Empowering Students As Questioners Jackie A. Walsh, 2021-02-23 Create environments where students ask questions, not just answer them! When students become questioners, learning improves for all. Yet, even though research has repeatedly shown that student questioning increases ownership of learning and narrows opportunity gaps, studies show that students ask less than five percent of the questions in classrooms today. How do you turn this teacher-centric dynamic around? In this book by bestselling author and education expert Jackie Walsh, the author shifts the focus to student-centric learning and how to develop student questioning strategies, including self-questions, academic questions, exploratory questions, and dialogic questions. Other highlights include: - Vignettes of quality questioning in action in various grade-level and content-area classrooms - Examples of how to use questioning to harness the power of formative assessment and create a culture of inquiry - Student questioning models for distance learning

Reviews and Testimonials Literacy coach and author Lori Oczkus knows how to take the best of what works from long-established research and showcase it to make teaching and learning more effective, engaging, and enjoyable. In her latest edition of *Reciprocal Teaching at Work*, she demonstrates how to scaffold instruction so that all K-12 students can benefit from

reciprocal teaching techniques, what she calls the Fab Four—predicting, questioning, clarifying, and summarizing—in whole-group, guided reading, and book club settings, for both fiction and informational texts. In clearly delineated lessons and minilessons, Lori deftly shares how to support students' learning, including English language learners and students who struggle, so they can successfully apply and monitor those four discussion strategies—as well as troubleshoot problems—to yield significant progress in their reading comprehension. Literacy and Empowerment Patrick L. Courts,1991-10-30 The first volume of the series *Language and Ideology*, this work explores mature literacy. Patrick L. Courts argues that while by society's standards many people can read well, they are unable to create meaning from the world of oral and written language. His theory derives from psycho- and sociolinguistics, cognitive psychology, philosophy, literary criticism, and whole language theory. Courts criticizes programmed activities, texts, and workbooks--challenging the control that commercial textbook publishers and test-makers exert on education. He shuns overemphasis on methods and offers an alternative approach firmly grounded in theory and aimed at empowering teachers and students. Courts begins with a discussion of liberatory pedagogy, drawing from whole language theory, the social semiotics of Halliday, reader-response theory, and the ideas of Heidegger and Derrida. The subsequent methodological chapters build a case for what Courts calls a conservative revolution in literacy education: teachers combining a sound base of theory with methodologies to tap students' generative, creative powers. Courts's methodology aims to empower people as meaning makers. This book is valuable to teachers and administrators, textbook publishers, and students of education.

Empowerment through Multicultural Education Christine E. Sleeter,1991-01-01 This book reframes questions about student diversity by probing the extent to which society serves the interests of all,

and by examining the empowerment of members of oppressed groups to direct social change. It examines the empowerment of children who are members of oppressed racial groups, lower class, and female, based on the ideas of multicultural education. A series of ethnographic studies illustrates how such young people view their world, their power to affect it in their own interests, and their response to what is usually a growing sense of powerlessness as they mature. The authors also conceptualize contributions of multicultural education to empowering young people, and report investigations of multicultural education projects educators have used for student empowerment. Issues in teacher education are also discussed.

Applying Linguistics in the Classroom Aria Razfar, Joseph C. Rumenapp, 2013-07-24 Making linguistics accessible and relevant to all teachers, this text looks at language issues in the classroom through an applied sociocultural perspective focused on how language functions in society and in schools—how it is used, for what purposes, and how teachers can understand their students' language practices. While touching on the key structural aspects of language (phonetics, phonology, morphology, and syntax), it does not simply give an overview, but rather provides a way to study and talk about language. Each chapter includes practical steps and suggests tools for applying different kinds of linguistic knowledge in classrooms. The activities and exercises are adaptable to elementary or high school settings. Many examples focus on the intersection of math, science, and language. Teacher case studies show how real teachers have used these concepts to inform teaching practices. Given the increasing use of multimedia resources in today's schools, multiple mediums are integrated to engage educators in learning about language. The Companion Website provides a multitude of relevant resources that illustrate the diversity of language functions and debates about language in society.

English and Empowerment in the Developing World Nasreen Hussain, Mohammad Zafar, 2009-10-02 This book is a collection of thought-provoking papers that investigate empowerment within the context of language, education, and technology. In the seventeen papers published in the book, local and international ELT practitioners and researchers have analysed their experiences within a range of socio-linguistic situations. Adding significant insights and depth to a previously under-researched area, the publication will be of interest not only to ELT teachers and students, but also to social science researchers in developing and marginalised countries. The book based on selected papers presented at the 2007 Aga Khan University, Centre of English Language seminar in Karachi exemplifies the issues of language and empowerment. The papers deal with complex educational and socio-cultural issues and force readers to undertake a cultural journey to see them from a different perspective. The collection of papers, whatever one's teaching-learning context, will become an essential resource book for all English language teachers, scholars, and researchers interested in learning more about the success stories and problems facing language education in the developing countries, especially Asia today.

Learning That Lasts Ron Berger, Libby Woodfin, Anne Vilen, 2016-04-05 A practical guide to deeper instruction—a framework for challenging, engaging, and empowering students of all ages For schools to meet ambitious new standards and prepare all students for college, careers, and life, research has shown unequivocally that nothing is more important than the quality of daily instruction. *Learning That Lasts* presents a new vision for classroom instruction that sharpens and deepens the quality of lessons in all subject areas. It is the opposite of a 'teacher-proof' solution. Instead, it is predicated on a model of instruction that honors teachers as creative and expert planners of learning experiences for their students and who wish to continuously grow in their instructional and content knowledge. It is not a theoretical vision. It is a model of instruction refined in some of the nation's most successful public schools—schools that are beating the odds to create remarkable achievement—sited primarily in urban and rural low-income communities. Using case studies and examples of powerful learning at all grade levels and in all disciplines, *Learning That Lasts* is a guide to creating classrooms that promote deeper understanding, higher order thinking, and student independence. Through text and companion videos, readers will enter inspiring classrooms where students go beyond basics to become innovators, collaborators, and creators. *Learning That Lasts* embraces a three-dimensional view of student achievement that includes mastery of knowledge and skills, character, and high-quality work. It is a guide for teachers who wish to make learning more meaningful, memorable, and connected to life, and inspire students to do more than they think possible.

The Knowledge Gap Natalie Wexler, 2020-08-04 The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension skills at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental

flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.

Teacher Empowerment Toward Professional Development and Practices Ismail Hussein Amzat, Nena P. Valdez, 2017-04-22 This book gathers a range of contributions from researchers and practitioners across borders with an emphasis on theoretical arguments and empirical data concerning teacher empowerment. It propels readers to explore powerful teaching practices that can further advance the profession as a continuing priority in the system when appropriately utilized. Further, it strives to capture teachers' readiness to improve their professional skills and responsive practices as a form of accountability for their teaching and students' learning, two aspects that are increasingly being judged by various stakeholders. The book argues that teachers' autonomous participation and engagement in relevant decision-making activities and equitable access to continuing professional development opportunities are and should remain major priorities.

The Heart of Teaching Stephen Wangh, 2013 *Teaching Questions* is a book about teaching and learning in the performing arts.
