein examines the process of memory erasure in LA. Using a provocative mixture of fact and fiction, the book takes us on an 'anti-tour' of downtown LA, examines life for Vietnamese immigrants in the City of Dreams, imagines Walter Benjamin as a Los Angeleno, and finally looks at the way information technology has recreated the city, turning cyberspace into the last suburb. In this new edition, Norman Klein examines new models for erasure in LA. He explores the evolution of the Latino majority, how the Pacific economy is changing the structure of urban life, the impact of collapsing infrastructure in the city, and the restructuring of those very districts that had been 'forgotten'.

**Globalization and Its Discontents** Joseph E. Stiglitz, 2003-04-17 This powerful, unsettling book gives us a rare glimpse behind the closed doors of global financial institutions by the winner of the 2001 Nobel Prize in Economics. When it was first published, this national bestseller quickly became a touchstone in the globalization debate. Renowned economist and Nobel Prize winner Joseph E. Stiglitz had a ringside seat for most of the major

economic events of the last decade, including stints as chairman of the Council of Economic Advisers and chief economist at the World Bank. Particularly concerned with the plight of the developing nations, he became increasingly disillusioned as he saw the International Monetary Fund and other major institutions put the interests of Wall Street and the financial community ahead of the poorer nations. Those seeking to understand why globalization has engendered the hostility of protesters in Seattle and Genoa will find the reasons here. While this book includes no simple formula on how to make globalization work, Stiglitz provides a reform agenda that will provoke debate for years to come. Rarely do we get such an insider's analysis of the major institutions of globalization as in this penetrating book. With a new foreword for this paperback edition.

**Staying with the Trouble** Donna J. Haraway, 2016-08-19 In the midst of spiraling ecological devastation, multispecies feminist theorist Donna J. Haraway offers provocative new ways to reconfigure our relations to the earth and all its inhabitants. She eschews referring to our current epoch as the Anthropocene, preferring to conceptualize it as what she calls the Chthulucene, as it more aptly and fully describes our epoch as one in which the human and nonhuman are inextricably linked in tentacular practices. The Chthulucene, Haraway explains, requires sym-poiesis, or making-with, rather than auto-poiesis, or self-making. Learning to stay with the trouble of living and dying together on a damaged earth will prove more conducive to the kind of thinking that would provide the means to building more livable futures. Theoretically and methodologically driven by the signifier SF—string figures, science fact, science fiction, speculative feminism, speculative fabulation, so far—Staying

with the Trouble further cements Haraway's reputation as one of the most daring and original thinkers of our time.

**Mundane Objects** Pierre Lemonnier,2016-06-16 This concise book shows the importance of objects that are considered ordinary by cultural outsiders and scholars, yet lie at the heart of the systems of thought and practices of their makers and users. This volume demonstrates the role of these objects in nonverbal communication, both in non-ritual and in ritual situations. Lemonnier shows that some objects, their physical properties and their material implementation, are wordless expressions of fundamental aspects of a way of living and thinking, as well as sometimes the only means of expressing the inexpressible. Through the study of the most mundane technical activities such as fence building, creating models cars, or trapping fish, we often gain a better understanding of what these objects mean and how they work within their cultures of origin. In addition to anthropologists and archaeologists, this book will also be of interest to sociologists, historians, philosophers, cognitive anthropologists and primatologists, for whom the intertwining of "function" and "style" is the very mark of all cultural behavior.
