Unorthodox Ways to Think the City Teresa Stoppani,2018-12-07 This book argues that architecture and the city and their processes can be better understood by drawing categories from disciplines that exceed the architectural and urban cultural context. It performs an open intellectual reading that traverses architecture and architectural theory, but also art theory and history, cartography, philosophy, literature and cultural studies, to unfold a series of 'figures' that are ambiguously placed between the representation and the construction of space in architecture and the city. The paradigm and philosophy, the island and the city, the map and representation, the model and making and the questioning of form performed by dust, are explored beyond their definition, as processes that differently make space between architecture and the city and are proposed as unorthodox analytic techniques to decipher contemporary spatial complexity. The book analyses how these 'figures' have been employed at different times and in different creative disciplines, beyond architecture and in relation to changing notions of space, and traces the role that they have played in the shift towards the dynamic that has taken place in contemporary theory and design research. What emerges is the idea of an 'architecture of the city' that is not only physical but is largely defined by the way in which its physical spaces are regulated, lived and perceived, but also imagined and projected.

Creative Design and Innovation Robin Roy,2024-02-09 Using many real-world examples and cases, this book identifies key factors and processes that have contributed to the creation of successful new products, buildings, and innovations, or resulted in some failures. Such factors include the creativity of individuals and groups, their sources of inspiration, the processes of creative design and innovation, and the characteristics of the products, buildings, and innovations themselves. Much has been written about creativity and innovation, but what helps to foster creativity, enable creative ideas to be translated into practical designs, and ensure those new products or buildings succeed as innovations on the market or in use? This book discusses these elements through the author's origination and analysis of examples and case studies ranging from the revolutionary innovation of the smartphone, through radical innovations in domestic appliances and sustainable housing, to creative designs of contemporary jewellery. The broad range of examples and cases include product and fashion design, filmmaking and fine art, as well as industrial design, engineering, and architecture, offering lessons for creatives, designers, and innovators from many subject backgrounds. Analysis of the different factors, successes, and failures are presented in text boxes throughout the book to allow readers to easily understand the key lessons from each example or case, with numerous colour visuals, diagrams, and charts for illustration. This book is a must-read for a broad audience interested in creativity, design, and innovation, including practitioners in design, engineering, architecture, and product management, and students and instructors of those subjects.

La nouvelle guerre des étoiles Vincent Coquaz, Ismaël Halissat, 2020-08-26 Combien de fois avez-vous été sollicités pour attribuer une note ? Pensez à vos derniers achats en ligne, aux étoiles qu'on attribue à un chauffeur ou un livreur... on ne les voit même plus. Cette mode est aussi silencieuse qu'irrésistible : hôpitaux, services publics, tous ont vocation à être comparés, classés. Mais, comme dans le privé, le système porte en germe de graves dérives. Des collègues jésuites du XVIIe siècle où elle est née jusqu'aujourd'hui, la notation pose un ensemble de questions auxquelles il devenait urgent de répondre. Vincent Coquaz et Ismaël Halissat ont enquêté : de TripAdvisor à Amazon, en passant par Uber, jusqu'aux notes citoyennes expérimentées en Chine, ils se sont plongés dans les méandres des avis clients, où une bonne étoile peut faire ou défaire une réputation et mettre en péril un emploi. Inventé par un gourou américain du marketing, le questionnaire de satisfaction moderne est devenu dans le meilleur des cas une fin en soi absurde. Dans le pire, il impose un stress infernal aux employés. Dans certaines entreprises, les salariés se notent même entre eux. Et, comme à l'école, la tentation de tricher pour améliorer sa note est souvent grande... Pire, une partie des notes qui nous sont attribuées sont totalement invisibles. En tant que consommateurs, travailleurs, et demain peut-être en tant que citoyens, nous sommes pour l'instant totalement désarmés devant cette nouvelle guerre des étoiles. Vincent Coquaz est journaliste à la rubrique CheckNews de Libération et formateur en école de journalisme. Il a précédemment travaillé pour Arrêt sur

Images. Ismaël Halissat est journaliste au service police/justice de Libération. Il a enquêté récemment sur les armes du maintien de l'ordre et sur plusieurs faits de violences policières.
